Social Trust Toward A Cosmopolitan Society:

Social Trust Timothy Earle, George Cvetkovich, 1995-07-24 This work examines the basic social psychological problems that generate the need for social trust and other acculturation strategies Social trust is examined within the context of competing social problem solving tools The authors analyze the problem of how social trust can be encouraged within a cultural context that favors other socialization strategies particularly distrust They look at the relation between social trust and risk communication specifically how social trust might be used to transform public participation from an ineffective formalist show into a creative community building problem solving process The work distinguishes between two forms of social trust pertinent to our world today pluralistic which occurs within groups and is based on existing values and cosmopolitan which is an across group phenomenon and is based on emerging values Earle and Cvetkovich's study is the story of gradual movement from pluralistic to cosmopolitan social trust

the volume discusses heuristic schemes that can give structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work
