Social Lives Of Medicines:

Social Lives of Medicines Susan Reynolds Whyte, Sjaak van der Geest, Anita Hardon, 2002 Medicines are the core of treatment in biomedicine as in many other medical traditions As material things they have social as well as pharmacological lives with people and between people They are tokens of healing and hope as well as valuable commodities Each chapter of this book shows drugs in the hands of particular actors mothers in Manila villagers in Burkina Faso women in the Netherlands consumers in London market traders in Cameroon pharmacists in Mexico injectionists in Uganda doctors in Sri Lanka industrialists in India and policymakers in Geneva Each example is used to explore a different problem in the study of medicines such as social efficacy experiences of control skepticism and cultural politics commodification of health the attraction of technology and the marketing of images and values The book shows how anthropologists deal with the sociality of medicines through their ethnography their theorizing and their uses of knowledge *Extraordinary Conditions* Janis H. Jenkins, 2015-09-15 With a fine tuned ethnographic sensibility Janis H Jenkins explores the lived experience of psychosis trauma and depression among people of diverse cultural orientations revealing how mental illness engages fundamental human processes of self desire gender identity attachment and interpretation *Extraordinary Conditions* illuminates the cultural shaping of extreme psychological suffering and the social rendering of the mentally ill as nonhuman or not fully human Jenkins contends that mental illness is better characterized in terms of struggle than symptoms and that culture is central to all aspects of mental illness from onset to recovery Her analysis refashions the boundaries between the ordinary and the extraordinary the routine and the extreme and the healthy and the pathological This book asserts that the study of mental illness is indispensable to the anthropological understanding of culture and experience and reciprocally that understanding culture and experience is critical to the study of mental illness **Understanding Drugs Markets** Carine Baxerres, Maurice Cassier, 2021-07-27 Drawing on anthropology historical sociology and social epidemiology this multidisciplinary book investigates how pharmaceuticals are produced distributed prescribed and consumed and regulated in order to construct a comprehensive understanding of the issues that drive medicine pharmaceutical markets in the Global South today Based on primary research conducted in Benin and Ghana and additional data collected in Cambodia and the Ivory Coast this volume uses artemisinin based combination therapies ACTs against malaria as a central case study It highlights the influence of the countries colonial and post colonial history on their models for state regulation production and distribution explores the determining role transnational actors as well as industries from the North but also and increasingly from the South play in influencing local pharmaceutical markets and looks at the behaviour of health care professionals and individuals Stepping back the authors then unpick the pharmaceuticalization process and the multiple regulations at stake by looking at the workings of and linkages between biomedical health pharmaceutical systems representatives of companies industries actors in private distribution and consumer practices Providing a thorough comparative analysis of the advantages

and disadvantages of different pharmaceutical systems it is an important contribution to the literature on pharmaceuticalization and the governance of medication It is of interest to students researchers and policy makers interested in medical anthropology the sociology of health and illness global health healthcare management and pharmacy The Open Access version of this book available at <http://www.taylorfrancis.com/books/9780429329517> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Complementary Medicine in Australia and New Zealand Hans Baer, 2015-07-17 In the late nineteenth century on the eve of the formation of Australia as a nation state in 1902 the Australian medical system could be best described as a pluralistic one in the sense that while regular medicine constituted the predominant medical system it was not clearly the dominant one in that regular physicians faced competition from a wide array of alternative practitioners As regular medicine increasingly assumed the guise of being scientific it evolved into biomedicine and developed a link with corporate and state interests in the early twentieth century in Australia as in other capitalist developed societies Relying upon state support Australian biomedicine has achieved dominance over alternative medical system such as homeopathy herbal medicine osteopathy chiropractic and naturopathy Various social forces particularly the development of the holistic health movement have served to challenge biomedical dominance in Australia like elsewhere What started out as a popular health movement in the early 1970s has evolved into the professionalized entity that is generally referred to as complementary medicine in Australia as opposed to complementary and alternative medicine in the US and UK Complementary medicine in Australia encompasses many medical systems and therapies Since the 1980s certain heterodox medical systems particularly chiropractic osteopathy acupuncture and Chinese medicine naturopathy Western herbalism and homeopathy have achieved considerable recognition from the Australian state either at the federal level or at the state and territorial levels Indeed the Australian state appears to have gone further than any other Anglophone country in terms of providing public funding for complementary medicine education Conversely it has committed a limited amount of funding for complementary medicine research compared to the United States

Crossing Colonial Histories Anne Digby, Projit B. Mukharji, 2010-04-16 This book offers an innovative engagement with the diverse histories of colonial and indigenous medicines Engagement with different kinds of colonialism and varied indigenous socio political cultures has led to a wide range of approaches and increasingly distinct traditions of historical writing about colonial and indigenous modes of healing have emerged in the various regions formerly ruled by different colonial powers The volume offers a much needed opportunity to explore new conceptual perspectives and encourages critical reflection on how scholars research specialisms have influenced their approaches to the history of medicine and healing The book includes contributions on different geographical regions in Asia Africa and the Americas and within the varied contexts of Chinese Spanish Portuguese German Dutch and British colonialisms It deals with issues such as internal colonialism the plural history of objects transregional circulation and entanglement and the historicisation of medical historiography The chapters in the

volume explore the scope for conceptual interaction between authors from diverse disciplines and different regions highlighting the synergies and thematic commonalities as well as differences and divergences **Curing Lives** Makoto Nishi,2023-04-26 This is a book about life during the HIV epidemic in Ethiopia and seeks to understand how and why the global effort to achieve universal HIV treatment has shifted away from its initial focus on the excessive human suffering precipitated by the epidemic When antiretroviral drugs became available in Ethiopia they emerged as powerful agents of change not only did they cure individuals they also helped people overcome their fear of and break the silence around AIDS while healing the social ruptures caused by the epidemic Nevertheless as this book argues the very same agents have silently reversed these changes over the course of the past decade These reversals have dissolved connections re incurred invisible social fissures and allowed a large majority of people to stay indifferent to the suffering of individuals whose lives remain vulnerable under the current treatment regime This whole process is a product of neoliberal global health interventions that determine which lives are worthy or unworthy of investment This book will interest scholars of biopolitics and public health those who study the developing world and those interested in how pandemic interventions alter the lives of many

Integrating East Asian Medicine into Contemporary Healthcare E-Book Volker Scheid,Hugh MacPherson,2011-10-24 Traditional East Asian healthcare systems have moved rapidly from the fringes of healthcare systems in the West towards the centre over the past 50 years This change of status for traditional medicines presents their practitioners with both opportunities and challenges as the focus shifts from one of opposition towards one of integration into biomedically dominated healthcare systems Integrating East Asian Medicine into Contemporary Healthcare examines the opportunities and challenges of integrating East Asian medicine into Western healthcare systems from an interdisciplinary perspective Volker Scheid and Hugh MacPherson bring together contributions from acknowledged experts from a number of different disciplines including clinical researchers Chinese Medicine practitioners historians medical anthropologists experts in the social studies of science technology and medicine to examine and debate the impact of the evidence based medicine movement on the ongoing modernization of East Asian medicines The book considers the following questions What are the values goals and ethics implicit within traditional East Asian medical practices What claims to effectiveness and safety are made by East Asian medical practices What is at stake in subjecting these medical practices to biomedical models of evaluation What constitutes best practice How is it to be defined and measured What are the ideologies and politics behind the process of integration of East Asian medical practices into modern health care systems What can we learn from a variety of models of integration into contemporary healthcare On Knowing and Not Knowing in the Anthropology of Medicine Roland Littlewood,2016-07-01 Social scientific studies of medicine typically assume that systems of medical knowledge are uniform and consistent But while anthropologists have long rejected the notion that cultures are discrete bounded and rule drive entities medical anthropology has been slower to develop alternative approaches to understanding cultures of health

This provocative volume considers the theoretical methodological and ethnographic implications of the fact that medical knowledge is frequently dynamic incoherent and contradictory and that our understanding of it is necessarily incomplete and partial In diverse settings from indigenous cultures to Western medical industries contributors consider such issues as how to define the boundaries of medical knowledge versus other kinds of knowledge how to understand overlapping and shifting medical discourses the medical profession's need for anthropologists to produce explanatory models the limits of the Western scientific method and the potential for methodological pluralism constraints on fieldwork including violence and structural factors limiting access and the subjectivity and interests of the researcher On Knowing and Not Knowing in the Anthropology of Medicine will stimulate innovative thinking and productive debate for practitioners researchers and students in the social science of health and medicine

Global Pharmaceuticals Adriana Petryna, Arthur Kleinman, Andrew Lakoff, 2006-03-15 Anthropological study of the globalization of pharmaceuticals and its effects on local cultures health and economics

Medicine, mobility and the empire Markku Hokkanen, 2017-11-02 David Livingstone's Zambesi expedition marked the beginning of an ongoing series of medical exchanges between the British and Malawians This book explores these entangled histories by placing medicine in the frameworks of mobilities and networks that extended across Southern Africa and beyond It provides a new approach to the study of medicine and empire Drawing on a range of written and oral sources the book argues that mobility was a crucial aspect of intertwined medical cultures that shared a search for therapy in changing conditions Mobile individuals ideas and materials played key roles in medical networks that involved both professionals and laypeople These networks connected colonial medicine with Protestant Christianity and migrant labour The book will be of value to scholars and students of history and anthropology of colonialism and medicine as well as a wider readership interested in the plural search for health in Africa and globally

Generalism in Clinical Practice and Education Sophie Park, Kay Leedham-Green, 2024-07-29 Generalism is a key approach to healthcare organisation and delivery that enables person centred dynamic and cost effective patient care With its emphasis on adaptability generalism requires expansive nurturing and personalised approaches to clinical education in which a generalist attends to and explores patient priorities when problem setting and co creating management plans Generalism in Clinical Practice and Education outlines a generalist philosophy of practice which is brought to life through interleaved examples Written by a range of international clinicians patients and academics this book does not prescribe one right way to do generalism Rather it seeks to inspire readers future engagement with generalism in practice and learning through sharing underpinning concepts values and principles This big picture attention to generalism across public health social determinants of health and clinical care is at the heart of sustainable and efficient use of resources to prioritise those in need The book explores four key principles which in practice aim to achieve creative inclusive and agile approaches to clinical care The goal is to support generalism in clinical practice and education and to produce clinical practitioners and learners that enjoy embrace and enhance future

clinical care Household Medicine in Seventeenth-Century England Anne Stobart, 2016-09-08 How did 17th century families in England perceive their health care needs What household resources were available for medical self help To what extent did households make up remedies based on medicinal recipes Drawing on previously unpublished household papers ranging from recipes to accounts and letters this original account shows how health and illness were managed on a day to day basis in a variety of 17th century households It reveals the extent of self help used by families explores their favourite remedies and analyses differences in approaches to medical matters Anne Stobart illuminates cultures of health care amongst women and men showing how kitchen physick related to the business of medicine which became increasingly commercial and professional in the 18th century **On Moral Medicine** M. Therese Lysaught, Joseph Kotva, Stephen E. Lammers, 2012-07-20 In print for more than two decades *On Moral Medicine* remains the definitive anthology for Christian theological reflection on medical ethics This third edition updates and expands the earlier awardwinning volumes providing classrooms and individuals alike with one of the finest available resources for ethics engaged modern medicine *Plastic Bodies* Emilia Sanabria, 2016-04-21 In *Plastic Bodies* Emilia Sanabria examines how sex hormones are enrolled to create mold and discipline social relations and subjectivities She shows how hormones have become central to contemporary understandings of the body class gender sex personhood modernity and Brazilian national identity Through interviews with women and doctors observations in clinics research centers and pharmacies and analyses of contraceptive marketing Sanabria traces the genealogy of menstrual suppression from its use in population control strategies in the global South to its remarketing as a practice of pharmaceutical self enhancement couched in neoliberal notions of choice She links the widespread practice of menstrual suppression and other related elective medical interventions to Bahian views of the body as a malleable object that requires constant work Given this bodily plasticity and its potentially limitless character the book considers ways to assess the values attributed to bodily interventions *Plastic Bodies* will be of interest to all those working in medical anthropology gender studies and sexual and reproductive health *Risky Medicine* Robert Aronowitz, 2015-09-16 A thoughtful and compelling book that focuses attention on the extent to which risk avoidance characterizes modern medicine Rick Mathis *Health Affairs* Will ever more sensitive screening tests for cancer lead to longer better lives Will anticipating and trying to prevent the future complications of chronic disease lead to better health Not always says Robert Aronowitz in *Risky Medicine* In fact it often is hurting us Exploring the transformation of health care over the last several decades that has led doctors to become more attentive to treating risk than treating symptoms or curing disease Aronowitz shows how many aspects of the health system and clinical practice are now aimed at risk reduction and risk control He argues that this transformation has been driven in part by the pharmaceutical industry which benefits by promoting its products to the larger percentage of the population at risk for a particular illness rather than the smaller percentage who are actually affected by it Meanwhile for those suffering from chronic illness the experience of risk and disease has been conflated by medical

practitioners who focus on anticipatory treatment as much if not more than on relieving suffering caused by disease Drawing on such controversial examples as HPV vaccines cancer screening programs and the cancer survivorship movement Aronowitz argues that patients and their doctors have come to believe perilously that far too many medical interventions are worthwhile because they promise to control our fears and reduce uncertainty Risky Medicine is a timely call for a rebalancing of health care to restore an emphasis on the actual curing of and caring for people suffering from disease

Silent Violence Vinay R. Kamat, 2013-12-05 *Silent Violence* engages the harsh reality of malaria and its effects on marginalized communities in Tanzania Vinay R Kamat presents an ethnographic analysis of the shifting global discourses and practices surrounding malaria control and their impact on the people of Tanzania especially mothers of children sickened by malaria Malaria control according to Kamat has become increasingly medicalized a trend that overemphasizes biomedical and pharmaceutical interventions while neglecting the social political and economic conditions he maintains are central to Africa's malaria problem Kamat offers recent findings on global health governance neoliberal economic and health policies and their impact on local communities Seeking to link wider social economic and political forces to local experiences of sickness and suffering Kamat analyzes the lived experiences and practices of people most seriously affected by malaria infants and children The persistence of childhood malaria is a form of structural violence he contends and the resultant social suffering in poor communities is closely tied to social inequalities *Silent Violence* illustrates the evolving nature of local responses to the global discourse on malaria control It advocates for the close study of disease treatment in poor communities as an integral component of global health funding This ethnography combines a decade of fieldwork with critical review and a rare anthropological perspective on the limitations of the bureaucratic technological institutional medical and political practices that currently determine malaria interventions in Africa **The Pharmaceutical Studies**

Reader Sergio Sismondo, Jeremy A. Greene, 2015-03-02 *The Pharmaceutical Studies Reader* is an engaging survey of the field that brings together provocative multi disciplinary scholarship examining the interplay of medical science clinical practice consumerism and the healthcare marketplace Draws on anthropological historical and sociological approaches to explore the social life of pharmaceuticals with special emphasis on their production circulation and consumption Covers topics such as the role of drugs in shaping taxonomies of disease the evolution of prescribing habits ethical dimensions of pharmaceuticals clinical trials and drug research and marketing in the age of globalization Offers a compelling contextually rich treatment of the topic that exposes readers to a variety of approaches ideas and frameworks Provides an accessible introduction for readers with no previous background in this area *Southern Medicine for Southern People* Laurence Monnais, C. Michele Thompson, Ayo Wahlberg, 2011-11-15 What is a national medicine What does it mean for a medicine to be traditional and scientific at the same time How could a specifically Vietnamese medicine emerge out of the medical practices and treatments that have flourished and waned during key socio cultural encounters in Vietnam This book answers these questions by

examining the making of Vietnamese medicine from a historical and contemporary perspective Ever since its fourteenth century emergence out of the traditions and practices of the much more globally celebrated Chinese medicine Vietnamese medicine has been engaged in a constant effort to define guard and more recently revive itself In this collection of empirically rich chapters international scholars specialising in history sociology anthropology and medicine show how this process has played out through very much ongoing North South and West East encounters Vietnamese medicine is practiced produced and consumed in contexts of medical pluralism and globalisation not only within Vietnam but increasingly also among the Vietnamese diaspora around the world Its development and modernisation cannot be detached from Vietnam s tumultuous and tragic quest for independence The compass points that saturate every chapter in this volume suggest that the making of Vietnamese medicine has been as much related to post colonial national identity formation as it has to national efforts to address the health problems of the Vietnamese people

The Loss of Male Sexual Desire in Ancient Mesopotamia Gioele Zisa, 2021-11-22 After more than fifty years since the last publication the cuneiform texts relating to the treatment of the loss of male sexual desire and vigor in Mesopotamia are collected in this volume The aim of the book is to present Mesopotamian medical tradition regarding the so called n libbi therapies zi ga in Sumerian n libbi in Akkadian lit raising of the heart is the expression used to indicate a group of texts intended to recover the male sexual desire This medical tradition is preserved from the Middle Babylonian period to the Achaemenid one This broad range testifies to the importance of the transmission of this material throughout Mesopotamian history The book provides the edition of this textual corpus and analyzes it in the light of new knowledge on ancient Near Eastern medicine Moreover this volume aims to show how theories and methodologies of Cultural Anthropology Ethnopsychiatry and Gender Studies are useful for understanding the Mesopotamian medical system This edition is an important tool for understanding Mesopotamian medical knowledge for Assyriologist however since the texts have been translated and discussed using the anthropological and gender perspectives they are accessible also to scholars of other research fields such as History of Medicine Sexuality and Gender
