Cole, 1973 **Beyond the Science Wars** Ullica Christina Olofsdotter Segerstråle, Ullica Segerstråle, Ullica Christina Olofsdotter Segerstråle, 2000-08-03 Contextualizes the Science Wars from interdisciplinary sociological historical scientific political and cultural perspectives Science and the Sociology of Knowledge (RLE Social Theory) Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In *Science and the Sociology of Knowledge* Michael Mulkay's first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position *Inequality and Society* Jeff Manza, Michael Sauder, 2009 With the ideal balance of classic essays and more contemporary studies *Inequality and Society* covers the standard themes of poverty and inequality while bringing political institutions into the analysis **Research in Social Stratification and Mobility** Kevin T Leicht, 2005-06-04 *Research in Social Stratification and Mobility* continues its tradition of publishing the best and most innovative research on the changing landscape of social inequality the world over This issue focuses on different dimensions of social closure and their relationship to social inequality processes including the changing role that education plays in sorting people into favorable and unfavorable labor market positions across a global diversity of cultural settings This issue also examines the fluid boundaries of race and ethnicity in contentious political settings relationships between attitudes and collective action and the role that technology and political context plays in promoting economic development and well being These topics and the research methodologies they represent display the vitality of social science research dealing with social stratification and the wide array of methods contexts and policies that directly affect the life chances of most of the world's peoples This issue also marks a continuation of the ties developed between RSSM and the Social Stratification and Mobility section of the International Sociological Association RC 28 This collaboration promises to promote and disseminate social inequality research throughout the world through an established network of

McLeod, Edward J. Lawler, Michael Schwalbe, 2014-08-18 This volume provides the first comprehensive overview of social psychological research on inequality for a graduate student and professional audience Drawing on all of the major theoretical traditions in sociological social psychology its chapters demonstrate the relevance of social psychological processes to this central sociological concern Each chapter in the volume has a distinct substantive focus but the chapters will also share common emphases on The unique contributions of sociological social psychology The historical roots of social psychological concepts and theories in classic sociological writings The complementary and conflicting insights that derive from different social psychological traditions in sociology This Handbook is of interest to graduate students preparing for careers in social psychology or in inequality professional sociologists and university college libraries China's Scientific Elite Cong Cao, 2004-07-31 China s Scientific Elite is a study of those scientists holding China s highest academic honour membership of the Chinese Academy of Sciences Having carried out extensive systematic data collection of CAS members Cao examines the social stratification system of the Chinese science community and the way in which politics and political interference has effected the stratification The book then goes on to compare the Chinese system to the stratification of the US scientific elite The conclusions are fascinating not least because one national elite resides in a democratic liberal social system and the other in an authoritarian social system

Power and Equity William Maxwell McCord, Arline McCord, 1977 Is inequality inevitable Are certain groups or people in every society more equal than others Slavery the caste system serfdom class distinctions and the bureaucratic inequality of the post industrial age these are some of the major forms of inequality that have existed and in some cases still exist in all societies To answer these questions the authors of POWER AND EQUITY employ a historical comparative perspective to reveal not only why each of these five systems emerged but also the reasons for their continuation erosion or disappearance Uniting social science with social philosophy this text provides the student with a basic introduction to the subject of

stratification and the arguments surrounding the problems of power and equity in any society The Soviet Agrarian Debate Susan Gross Solomon, 2019-07-16 The first decade of Soviet cultural life was marked by a pluralism unmatched in the subsequent history of the USSR In many fields of art and science Party and non Party proletarian and bourgeois intellectuals worked side by side vigorously debating questions of substance and method In this first major study of a Soviet field of social science in the post Revolution period Dr Solomon examines the controversy that divided social scientists studying the economy and society of the Soviet peasant during the 1920s The intellectual disagreements in post Revolution Soviet rural studies were exacerbated by social political and professional differences among the contending scholars The infighting between the groups was bitter Yet in contrast to recent studies of other Soviet professions in the 1920s the author finds that in rural studies Marxists and non Marxists had much in common Her findings suggest that the coexistence of the old and the new in Soviet rural studies might have lasted for some time had not external political forces intervened in late 1928 acting as a pressure on the field and eventually causing its demise **Social Stratification** James Littlejohn, 2021-10-17 Originally published in 1972 this book aimed to provide the student with a basic understanding of the main theories of social stratification and to acquaint them with current methods of research with the results from modern research with emphasis on British research and with current issues in this field The first two chapters are concerned with theory and are followed by chapters on slavery and the caste system These are intended to illustrate concepts and theory and to offer the student a comparative perspective in which to view stratification in modern society which is dealt with in a final lengthy chapter The book has been written primarily for first year university students but also with sixth formers and students in colleges of further education in mind **Embodying Inequality** Nancy Krieger, 2016-12-05 To advance the epidemiological analysis of social inequalities in health and of the ways in which population distributions of disease disability and death reflect embodied expressions of social inequality this volume draws on articles published in the International Journal of Health Services between 1990 and 2000 Framed by ecosocial theory it employs ecosocial constructs of embodiment pathways of embodiment cumulative interplay of exposure susceptibility and resistance across the lifecourse and accountability and agency to address the question and who and what drives current and changing patterns of social inequalities in health **Social Stratification** Norval D. Glenn, Jon P. Alston, David Weiner, 1970 **Toward A Chicano Social Science** Irene I. Blea, 1988-10-07 Although Mexican Americans comprise the United States second largest minority group most studies have provided only a historical perspective on Chicano issues In contrast Toward a Chicano Social Science presents an interdisciplinary approach to the study of Mexican Americans incorporating race relations theory to analyze the sociohistorical conditions of Chicanos in contemporary society A special feature of the book is its focus on Chicanos and gender roles within Chicano life a topic often neglected in other texts Written at the undergraduate level Blea's text provides a thorough analysis of both theoretical and applied issues which will aid students and professors of Chicano ethnic and

women s studies sociology and social work **The Shape of Social Inequality** David Bills,2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller s many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller s programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification The SAGE Handbook of Survey Methodology Christof Wolf,Dominique Joye,Tom W Smith,Yang-chih Fu,2016-07-11 Survey Methodology is becoming a more structured field of research deserving of more and more academic attention The SAGE Handbook of Survey Methodology explores both the increasingly scientific endeavour of surveys and their growing complexity as different data collection modes and information sources are combined The handbook takes a global approach with a team of international experts looking at local and national specificities as well as problems of cross national comparative survey research The chapters are organized into seven major sections each of which represents a stage in the survey life cycle Surveys and Societies Planning a Survey Measurement Sampling Data Collection Preparing Data for Use Assessing and Improving Data Quality The SAGE Handbook of Survey Methodology is a landmark and essential tool for any scholar within the social sciences Anthropologists and the Rediscovery of America, 1886-1965 John S. Gilkeson,2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective
