Peasants'

Movements in Post-Colonial India Debal K Singharoy,2004-05-25 This is an investigation of the anatomy and internal dynamics of peasant movements in India It makes a comparative analysis of the Tebhaga Bengal 1946 47 Telengana Andhra 1948 52 and Naxalite North Bengal 1967 71 movements to study the ways in which grassroots mobilizations transform and institutionalize themselves forge new collective identities and articulate new strategies for survival and resistance The author uses empirical data and secondary research to argue that radicalism in peasant movements is in inverse proportion to institutionalization As spontaneous expressions of discontent against oppression and marginalization become institutionalized movements the space for radical challenge shrinks Therefore in Bengal the co option of the peasant movement by the ruling communist party and the state has largely killed the scope for radical action In Andhra Pradesh on the other hand the relative independence of the grassroots mobilization process along with logistic and ideological inputs from NGOs and radical social and Naxalite groups has allowed the peasantry to exercise multiple options for collective action However in both cases the grassroots mobilization has led to a transformation of the social identity of the peasant and created a social environment in which issues of dominance and resistance have an important place The study of the Indian experience is placed in the context of theories of peasant identity and resistance to oppression The first chapter of the book is devoted to the summing up of sociological perspectives on peasant societies identities and movements It includes references to the

works of Marx and Lenin Redfield Chayanov Wolf and Gramsci and in the Indian context Beteille Byres and several others The book reexamines problems that have got relatively less importance in recent years It seeks to understand issues that are of enduring relevance in the Indian countryside that continues to simmer with unrest even as it comes to grips with a new economic situation The book will be of as much interest to researchers and policymakers as to the intelligent general reader

New media and development of gender roles law social and economic perspective This theme was raised as an effort to observe the development of new technology that has greatly affected people s lives Formerly to seek information people can get it through conventional radio media newspapers and television But now only use the smartphone we can get very much information that can be obtained by accessing the online media portal or sharing and socializing through social media For decades it has been stated that the media has the power to shape public opinion Media not only can form a worldview of society but also able to create awareness and individual belief in reality a reality that has been defined by the media Media has a powerful and direct effect to the audience market Including how then the media

formed an opinion in the community about gender roles through the content provided by the new media Of course it will be interesting to study media related to the law social and economic perspective The Rural Richard Munton,2017-05-15 The rural has long been regarded as an important site of geographical inquiry even if our understanding of it has not always been treated as conceptually different from the urban That said rural research has pursued a number of distinct empirical agendas ranging from the operation and impacts of agribusiness to local resistance to global food supply chains to differing representations of the rural In doing so rural geographers have critically examined the relevance and significance of ideas drawn from numerous traditions including political economy ecological modernization and cultural theory amending them as appropriate in their search to understand the nature and trajectory of rural areas Up until the 1980s attention remained largely focused upon agriculture as the primary land use but increasingly new forms of rural consumption housing recreation nature conservation have taken centre stage as the primacy of local agricultures has been undermined by reduced state protection and new rural populations which have migrated out from the city More recently research has been dominated by the cultural turn with particular emphases upon society nature relations interpretations of landscape marginalised others and analyses of the relations between representation and practice In the last decade a more holistic view of the rural bringing together different aspects of the two previous themes has emerged through more politically oriented studies of rural governance concerned with the functioning of interest groups participation protest and the allocation and management of resources The volume is thus structured into three sections concerned with agriculture and food the rural and rural governance The great majority of the selected papers combine both empirical material often highly informative case studies and important conceptual arguments about change in the rural condition that can be linked to ideas being employed elsewhere in Geography and the Social Sciences more generally These critical reflections have been drawn very largely from research conducted in advanced economies which at least provide some commonality of experience allowing the transfer of ideas between what otherwise might be seen as very differing geographical contexts **The University as a Site of**

J.C.Johari,2006 **Neoliberalism, Social Exclusion, and Social Movements** , Donna L. Chollett,2013-10-10

Neoliberalism Social Exclusion and Social Movements critically examines struggles for social justice in an era of neoliberal globalization Chollett perceptively elucidates the intertwining of debt restructuring the debacle of privatization NAFTA

generated distortions in the sugar market and social and economic exclusion of Mexican sugarcane growers and mill workers. The enclosure of community commons is but one of the devastating impacts of neoliberal policies that generated social movements across Latin America and beyond. Closure of one of Michoacán Mexico's five sugar mills following privatization brought unemployment and economic havoc to the region. This region is unique in that it is the only locality where a social movement repossessed the closed sugar refinery and created a cooperative worker-run workplace. The book offers a historically contextualized, globally situated and ethnographically grounded analysis of the social movement as sugarcane growers and mill workers challenged the end to their way of life as they knew it. It takes the reader into the very real lives of movement participants, their aspirations, struggles and accommodations. Chollett skillfully peels back the layers of this social movement as activists sought to remake their own history but under circumstances that did not in the end ensure social justice. The author demonstrates empathy for collective struggles confronting the ravages of neoliberal globalization yet explodes the myth that intuitively exalts social movements as morally noble forces for democratization and solidarity. She offers a critical perspective on the internal factions and lack of democratization of a social movement gone awry and presents a sorely needed critique of social movement theory. While focusing on a particular social movement, this book carries wide applicability for all social movements concerned with social justice in an era of enduring neoliberalism. It is essential reading for students, academics, activists and policy makers concerned with global inequalities.

Negotiating Marginality Mahana Rajakishor, 2019-03-01. Providing a critical ethnography of five different tribal movements fighting against the mega industrialization projects in Odisha, India, the book presents a thick description of the confrontation of the tribals to the authoritative forces of state domination. This confrontation, a counter-hegemonic discourse, is neither antagonistic to change nor anti to development but rather, in fact, the author argues that the tribals are the subaltern citizens who aspire for not only more material and economic prosperity but also freedom from domination and deprivation. The book therefore seeks to answer one important question: how do the tribals appropriate marginality in their everyday lives in challenging domination and celebrating their desires, wishes, anticipations and material prosperity as well as in coping with the ruins of

frustration and suffering Drawing on long term ethnographic fieldwork carried over a decade 2006 16 this book provides empirical evidences and conceptual explorations on the resistance of subaltern citizens against domination The author challenges current theories of social movements which claim that a cultural critique of the development paradigm is writ large in the political actions of those marginalized by development tribals who lived in harmony with nature combining reverence for nature with the sustainable management of resources On the other hand questioning the established notion of marginality as a problem the author re visits marginality as a possible site that nourishes the capacity of the tribals to resist and to imagine and create a new world The complexity of tribal politics then cannot be reduced to an opposition between development and resistance The book therefore persuades us to re examine the politics of representation within the ideology of progressive movements Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka
