

SOCIAL STRUCTURES

social structures in sociology are the relationships or interactions between groups of different people in a society.

IN SOCIOLOGICAL ANALYSIS

The analysis of social structures often occurs on three levels:

1. **Macro analysis** – looks at broad categories and systems like large populations and groups like entire countries or economic systems.
2. **Meso analysis** – studies communities or certain groups in a society.
3. **Micro analysis** – observes patterns and collects data from smaller groups like families, or individuals (DeCarlo, 2018).

EXAMPLES

- 1 Nations
- 2 Economies
- 3 Racial groups
- 4 Religions
- 5 Legal systems
- 6 Political parties

War in the Modern Great Power System Jack S. Levy, 2021-09-15 The apparently accelerating arms race between the United States and the Soviet Union and the precarious political conditions existing in many parts of the world

have given rise to new anxiety about the possibility of military confrontation between the superpowers. Despite the fateful nature of the risk, we have little knowledge as Jack S. Levy has pointed out of the conditions, processes, and events which might combine to generate such a calamity. No empirically confirmed theory of the causes of war exists, and the hypotheses often contradictory that have been proposed remain untested. As a step toward the formulation of a theory of the causes of war that can be tested against historical experience, Levy has developed a unique data base that will serve as an invaluable resource for students of international conflict in coming years. War in the Modern Great Power System provides a much needed perspective on the major wars of the past. In this thorough and systematic study, Levy carefully defines the Great Power concept and identifies the Great Powers and their international wars since the late fifteenth century. The resulting compilation of war data is unique because of its five-century span and its focus on a well-defined set of Great Powers. Turning to a quantitative analysis of the characteristics, patterns, and trends in war, Levy demonstrates that although wars between the Great Powers have become increasingly serious in every respect but duration over the last five hundred years, their frequency has diminished. He rejects the popular view that the twentieth century has been the most warlike on record and he demonstrates that it instead constitutes a return to the historical norm after the exceptionally peaceful nineteenth century. Applying his data to the question whether war is contagious, he finds that the likelihood of war is indeed highest when another war is under way but that this contagious effect disappears after the first war is over. Contrary to the popular war weariness theory, he finds no evidence that war generates an aversion to subsequent war. This study, extending the scientific analysis of war back over five centuries of international history, constitutes a major contribution to our knowledge of international conflict.

North Korean Nuclear Weapon And Reunification Of The Korean Peninsula Sung-wook Nam, 2019-10-30. This book explains the origin and historical development of North Korean nuclear weapons, dated from the aftermath of World War II. The story of North Korea's nuclear program began when the United States dropped atomic bombs over Hiroshima and Nagasaki in August 1945, which led to Japan's immediate defeat. Surprised by the speed of Japan's surrender, North Korea's founding leader Kim Il-sung vowed to secure nuclear capability to avoid suffering the fate of its eastern neighbor. Based on the author's extensive experience in the academia, government, and intelligence circles, the book traces how the nuclear program has evolved since and explores wide-ranging issues, including the positive function of nuclear weapons in Pyongyang's local politics, the history of negotiations between Washington and Pyongyang, the prospects of denuclearization in the Korean Peninsula, the diplomatic and military options presented to US President Donald Trump in dealing with the nuclear threat, and the future scenarios of the North Korean regime and the possibilities of a reunified Korea. With the nuclear weapon crisis likely to persist in the foreseeable time, is it feasible for South Korea to achieve reunification in the Korean Peninsula? Will the six-party members like the US, China, Russia, and Japan agree with reunification without denuclearization? Can the issues of nuclear weapons and unification be settled simultaneously in the future? The book seeks to

politics and where the meaning of the nation was highly contested this volume examines how narratives of origins religion territory and race produced by historians who were central figures in the cultural and intellectual histories of both countries interacted it also explores the similarities and differences between the interactions in these societies *Histories of Nationalism in Ireland and Germany* investigates whether we can speak of a particular common form of nationalism in Europe The book draws attention to cultural and intellectual links between the Irish and the Germans during this period and what this meant for how people in either society understood their national identity in a pivotal time for the development of the historical discipline in Europe Contributing to a growing body of research on the transnationality of nationalism this new study of a hitherto unexplored area will be of interest to historians of modern Germany and Ireland comparative and transnational historians and students and scholars of nationalism as well as those interested in the relationship between biography and writing history
