Schmidt, 2020-11-11 Wollen wir die Vernunft bewahren dann müssen wir den Glauben an sie überwinden **Subject Guide to Books in Print**, 1975 **Paperbound Books in Print 1995** Reed Reference Publishing, Reed, 1995-12 **Medical and Health Care Books and Serials in Print**, 1997 *Conflicts in History Education in Europe* Ander Delgado, Andrew Mycock, 2023-07-01 The heightened resonance of identity driven politics in many states across twenty first century Europe emphasizes the critical role of history in shaping public contestation of the idea of the nation and accordant manifestations of nationalism and national identity How the past is interpreted or what and how is remembered has proven increasingly febrile contentious and divisive Debates about history have gone beyond academia and have permeated and polarised politics and society in many European countries Intense debate and dispute about national history and culture has often focused on the history teaching in schools colleges and universities According to the aforementioned it is evident that the teaching of history in the classroom is a relevant topic within the educational system For this reason it is not surprising that many times the choice of what kind of history to teach becomes a controversial topic

The existence in a given society of different visions about the nation or the various responses proposed to face the social challenges existing in it immigration independence nationalisms can turn the teaching of history into a debated and controversial topic Logically depending on the specific political context of each country this debate can acquire different developments and characteristics The school is not an institution isolated from its socio political context In fact both areas constantly interact Therefore this book proposes an approach to this topic that tries to connect the specific political context of different countries with the debates about education and history teaching from 1990 until the present It deals with the extent to which the social and political context affects the history teaching practice developed in the classrooms through the decisions made on the official curricula and textbooks Emphasizing this connection between both aspects is one of the strengths of this book That is the reason why this book proposes an approach to that reality from diverse points of view and show the different materializations observed in this area in the studied cases The chapters of this volume allow us to verify this heterogeneous reality and help enrich our knowledge on this broad and interesting topic
