processing but they share the following aims To establish and maintain liaison with national and international organizations
with allied interests and to foster cooperative action collaborative research and information exchange To identify subjects
and priorities for research to stimulate theoretical work on fundamental issues and to foster fundamental research which will
underpin future development To provide a forum for professionals with a view to promoting the study collection exchange
and dissemination of ideas information and research findings and thereby to promote the state of the art To seek and use the
most effective ways of disseminating information about IFIP s work including the organization of conferences workshops and
symposia and the timely production of relevant publications To have special regard for the needs of developing countries and
to seek practicable ways of working with them To encourage communication and to promote interaction between users
practitioners and researchers To foster interdisciplinary work and in particular to collaborate with other Technical
Committees and Working Groups The 17 contributions in this book describe the scientific technical and further work in TCs
and WGs and in many cases also assess the future consequences of the work s results These contributions explore the
