C. D. Clark, 2019-01-07 People from the British and Irish Isles have for centuries migrated to all corners of the globe Wherever they went the English Irish Scots Welsh and even sub national supra regional groups like the Cornish co mingled blended and blurred Yet while they gradually integrated into new lives in far flung places British and Irish Isle emigrants often maintained elements of their distinctive national cultures which is an important foundation of diasporas Within this wider context this volume seeks to explore the nature and characteristics of the British and Irish diasporas stressing their varying

origins and evolution the developing attachments to them and the differences in each nation's recognition of their own diaspora The volume thus offers the first integrated study of the formation of diasporas from the islands of Ireland and Britain with a particular view to scrutinizing the similarities differences tensions and possibilities of this approach **Faith, Hope and Charity** Andy Wood,2020-10-22 Explores the hidden lives of neighbourhoods in early modern England their communal ideals social practices notions of gender locality and belonging **Participating in the Knowledge Society** R. Finnegan,2005-09-27 In current debates about the knowledge society and the organization of research the spotlight is most often on the universities This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the academy from seventeenth century north country astronomers to Victorian naturalists to today's think tanks community historians and new forms of researching and publishing through the internet These intriguing cases raise challenging issues about the location definition and validation of research about active participation in knowledge generation and about the perhaps changing boundaries of university today

Rethinking the Great Transition Peter L. Larson,2022 This case study of two rural parishes in County Durham England provides an alternate view on the economic development involved in the transition from medieval to modern partly explaining England's rise to global economic dominance in the seventeenth century Coal mining did not come to these parishes until the nineteenth century these are an example of agrarian expansion Low population favourable seigniorial administration and a commercialised society saw the emergence of large farms on the bishopric of Durham soon after the Black Death these secure copyhold and leasehold tenures were among the earliest known in England Individualism developed within a strong parish and village community that encouraged growth while enforcing conformity tenants had freedom to farm as they wished within limits Along with low rents this allowed for a swift expansion of agricultural production in the sixteenth century as population rose and then as the coal trade expanded rapidly The prosperity of these men is reflected in their lands livestock and consumer goods Yet not all shared in this prosperity as the poor and landless increased in number simply by population growth Through reformation and rebellion these and other parishes prospered without experiencing severe disruption or destruction In north eastern England agrarian development was an evolution and not a revolution This study shows England's economic development as a single narrative woven together from a collection of regional experiences at different times and at different speeds **Courtship and Constraint** Diana O'Hara,2002-10-04 This book is the first major study of courtship in early modern England Courtship was a vitally important process in early modern England It was a period of private and public negotiation often fraught with anxiety If completed successfully it brought respectability the privileges of marriage and adulthood and a stable union between socially economically and emotionally compatible couples Using Kent church court and probate material dating from the 15th to the end of the 16th century the book blends historical and anthropological perspectives to suggest novel and exciting approaches to the making of marriage

Flesh in the Age of Reason Roy Porter, 2004 Starting with the grim Britain of the Civil War era with its punishing sense of the body as a corrupt vessel for the soul Roy Porter charts how through figures as diverse as Locke Swift Johnson and Gibbon ideas about medicine politics and religion fundamentally changed notions of self He shows how the Enlightenment with its explosion of rational thinking and scientific invention of the eighteenth and nineteenth centuries provided a lens through which we can best see the profound shift from the theocentric otherworldly Dark Ages to the modern earthly body centered world we live in today As man made in God's image gave way to the Enlightenment's notion of the Self made man the body moved center stage Porter writes brilliantly on the ways in which men and women flaunted decorated tanned and dieted themselves activities that we find familiar but that a Puritan divine would have considered satanic And he explores how at the end of the century the human soul took on a new significance in the works of Godwin Blake and Byron

Bride Ales and Penny Weddings R. A. Houston, 2014-03-06 Some of the poorest regions of historic Britain had some of its most vibrant festivities Between the sixteenth and nineteenth centuries the peoples of northern England Lowland Scotland and Wales used extensive celebrations at events such as marriage along with reciprocal exchange of gifts to evoke a sense of belonging to their locality *Bride Ales and Penny Weddings* looks at regionally distinctive practices of giving and receiving wedding gifts in order to understand social networks and community attitudes Examining a wide variety of sources over four centuries the volume examines contributory weddings where guests paid for their own entertainment and gave money to the couple to suggest a new view of the societies of middle Britain and re interpret social and cultural change across Britain These regions were not old fashioned as is commonly assumed but differently fashioned possessing social priorities that set them apart both from the south of England and from the Celtic fringe This volume is about informal communities of people whose aim was maintaining and enhancing social cohesion through sociability and reciprocity Communities relied on negotiation compromise and agreement to create and re create consensus around more or less shared values expressed in traditions of hospitality and generosity Ranging across issues of trust and neighbourliness recreation and leisure eating and drinking order and authority personal lives and public attitudes R A Houston explores many areas of interest not only to social historians but also literary scholars

of the British Isles *A Social History of England, 1500-1750* Keith Wrightson, 2017-02-13 The rise of social history has had a transforming influence on the history of early modern England It has broadened the historical agenda to include many previously little studied or wholly neglected dimensions of the English past It has also provided a fuller context for understanding more established themes in the political religious economic and intellectual histories of the period This volume serves two main purposes Firstly it summarises in an accessible way the principal findings of forty years of research on English society in this period providing a comprehensive overview of social and cultural change in an era vital to the development of English social identities Second the chapters by leading experts also stimulate fresh thinking by not only taking stock of current knowledge but also extending it identifying problems proposing fresh interpretations and pointing to unexplored possibilities It will be essential reading for students teachers and general readers **Parish and Belonging** K. D. M. Snell, 2006-11-16 What role did the parish play in people's lives in England and Wales between 1700 and the mid twentieth century By comparison with globalisation and its dislocating effects the book stresses how important parochial belonging once was Professor Snell discusses themes such as settlement law and practice marriage patterns cultures of local xenophobia the continuance of outdoor relief in people's own parishes under the new poor law the many new parishes of the period and their effects upon people's local attachments The book highlights the continuing vitality of the parish as a unit in people's lives and the administration associated with it It employs a variety of historical methods and makes important contributions to the history of welfare community identity and belonging It is highly relevant to the modern themes of globalisation de localisation and the decline of community helping to set such changes and their consequences into local historical perspective **Inhabiting the Landscape** Nicola Whyte, 2009-02-16 The discipline of landscape history has recently taken a new turn away from the analysis of past land use and environments towards an understanding of landscape as a social construct This book is a significant step along this exciting new road Focusing on Norfolk in the post medieval centuries Nicola Whyte recaptures the essential character of ordinary people's experience of landscape She shows how perceptions were deeply rooted in the comprehension of material antiquities the annual round of work public events and religious ritual and the complex web of rights and jurisdictions mapped out in the fields People valued and gave meaning to the landscape for a wide range of reasons many of them unconnected with the economic potential of the land Landscape features outside the confines of the church and the graveyard pilgrimage routes crosses wells and springs played an important part in the ideological shift of the Reformation Parish boundaries and in particular the annual ritual of beating the bounds at Rogationtide reveal much about the shifting pattern of local allegiances and competition over resources Places of execution and the graves of suicides were mnemonic spectacles defining both geographical and behavioural limits The local history of enclosure and rights to commons is the story of nascent capitalism in rural England a clash of values between modern productivity and ancient tradition that involved the reinterpretation and renegotiation of the past Informed by the

latest archaeological theory this book shows how landscape development was a dynamic experiential process in which world views changed as well as woods hedges and fields *Cities and Solidarities* Justin Colson,Arie van Steensel,2017-01-06

Cities and Solidarities charts the ways in which the study of individuals and places can revitalise our understanding of urban communities as dynamic interconnections of solidarities in medieval and early modern Europe This volume sheds new light on the socio economic conditions the formal and informal institutions and the strategies of individual town dwellers that explain the similarities and differences in the organisation and functioning of urban communities in pre modern Europe It considers how communities within cities and towns are constructed and reconstructed how interactions amongst members of differing groups created social and economic institutions and how urban communities reflected a sense of social cohesion In answering these questions the contributions combine theoretical frameworks with new digital methodologies in order to provoke further discussion into the fundamental nature of urban society in this key period of change The essays in this collection demonstrate the complexities of urban societies in pre modern Europe and will make fascinating reading for students and scholars of medieval and early modern urban history England's Northern Frontier Jackson W. Armstrong,2020-11-12 Explains the history of England s northern borderlands in the fifteenth century within a broader social political and European context *Towns in Decline, AD100-1600* Terry Slater,2017-07-05 Many European towns have experienced loss of population degradation of physical structure and profound economic change at least once since the height of the Roman Empire This volume is an examination of the various causes of these changes the results which flowed from them and the reasons why some urban centres survived revived and eventually flourished again while others failed and died The contributors bring to bear the techniques of history and archaeology the perspectives of economics agronomy medicine architecture and planning geography and law to the study The result is a synthesis which connects the Decline of the Roman Empire to the effects of the Black Death and the economic transformation of Renaissance Florence Popular Culture in Early Modern Europe Peter Burke,2017-03-02 The concept of cultural history has in the last few decades come to the fore of historical research into early modern Europe Due in no small part to the pioneering work of Peter Burke the tools of the cultural historian are now routinely brought to bear on every aspect of history and have transformed our understanding of the past First published in 1978 this study examines the broad sweep of pre industrial Europe s popular culture From the world of the professional entertainer to the songs stories rituals and plays of ordinary people it shows how the attitudes and values of the otherwise inarticulate shaped and were shaped by the shifting social religious and political conditions of European society between 1500 and 1800 This third edition of Peter Burke s groundbreaking study has been published to mark the thirtieth anniversary of the book s publication in 1978 It provides a new introduction reflecting the growth of cultural history and its increasing influence on mainstream history as well as an extensive supplementary bibliography which further adds to the information about new research in the area **Lowestoft, 1550-1750** David
