## **Social Work Administrative Practice In Health Care Settings:**

*Social Work Practice in Health Care Settings* Michael J. Holosko, Patricia A. Taylor, 1992 *Social Work Practice in Health Care Settings* is written by social work practitioners for colleagues in health care settings. It is aimed at teaching social workers how to survive in a rapidly changing health care system. The text emphasizes the role of the social worker in a variety of health care settings with a variety of unique patient disease groups. From community health centres to hospitals and from cancer patients to Alzheimer's victims, this book brings together for the first time the special expertise of social work in responding to various health care needs. One unique feature of this text is the emphasis on the potential for social work role development in each of the particular areas covered. With each article written in a standardized format, it is appropriate for both undergraduate and graduate courses in schools of social work as well as for social work practitioners in the field and allied health professionals.

*Social Work Administrative Practice in Health Care Settings* Patricia A. Taylor, Janet Devereux, 1991

*Social Work and Integrated Health Care* Victoria Stanhope, Shulamith Lala Ashenberg Straussner, 2017-09-27. With nearly 40% of social workers working in the health and behavioral health care sectors, *Social Work and Integrated Health Care* is designed to help social workers understand the policies that shape the current discussion regarding integrated primary care and behavioral health care and their application to practice. While the future of the Patient Protection and Affordable Care Act of 2010 (PPACA) is uncertain at this time, the potential for integrated health care to simultaneously improve health outcomes while reducing costs means that despite the constantly changing health policy landscape, the movement towards an integrated health care system will continue in the future. As these changes occur, there is a great need in the social work field for resources that will give both the context for these changes and translate the policies to day-to-day social work practice. This book provides essential information about the important shifts in the health care field with a focus on health care for vulnerable populations, with a special emphasis on adults with severe mental illnesses and substance abuse disorders. As the title indicates, the book provides a comprehensive discussion not only of critical policy issues but also their specific implications to evidence-based clinical practice. It covers such areas as background on public funding for health care, the development of behavioral health services in the community, and the passage of mental health parity legislation. The text also includes an overview of integrated health care settings and describes evidence practices that are central to integrated health care, such as screening, person-centered care, planning, motivational interviewing, and wellness self-management. It is a must-have text for all social work students in MSW programs.

**Advancing Social Work Practice in the Health Care Field** Gary Rosenberg, Helen Rehr, 2012-12-06. Commemorating the 75th anniversary of the Department of Social Work at the Mount Sinai Medical Center in New York City, this innovative and exciting book traces the growth of the social work mission and the development of vanguard social work programs at Mount Sinai. Leading social work educators and practitioners look at where the profession is today and speculate on where it

Best Practices for Social Work with Refugees and Immigrants Miriam Potocky,Mitra Naseh,2019-10-29

Social work practice with refugees and immigrants requires specialized knowledge of these populations and specialized adaptations and applications of mainstream services and interventions. Because they are often confronted with cultural, linguistic, political, and socioeconomic barriers, these groups are especially vulnerable to psychological problems such as anxiety, depression, alienation, grief, and post-traumatic stress disorder, as well as concerns arising from inadequate health care. Institutionalized discrimination and anti-immigrant policies and attitudes only exacerbate these challenges. The second edition of *Best Practices for Social Work with Refugees and Immigrants* offers an update to this comprehensive guide to social work with foreign-born clients and an evaluation of various helping strategies and their methodological strengths and weaknesses. Part 1 sets forth the context for evidence-based service approaches for such clients by describing the nature of these populations, relevant policies, designed to assist them, service delivery systems, and culturally competent practice. Part 2 addresses specific problem areas common to refugees and immigrants and evaluates a variety of assessment and intervention techniques in each area. Using a rigorous evidence-based and pancultural approach, Miriam Potocky and Mitra Naseh identify best practices at the macro, meso, and micro levels to meet the pressing needs of uprooted peoples. The new edition incorporates the latest research on contemporary social work practice with refugees and immigrants to provide a practical up-to-date resource for the multitude of issues and interventions for these populations.

**Handbook of Social Work in Health and Aging** Barbara Berkman, 2006-02-09. The *Handbook of Social Work in Health and Aging* is the first reference to combine the fields of health care, aging, and social work in a single authoritative volume. These areas are too often treated as discrete entities, while the reality is that all social workers deal with issues in health and aging on a daily basis, regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic, and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews, written by the most experienced and prominent gerontological, health care, and social work scholars in the United States and across the world, provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families, new models for intervention in both community-based practice and institutional care, and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.

**Social Workers' Desk Reference** Albert R. Roberts, 2009. This is a new edition of the wildly successful everyday reference for social workers. Like the first edition, it has been crafted with the help of an extensive needs assessment survey of educators and front-line practitioners, ensuring that it speaks directly to the daily realities of the profession. It features 40% new material and a more explicit focus on evidence-based practice.
