that the religions of our world should not be short on logic but a simple analysis of their beliefs appear to show otherwise The same could be said of the monotheist God why does he expect a persons faith to be founded on elements lacking sound logic The author answers the question in a rather surprising way The lack of logic is only due to human interference in the affairs of God The divine system designed to regenerate love originally created in the human heart has been corrupted beyond recognition This book is a search for Gods rational plan of action to help humans grow true love in their hearts **In**

Defense of the Faithful C. DeVolld,2006-12 In Defense of the Faithful The Scriptural Truth of Catholicism was written as an aggressive defense of the Catholic Faith It explores the foundations and historic origins of Catholic doctrine from an evangelical fundamentalist and reformed Protestant point of view It offers the teachings of the Church in common language then defends the position with scriptural quotations from throughout the Holy Bible It then quotes the Catechism formal teaching doctrine of the Catholic Church offering a factual presentation of what the Church actually teaches rather than what many people think it teaches In doing so it is critical not only of Protestantism but some aspects of Catholicism in practice as well It credits and praises both groups of Christians as being believers dedicated to Jesus and the Trinity while pointing out the mutual failures of both groups It is a thought provoking examination of Catholic doctrine practice theology and ethics from a biblical viewpoint and is not afraid to point fingers at all parties involved in greater Christianity **The Gospel**
