from Below Rob Knowles,2017-07-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However the tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy **Heterodox Economics and Global**

Emergencies Ariane Agunsoye,Thoralf Dassler,Eurydice Fotopoulou,Jonathan Mulberg,2023-12-05 From the financial crash to the climate emergency and Covid 19 this book demonstrates that recent crises have had unequal impacts they require a heterodox approach to economics for their understanding and new ways of thinking are needed to address them Drawing on a variety of heterodox and radical perspectives and global voices including those from India Africa and South America this

collection explores the causes and impacts of global emergencies from a wide array of viewpoints The first section outlines how the pandemic has shown up the biases of orthodox thought and policy particularly its Eurocentric and patriarchal focus on the urban formal economy It outlines how adding an international dimension to institutional analysis uncovers systematic inequalities in the responses to emergencies and how new paradigms can provide better alternatives The massive interventionism worldwide has led to renewed interest in the global financial system and also in Marxian approaches to money The second section of the book therefore considers a range of alternative approaches to the study of finance from Marx to Minsky which are currently being revisited The collection concludes with a suggestion for heterodox economics pedagogy since changing economics education is vital for future dissemination of real world ideas The book will be of interest to a variety of researchers and postgraduate students and lecturers especially in the fields of development health labour and feminist economics and also international political economy and heterodox economics

ECONOMIC ISSUES IN RETROSPECT AND

PROSPECT I Ahmet Arif EREN,2018-09-15 *Post-growth Politics* Peter Ferguson,2018-06-19 This book uses a critical political economy approach to develop an historically and politically grounded set of strategies for states to move toward a post growth decarbonised global economy It begins by examining the social and ecological costs of and limits to economic growth and determines that significant decarbonisation of the global economy can only be achieved if conventional growth based economies are replaced by an alternative post growth economy Set apart from many other works in the field by its critical political economy approach to policy development this book offers the reader three distinctive features First it places the analysis in historical context in order to demonstrate how the global political economy is constantly changing with respect to distributions of wealth power and fundamental norms and explores how states might harness and transform these contingent patterns in a post growth direction Second the book is not only concerned with developing and advocating post growth policies but also with how these measures can be incorporated into the high level domestic and international strategies pursued by states to ensure their political legitimacy and economic and geopolitical survival Third rather than proposing an idealised and politically na ve model of socioecological transformation the proposed post growth policy framework is highly cognisant of the geopolitical and international economic pressures facing states and demonstrates how these can be managed in the transition toward a post growth economy This book represents an invaluable resource for policymakers academics activists and students wishing to study or contribute to the transition to a post growth decarbonised economy

Information Technology and Socialist Construction Daniel E. Saros,2014-05-09 The failure of command central planning in the twentieth century has led to a general disillusionment within the socialist movement worldwide Some

alternatives to capitalism have been proposed since the end of the Cold War but none has offered an alternative form of economic calculation This book explains how modern information technology may be used to implement a new method of

economic calculation that could bring an end to capitalism and make socialism possible In this book the author critically examines a number of socialist proposals that have been put forward since the end of the Cold War It is shown that although these proposals have many merits their inability effectively to incorporate the benefits of information technology into their models has limited their ability to solve the problem of socialist construction The final section of the book proposes an entirely new model of socialist development based on a needs profile that makes it possible to convert the needs of large numbers of people into data that can be used as a guide for resource allocation This analysis makes it possible to rethink and carefully specify the conditions necessary for the abolition of capital and consequently the requirements for socialist revolution and ultimately communist society Information Technology and Socialist Construction will be of interest to students and scholars of political economy the history of economic thought labour economics and industrial economics

Indian Quarterly Register ,1929 History of Economic Thought E. K. Politics as Rational Action L. Lewin,E.

Vedung,2012-12-06 One of the most promising trends in modern political science is the development of a theory of politics as rational action Focussing on choice as the central topic of study rational choice theorists set out to specify what alternative an actor should prefer if he has some given knowledge of the consequences of each alternative and wants to see his preference system as fully realized as possible But rational choice theory is not confined to the normative sphere of science It can also be used for explanatory purposes Then the alternatives actually chosen are specified and the task is to explain the decisions by finding out what considerations lay behind them The starting point for an emerging research program at the Department of Government Uppsala University on Politics as Rational Action is to describe the major choices in fifteen different policy areas of Swedish domestic politics and explain why they were made

The Limits of Liberty James M. Buchanan,1975 *The Limits of Liberty* is concerned mainly with two topics One is an attempt to construct a new contractarian theory of the state and the other deals with its legitimate limits The latter is a matter of great practical importance and is of no small significance from the standpoint of political philosophy Scott Gordon Journal of Political Economy James Buchanan offers a strikingly innovative approach to a pervasive problem of social philosophy The problem is one of the classic paradoxes concerning man s freedom in society in order to protect individual freedom the state must restrict each person s right to act Employing the techniques of modern economic analysis Professor Buchanan reveals the conceptual basis of an individual s social rights by examining the evolution and development of these rights out of presocial conditions
