Announcements for the following year included in some vols The Connecting Leader Zahira Jaser,2021-01-01 Previous books of the Leadership Horizon Series showed unequivocally how both leaders and followers play an equally important part in the co production of leadership outcomes and how leader and follower identities are fluid so that the same individual can enact both at different times This book stretches the notion of leadership a step further by exploring the co enactment of both roles identities and positions of leader and follower by one same individual This individual is defined as a connecting leader as in this co enactment he she functions as connector between different leadership relationships The concept of connecting leader emerges from the observation that most individuals in organizations engage in the leader follower role co enactment managers pulled between executives and reportees CEOs between the board and the head of departments or employees involved in cross functional teams leading and following in different degrees subject to their expertise Yet despite its pervasiveness this concept is at best under theorized by the literature which dominated by dyadic and romanticized views mostly presents the roles as enacted by separate individuals facing each other To advance our understanding of connecting leaders the editor proposes to shift our focus on leadership in three ways to unpack the interconnectedness and interplay of leader and follower identities to investigate the tensions arising from the co enactment and how these can be overcome to widen the way in which we study leadership through new configurations e g leadership triads and ontologies and finally to consider the similarities between leading and following The book chapters are organized to mirror these areas of exploration Understanding leadership from a perspective that acknowledges that many individuals in organizations are not just leaders or followers but both democratizes the way we theorize leadership and moves us further away from the temptation to romanticize it Social Psychology Randal W. extend there are reasons to revitalize it Today themes such as innovation co creation and knowledge sharing seem to have become preferred and referred to as theoretical fields as well as fields of practice In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements learning mechanisms and learning strategies Hence the aim of this book is to both advance and recapture our knowledge of learning in today s increasingly complex world of work and organizing The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation co creation knowledge sharing or other currently widespread fields of practice
