Social Evolution And Sociological Categories:

Social Evolution and Sociological Categories (Routledge Revivals) Paul Q. Hirst, 2010-01-21 First published in 1976 this book is concerned with the nature of classification in the social sciences Its thesis is that classifications are dependent upon and are derived from theoretical explanations Classification is not a theoretically neutral typification or ordering of social forms This is because objects classified societies social institutions are not given to knowledge independently of the categories which construct them and because the categories of classification are themselves the products of theories

Social Evolution and Sociological Categories Paul Q. Hirst, 1976 *Radical Issues in Criminology* Pat Carlen, Mike Collison, 1980-01-01 This collection of essays deals with central issues relating to the rule of law individual rights and the politics of penal reform The issues examined include juvenile justice criminal violence feminism and criminology civil liberties police powers justice in prisons and the necessity for social life to be regulated by law The emphasis throughout is upon specific concrete problems and the formulation of possible solutions In marked contrast to many radical criminologists who have fashioned utopian visions of a socialist society untroubled by problems of social regulation each contributor to this book focuses sharply upon tangible problems and workable alternatives By eschewing global theories of either crime or law and by avoiding generalized radical recipes for change these essays provide an important counter balance to recent libertarian anarchistic and utopian trends in modern criminology

Domination and Power Peter Miller, 2019-11-21 First published in 1987 Our understanding of the nature of power in western societies is currently undergoing a major reassessment The significance of this reassessment emerges forcefully through comparing the writings of the principal exponents of Critical Theory Max Horkheimer Herbert Marcuse and Jürgen Habermas with those of Michel Foucault Peter Miller suggests that these two traditions embody fundamentally distinct philosophical and sociological principles He grounds his analysis in the concepts of domination Critical Theory and power Foucault Miller identifies the notion of subjectivity as central to a differentiation of the respective approaches of Critical Theory and Foucault For Critical Theory it is the repression of subjectivity which provides the evidence of domination and the rationale for its critique while for Foucault subjectivity in western societies is fabricated through power and linked to the deployment of specific knowledges Miller shows that despite the achievements of Critical Theory in bringing to light the repressive nature of advanced industrial societies its thinking is inadequate as a basis for future analysis and critique He argues that Foucault's genealogy of the modern subject which highlights the role of the human sciences in its fabrication is a more fruitful basis for charting and investigating the mode of operation of contemporary forms of power The book includes a survey of all published works by Foucault up to the time of his death in 1984 and commentaries on the writings of Max Horkheimer Herbert Marcuse and Jürgen Habermas

Islam in the Modern World (RLE Politics of Islam) Denis MacEoin, Ahmed Al-Shahi, 2013-07-24 In recent years events in the Islamic world have captured the attention of the West to an unprecedented degree However much of the

media coverage of events like the Islamic revolution in Iran has merely reinforced current prejudices and misconceptions about Islam This collection of essays by specialists in a variety of disciplines gives an impressionistic overview of contemporary Islam Different areas of Islamic life are singled out for special attention these include the problem of relations between Islam and the West the role of the Sufi orders and the revival of religious fundamentalism Islam and the feminine Islamic economics and Islamic architecture Geographically the essays cover a wide area ranging over Sudan Turkey Iran Egypt and Saudi Arabia Each discussion should appeal to the layman and specialist alike and collectively they bring together a comprehensive range of material not often covered in one volume Above all they cut across the stereotypes of Islam found in the popular media to reveal facets of a complex living tradition often unsuspected in the West First published in 1983

Max Weber Alan Sica, 2017-09-08 The most profound and enduring social theorist of sociology's classical period Max Weber speaks as cogently to concerns of the new century as he did to those of the past In Max Weber and the New Century Alan Sica demonstrated Weber's preeminent position and lasting vitality within social theory by applying his ideas to a broad range of topics of contemporary concern Max Weber A Comprehensive Bibliography is a companion volume that offers some 4 600 bibliographic listings of work on Weber making it the most complete guide to the literature in English and a testament to the continued vitality of Weber's thought Sica's work supersedes all previous bibliographical efforts covering the Weber literature both in the quantity and accuracy of its references and the clarity and convenience of its format In order to demonstrate the enormous variety of Weberiana in English Sica has adopted a liberal criterion for inclusion rather than a critical one choosing to mix the best with what may be more routine work Following a preface in which previous bibliographies and bibliographic problems are discussed the volume opens with a series of five specialized bibliographies The first lists Weber's works in English translation The second lists reviews of Weber's major works including those translated into English while the third covers reviews of recent books and other work on Weber The fourth section contains a selection of dissertations and theses relating to Weber or his ideas The fifth includes primary and secondary sources treating Weber on rationality and rationalization processes The last and largest section offers a comprehensive Weber bibliography of works in English This large scale endeavor attempts to identify with accuracy and completeness the entire universe of Weber scholarship in English It will be an essential scholarly tool for sociologists historians economists and students of cultural and intellectual history

Dictionary of Visual Discourse Dr Barry Sandywell, 2012-10-01 This substantial and ambitious dictionary explores the languages and cultures of visual studies It provides the basis for understanding the foundations and motivations of current theoretical and academic discourse as well as the different forms of visual culture that have come to organize everyday life The book is firmly placed in the context of the visual turn in contemporary thought It has been designed as an interdisciplinary or transdisciplinary introduction to the vocabularies and grammars of visuality that inform thinking in the arts and humanities today It also offers insight into the philosophical frameworks which underpin the field of

visual culture A central theme that runs throughout the entries is the task of moving away from a narrow understanding of visuality inherited from traditional philosophy toward a richer cultural and multi sensorial philosophy of concrete experience The dictionary incorporates intertextual links that encourage readers to explore connections between major themes theories and key figures in the field In addition the author s introduction provides a comprehensive and critical introduction which documents the significance of the visual turn in contemporary theory and culture It is accompanied by an extensive bibliography and further reading list As both a substantive academic contribution to this growing field and a useful reference tool this book offers a theoretical introduction to the many languages of visual discourse It will be essential reading for graduate students and scholars in visual studies the sociology of visual culture cultural and media studies philosophy art history and theory design film and communication studies *Max Weber : critical assessments. 2,3* Peter Hamilton,1998

The Future of Post-Human Engineering Peter Baofu,2009-03-26 Why should mass media be informational and accurate as much as its proponents would claim and conversely disinformational and propagandistic as much as its critics would argue Contrary to the conventional wisdom held by many since the modern era of mass media neither of the two opposing views is correct to the extent that a total analysis of media influence has yet to be adequately explored and understood Something fundamentally vital to the analysis of communication has been missing This is not to say however that the literature on media studies hitherto existing in history has been much ado about nothing on the contrary indeed much can be learned from different theoretical approaches in the field But the important point to remember here is that this book aims to show an alternative better way to understand the nature of mass media which goes beyond both the pros and cons in the literature on media influence while learning from them all If true this seminal view will alter the way of how mass media are to be understood with its enormous theoretical implications for going beyond the existing paradigms on the future of communication in a small sense and for predicting the future of open and closed societies in a large sense
