Louise Brigham and the Early History of Sustainable Furniture Design Antoinette LaFarge, 2019-10-24 During the Progressive Era a time when the field of design was dominated almost entirely by men a largely forgotten activist and teacher named Louise Brigham became a pioneer of sustainable furniture design With her ingenious system for building inexpensive but sturdy box furniture out of recycled materials she aimed to bring good design to the urban working class As Antoinette LaFarge shows Brigham forged a singular career for herself that embraced working in the American and European settlement movements publishing a book of box furniture designs running carpentry workshops in New York and founding a company that offered some of the earliest ready to assemble furniture in the United States Her work was a resounding critique of capitalism s waste and an assertion of new values in design values that stand at the heart of today s open and green design movements **Faulkner and Material Culture** Joseph R. Other essays in the volume include Kevin Railey's on the consumer goods that appear in *Flags in the Dust*. Miles Orvell discusses the Confederate Soldier monuments installed in small towns throughout the South and how such monuments enter Faulkner's work. Katherine Henninger analyzes Faulkner's fictional representation of photographs and the function of photography within his fiction, particularly in *The Sound and the Fury*. Oats, 2021-07-20 An Illustrated Guide to Furniture History provides upper level students and instructors with an alternative visual analytical approach to learning about furniture history from Antiquity to Postmodernism. Following an immersive teaching model, it presents a Nine Step Methodology to help students strengthen their visual literacy and quickly acquire subject area knowledge. Moving chronologically through key periods in furniture history and interior design such as the Renaissance, the Arts and Crafts Movement, and Modernism, it traverses Europe to America to present a comprehensive foundational guide to the history of furniture design. Part I addresses furniture within the context of the built environment with chapters exploring the historical perspective, construction principles, and the categorization of furniture. In Part II, the author visually depicts the structural organization of the methodological process, a three category framework: History, Aesthetics, and Visual Notes. The chapters in this part prepare the reader for the visual analysis that will occur in the final section of the book. The book is lavishly illustrated in full color with over 300 images to reinforce visual learning and notation. A must have reference and study guide for students in industrial and product design, interior design, and architecture. **Interactive Artifacts and Furniture Supporting Collaborative Work and Learning** Pierre Dillenbourg, Jeffrey Huang, Mauro Cherubini, 2008-12-25 The field of Computer Supported Collaborative Learning (CSCL) has traditionally focused on virtual learning environments and has somewhat neglected the physical environments in which students interact with each other and with their teachers. However, over the last years, scholars have devoted growing attention to the interplay between digital and physical environments. *Interactive Artifacts and Furniture Supporting Collaborative Work and Learning* reveals how these advances in computer science and human computer interaction impact CSCL environments. The underlying theme of the contributions is the social affordances of physical objects, i.e., the understanding of how technology augmented physical objects support interactions among groups in a way more intuitive or natural than traditional computers. This collection of leading researchers investigates how artifacts may trigger rich interactions among groups, which is a central quest for researchers in CSCL. *Interactive Artifacts and Furniture Supporting Collaborative Work and Learning* illustrates a turn in the field of CSCL and emphasizes an important message for a generation of CSCL designers and researchers. *Consumption and the World of Goods* John Brewer, Roy Porter, 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is, relatively speaking,

a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services

Eighteenth-Century Furniture Clive Edwards,1996 The eighteenth century has been seen as a Golden Age of design and craftsmanship This book goes well beyond these ideas and investigates the various developments in the infrastructure of the eighteenth century furniture world

Wild Things Judy Attfield,2020-08-20 What do things mean What does the life of everyday objects

reveal about people and their material worlds Has the quest for the real thing become so important because the high tech world of total virtuality threatens to engulf us This pioneering book bridges design theory and anthropology to offer a new and challenging way of understanding the changing meanings of contemporary human object relations The act of consumption is only the starting point of object s lives Thereafter they are transformed and invested with new meanings and associations that reflect and assert who we are Defining designed things as things with attitude differentiates the highly visible fashionable object from ordinary aretefacts that are too easily taken for granted Through case studies ranging from reproduction furniture to fashion and textiles to clutter the author traces the connection between objects and authenticity ephemerality and self identity Beyond this she shows the materiality of the everyday in terms of space time and the body and suggests a transition with the passing of time from embodiment to disembodiment
