*Unanticipated Gains* Mario Luis Small, 2009-07-02 Social capital theorists have shown that some people do better than others in part because they enjoy larger more supportive or otherwise more useful networks But why do some people have better networks than others Unanticipated Gains argues that the practice and structure of the churches colleges firms gyms childcare centers and schools in which people happen to participate routinely matter more than their deliberate networking Exploring the experiences of New York City mothers whose children were enrolled in childcare centers this book examines why a great deal of these mothers after enrolling their children dramatically expanded both the size and usefulness of their personal networks Whether how and how much the mother s networks were altered and how useful these networks were depended on the apparently trivial but remarkably consequential practices and regulations of the centers The structure of parent teacher organizations the frequency of fieldtrips and the rules regarding drop off and pick up times all affected the mothers networks Relying on scores of in depth interviews with mothers quantitative data on both mothers and centers and detailed case studies of other routine organizations Small shows that how much people gain from their connections depends substantially on institutional conditions they often do not control and through everyday processes they may not even be aware of Emphasizing not the connections that people make but the context in which they are made Unanticipated Gains presents a major new perspective on social capital and on the mechanisms producing social inequality

They are also excellent facilitators of community capacity, a major component of effective social work practice. Social work practitioners have a vested interest in seeing such businesses grow not only among Latinos but all communities of color. Reviewing the latest research on formal and informal economies within urban communities of color, Melvin Delgado lays out the demographic foundations for a richer collaboration between theory and practice. Delgado deploys numerous case studies to cement the link between indigenous small businesses and community well being. Whether regulated or unregulated, these establishments hire from within and promote immigrant self employment. Latino small businesses often provide jobs for those whose criminal and mental health backgrounds intimidate conventional businesses. **Baby Boomers of Color** Melvin Delgado, 2014-11-18 Because researchers often treat baby boomers of color as belonging to one group quality data on the individual status of specific racial populations is lacking leading to insufficiently designed programs policies and services The absence of data is a testament to the invisibility of baby boomers of color in society and deeply affects the practice of social work and other helping professions that require culturally sensitive approaches Melvin Delgado rectifies this injustice by providing a comprehensive portrait of the status and unique assets of boomers of color Using specific data he grounds an understanding of boomers financial medical and emotional needs within a historical socioeconomic cultural and political context resulting in tailored recommendations for meeting the challenges of a growing population His research focuses on African American Hispanic Asian Pacific Islander and Native American older adults and addresses issues of financial security employment stability housing and health care which are often complicated by linguistic and cultural differences Rather than treat baby boomers of color as a financial burden on society and its resources Delgado recognizes their strengths and positive contributions to families and communities resulting in an affirming and empowering approach to service
