Social Stratification and Occupations A. Stewart, K. Prandy, R. M. Blackburn, 1980-11-20 **Social Stratification and Occupations** Andrew Stewart, Kenneth Prandy, Robert Martin Blackburn, 1980-01-01 **Social Inequalities and Occupational Stratification** Paul Lambert, Dave Griffiths, 2018-04-18 This book explores how structures of social inequality are linked to the social connections that people hold The authors focus upon occupational inequalities where they see for example that the typical friendship patterns of people from one occupation are often very different to those of people from another Social Inequalities and Occupational Stratification leverages empirical data about differences in social connections to chart structures of social distance and social inequality Several of its chapters provide coverage of the long standing Cambridge Social Interaction and Stratification scale CAMSIS project and its approach to analysing social interaction patterns in terms of a single dimension related to social inequality *Occupation and Social Stratification* Paul K. Hatt, 196?

Network Persistence and the Axis of Hierarchy Steven Rytina, 2020-04-30 Network Persistence and the Axis of Hierarchy shows how networks modestly redefined as a strong yet imperfect tendency for pairings to recur day after day that is stickiness imply a singular axis of stratification This is contrary to the nearly universal insistence that stratification is multidimensional Reanalysis of three central mobility data sets sustains the novel claim Network concepts provide a supple base for analysis whereby order and regularity are strongly sustained in network neighborhoods but are not necessarily uniform or universal This provides new takes often quite radical on accounts of structure and order by authors such as Pierre Bourdieu Randall Collins and Talcott Parsons **Critical and Feminist Perspectives on Financial and Economic Crises** Sakiko Fukuda-Parr, James Heintz, Stephanie Seguino, 2017-10-02 Economic and financial crises have become perennial features of today's global economy Macroeconomic theories of crisis including the global crisis that unfolded in 2008 emphasize the role of financial deregulation capital flow imbalances and growing debt fueled by income and wealth inequality These approaches tend to be divorced from feminist thinking which analyzes broader distributional dynamics transmitted through structural channels and government policy responses with an emphasis on gender race class and ethnicity This volume brings together innovative thinking from heterodox macroeconomists and feminist economists to explore the causes consequences and ramifications of economic crises By doing so it highlights aspects of the economy that are frequently overlooked or ignored such as the impact of crises on the vast amount of unpaid work which women perform relative to men The collection of international studies assembled here takes an innovative approach to analyzing a range of issues from the subprime mortgage crisis to the gendered effects of austerity to the role of the International Monetary Fund in governing an unstable global economy In so doing it looks beyond causes and consequences and points to new directions for macroeconomic and financial policy This book was originally published as a special issue of Feminist Economics
