

FAMILY (SOCIOLOGY)

DEFINITION

Family refers to a social group characterized by common residence, economic cooperation, and reproduction. It consists of individuals bound by kinship—either through blood, marriage, or adoption—who share a commitment to one another. The structure of a family unit can vary widely across cultures, time periods, and individual experiences.

COMMON TYPES

- Nuclear or conjugal (a wife, a husband, and their children)
- matrifocal (a mother and her children)
- patrifocal (a father and his children)
- extended families (parents, grandparents, children, aunts, uncles, and so on)

Social Learning And Systems Approaches To Marriage And The Family:

Social Learning and Systems Approaches to Marriage and the Family Ray DeV. Peters, Robert Joseph McMahon, 1988 Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i.e. sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production Family and Peers Angela M. Neal-Barnett, Josefina M. Contreras, Kathryn A. Kerns, 2000-04-30 Why is it that relationships with family members predict the quality of children's relationships outside the family A wealth of research has documented that various aspects of family relationships are predictably related to the quality of children's interactions and relationships with peers Understanding what account for these effects is important both for theories of children's relationships and intervention efforts to ameliorate children's peer relationship difficulties This volume advances the field by discussing several mechanisms that may account for continuities across family and peer relationships A variety of theoretical perspectives are represented in the book For example both learning and biological explanations are considered Authors also note two key considerations in investigating family and peer relationships First it is necessary to consider the cultural context The function and meaning of family and peer relationships may differ depending on what roles are played by these relationships in different cultural contexts Second it is necessary to consider the child's age Developmental issues such as concerns with establishing greater independence at the entrance to adolescence will impact both family and peer relationships *Socioemotional Development in the Toddler Years* Celia A. Brownell, Claire B. Kopp, 2010-06-03 This volume explores the key developmental transitions that take place as 1 to 3 year olds leave infancy behind and begin to develop the social and emotional knowledge skills and regulatory abilities of early childhood Leading investigators examine the multiple interacting factors that lead to socioemotional competence in this pivotal period covering both typical and atypical development Presented is innovative research that has yielded compelling insights into toddlers relationships emotions play communication prosocial behavior self control autonomy and attempts to understand themselves and others The final chapter presents a systematic framework for socioemotional assessment

Interpersonal Development Rita Zukauskienė, 2017-11-30 This volume brings together for the first time the papers

which have shaped and defined the field of interpersonal development. It celebrates the maturation of the subject by bringing together the best work by scholars who have been instrumental in furthering the field. The twenty-seven essays describe developmental changes in interactions within specific close relationships covering parent-child relationships, friendships, and peer relationships, romantic and spousal relationships, and sibling relationships. They also detail characteristics of specific relationships and interconnections among these key features as well as tying close relationships to individual outcomes. The essays are accompanied by an introduction which offers a brief history of the field, a review of relationship definitions, and a detailed preview of the articles.

Families, Risk, and Competence Michael Lewis, Candice Feiring, 2014-04-04. The problems of studying families arise from the difficulty in studying systems where there are multiple elements interacting with each other and with the child. How should this system be described? Still other problems relate to indirect effects, namely the influence of a particular dyad's interaction on the child when the child is not a member of the dyad. While all agree that the mother-father relationship has important bearing on the child's development, exactly how to study this, especially using observational techniques, remains a problem. While progress in studying the family has been slow, there is no question that an increase in interest in the family systems, as opposed to the mother-child relationship, is taking place. This has resulted in an increase in research on families and their effects. This volume, by leading figures in child development, attests to the growing sophistication of the conceptualization and measurement techniques for getting at family processes. The third in a series that aims to address topics relevant to the developmental problems and developmental disabilities of retardation, this volume is divided into two parts. Section 1 presents basic family processes and approaches for describing family dynamics. It deals with these issues from a broad perspective, including studying families at dinner, families in different cultural contexts, and the understanding of family in nonhuman primates. Section 2 looks at family processes in the service of studying families at risk. The risk factors include poverty, malnutrition, and developmental delay and retardation. The study of family processes in these contexts provides data on family dynamics as well as how these dynamics impact on the children's developing competence. This volume will be informative for researchers, clinicians, and educators from a variety of disciplines and settings. The editors' aim is to bring a greater clarity to issues concerning the family life of children and highlight new research and possibilities for intervention.

Relationships as Developmental Contexts W. Andrew Collins, Brett Laursen, 1999-03 This volume is at once a tightly focussed exploration of one of the hottest areas in social and developmental psychology and also a tribute to one of the field's leaders For social dev psychologists educators family studies specialists

Social Withdrawal, inhibition, and Shyness in Childhood Kenneth H. Rubin, Jens B. Asendorpf, Jens Asendorpf, 2014-02-25 Psychologists of varying theoretical persuasions have long held that social experiences are critical to normal developmental trajectories and that the lack of such experiences is worthy of compensatory attention Surprisingly however little empirical attention has been directed to the study of the psychological significance of social solitude for children In an effort to shed new light on the meanings and developmental course of social solitude in childhood a group of esteemed scholars from Europe and North America was invited to share and exchange information An international audience of researchers actively involved in the study of social withdrawal and social inhibition or shyness in childhood was led in discussion by the scholars whose chapters are published in this volume The editors hope that this offering stimulates continuing efforts to better understand the developmental meanings causes and courses of this childhood social dysfunction

Children's Peer Relations and Social Competence Gary W. Ladd, 2005-01-01 This book examines the role of peer relationships in child and adolescent development by tracking research findings from the early 1900s to the present Dividing the research into three generations the book describes what has been learned about children's peer relations and how children's participation in peer relationships contributes to their health adjustment and achievement Gary W Ladd reviews and interprets the investigative focus and findings of distinct research eras to highlight theoretical or empirical breakthroughs in the study of children's peer relations and social competence over the last century He also discusses how this information is relevant to understanding and promoting children's health and development In a final chapter the author appraises the major discoveries that have emerged during the three research generations and analyzes recent scientific agendas and discoveries in the peer relations discipline

Handbook of Parenting Marc H. Bornstein, 2005-02-16 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of

characters responsible for parenting and is revealing of the psychological make ups and social interests of those individuals

Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking and theory as well as classic and modern research on that topic All chapters follow a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In addition to considering their own convictions and research the chapter contributors present and broadly interpret all major points of view and central lines of inquiry

Separate Social Worlds of Siblings E.

Mavis Hetherington, David Reiss, Robert Plomin, 2013-05-13 One of the most notable findings in contemporary behavior genetics is that children growing up in the same family are not very comparable. Findings suggest that in order to understand individual differences between siblings it is necessary to examine not only the shared experiences but also the differences in experiences of children growing up in the same family. In the past decade a group of investigators has begun to examine the contributions of genetics and both shared and nonshared environment to development. As with many new research endeavors this has proven to be a difficult task with much controversy and disagreement not only about the most appropriate models and methods of analysis to be used but also about the interpretation of findings. Written by some of the foremost scholars working in the area on nonshared environment the papers in this book present their perspectives, concerns, strategies, and research findings dealing with the impact of nonshared environment on individual differences in the development of siblings. This volume will have heuristic value in stimulating researchers to think in new ways about the interactions between heredity, shared and nonshared environment, and the challenges in identifying their contributions to sibling differences. These papers should raise new questions about how to examine the contributions of genetic and environmental factors to development with consideration given to the findings of this study of sibling differences and nonshared environment. Further, these papers may encourage a growing trend to integrate genetic and environmental perspectives in studies of development.
