**Carl Gustav Jung** Renos K. Papadopoulos, 1992

**Michael Fordham** James Astor, 2006-04-21

Michael Fordham's immense contribution to analytical psychology has been marked by its combination of practical and theoretical genius. Before retirement he ran a full clinical practice alongside the co-editorship of *The Collected Works of Jung*, development of the Society of Analytical Psychology and its child and adult trainings and a fifteen-year editorship of the *Journal of Analytical Psychology*. In his published work there has emerged a consistent and original contribution to Jungian thought, particularly in relation to the processes of individuation on childhood and the links between analytical psychology and the work of the Kleinians. James Astor takes a critical and informed look at Fordham's work and ideas. Illustrating theory with examples drawn from clinical practice, the book will provide a useful amplification of Fordham's own work for students of analytical psychology and a sound introduction to it for analysts interested in understanding the connections between post-Jungian and post-Kleinian thought.

**The Wounded Healer** David Sedgwick, 2016-06-17

In the years since the publication of *The Wounded Healer*, countertransference has become a central consideration in the analytic process. David Sedgwick's work was ground-breaking in tackling this difficult topic from a Jungian perspective and demonstrating how countertransference can be used in positive ways. Sedgwick's extended study of the process candidly presents the analyst's struggles and shows how the analyst is, as Jung said, as much in the analysis as the patient. The book extends Jung's prescient work on countertransference to create a dynamic view of the analyst-patient interaction, stressing the importance of the analyst's own woundedness and how this may be used in conjunction with the patient's own. Sedgwick begins with a discussion of the need and justification for a Jungian approach to countertransference, then reviews Jungian theories and presents detailed illustrations of cases showing the complexity of transference/countertransference processes in both the patient and the analyst, and concludes with a model of countertransference processing. This Classic Edition also includes a new introduction by the author. It will be an important work for Jungian analysts, psychotherapists, and other clinicians and students interested in the struggles of the therapeutic process.

**Analysis, Repair and Individuation** Kenneth Lambert, 2018-05-08

Narcissism Mario Jacoby attempted to overcome the doctrinal differences between the different schools of depth psychology while taking into account the characteristic approaches of each Through a close examination of the actual experience of self the process of individuation narcissism and narcissistic personality disorder Jacoby deftly demonstrated the benefits of a cross fertilization of ideas and techniques for the professional analyst This Classic Edition includes a new foreword by Kathrin Asper
