Rentel, Samuel A. Corson, Bruce R. Dunn, 2017-11-01 Bringing together neurological assessments of reading and cognition this provocative volume originally published in 1985 presents eight major and sometimes controversial studies on the parts and patterns of the reading process With comprehensive coverage ranging from psycholinguistics and education to neurophysiology these studies highlight new directions in the field at the time The contributors support an interactive rather than dichotomous model of brain function and stress individual differences in assessing reading and cognitive skills

Psychology Library Editions: Psychology of Reading Various Authors,2021-03-01 The psychology of reading investigates the process by which readers extract visual information from written text and make sense of it Psychology Library Editions Psychology of Reading 11 Volumes brings together as one set or individual volumes a small series of previously out of print titles originally published between 1980 and 1995 The set includes topics such as dyslexia and the relationship between speech and reading Psychobiology of Stress Stefano Puglisi-Allegra, A. Oliverio, 2012-12-06 From a historical point of view the first studies on the response of the organism to stressful situations in general and on the

psychobiology of stress in particular are probably those of Cannon and de la Paz the physiologists who showed in 1911 that the adrenal medulla and the sympathetic system are involved in emergency situations Cannon noted that the venous blood of cats frightened by barking dogs contained adrenaline a response of the organism which was prevented by adrenalectomy or by section of the splanchnic nerve innervating the adrenal medulla Cannon suggested that the adrenal medulla was acting in concert with the sympathetic nervous system so that both systems were activated during stress The role of the sympathetic system in response to stressful events was later emphasized by the experiments carried out by Maickel et al 1967 and by Mason 1968 these authors clearly showed that stressors activate the sympathetic system causing it to release adrenaline and noradrenaline This line of research may be contrasted with that carried out by Hans Selye centered on of the adrenal cortex in the stress response Selve's findings and theories originated the role the so called hypothalamic pituitary adrenal cortex HPA model of stress in short during stress adrenocorticotropic hormone is released from cells of the anterior pituitary and elicits secretion of glucocorticoids from the adrenal cortex Psychopathology of Human Adaptation George Serban, 2012-12-06 Undoubtedly this symposium will prove to be an important landmark in the development of our understanding of the psychopathology of human adaptation in general as well as of the general adaptation syndrome and stress in particular It was organized to give an opportunity to an international group of experts on adaptation and stress research to present summaries of their research that could then later be exhaustively analyzed The carefully structured program brings out three major aspects of adapta tion to stress in experimental animals and man The first section deals with the neurophysiology of stress responses placing major emphasis upon the neuroanatomical and neurochemical aspects involved The second section is devoted to the psychology and psychopathology of adaptive learning motivation anxiety and stress The third section examines the role played by stress in the pathogenesis of mental diseases Many of the relevant subjects receive particularly detailed attention Among these the following are especially noteworthy The existence of reward and drive neurons Constitutional differences in physiological adaptations to stress and d tress Motivation mood and mental events in relation to adaptive processes Peripheral catecholamines and adaptation to underload and overload Selective corticoid and catecholamine responses to various natural stimuli The differentiation between eustress and distress Resistance and overmotivation in achievement oriented activity The dynamics of conscience and contract psychology Sources of stress in the drive for power Advances in the therapy of psychiatric illness The application of experimental studies on learning to the treatment of neuroses The Psychosocial Work Environment Jeffrey V. Johnson, Bertil Gardell, Gunn Johannson, 2020-11-26 Dedicated to the late Bertil Gardell a Swedish Social Scientist this text comprises of 18 essays that shares a common vision the impact of work on the interconnected processes of stress and disease Stress, Shock, and Adaptation in the Twentieth Century David Cantor, Edmund Ramsden, 2014 This edited volume brings together leading scholars to explore the emergence of the stress concept and its ever changing definitions since the 1940s Stress is one of the

most widely utilized medical concepts in modern society Originally used to describe physiological responses to trauma it is now applied in a variety of other fields and contexts such as in the construction and expression of personal identity social relations building and engineering and the various complexities of the competitive capitalist economy. In addition scientists and medical experts use the concept to explore the relationship between an ever increasing number of environmental stressors and the evolution of an expanding range of mental and chronic organic diseases such as hypertension gastric ulcers arthritis allergies and cancer Thisedited volume brings together leading scholars to explore the emergence and development of the stress concept and its definitions as they have changed over time It examines how stress and closely related concepts have been used to connect disciplines such as architecture ecology physiology psychiatry psychology public health urban planning and a range of social sciences its application in different settings such as the battlefield workplace clinic hospital and home and the advancement of techniques of stress management in a number of different national sociocultural and scientific locations Contributors Theodore M Brown David Cantor Otniel E Dror Rhodri Hayward Mark Jackson Robert G W Kirk Junko Kitanaka Tulley Long Joseph Melling Edmund Ramsden Elizabeth Siegel Watkins Allan Young David Cantor is acting director Office of History National Institutesof Health Edmund Ramsden is Wellcome Trust University Award Research Fellow at the School of History Queen Mary University of London **Psychiatry and Psychology in the USSR** Samuel Corson, 2012-12-06 This book is aimed at a professional audience of psychiatrists psychologists and educators as well as Slavic studies scholars and teachers and intelligent lay readers It would be presumptious to attempt to cover the entire field of Soviet psychiatry and psychology in one modest volume During the past several decades there has been a remarkable flourishing and diversification of research in psychology and psychiatry in the USSR What we have attempted to do in this symposium is to present a constructive critical overview of certain limited areas by arranging an interchange of observations and ideas between several American scientists knowledgeable in these fields and a psychologist and psychiatrist who obtained their education and working experience in the USSR We hope to be able to expand such symposia in the future so as to cover other important areas of these disciplines This monograph presents an eyewitness account of Pavlov by W Horsley Gantt one of three surviving students of Pavlov and to the best of my knowledge the only American who actually studied and worked with Pavlov It is a measure of Dr Gantt's devotion to the development of scientific psychiatry that he went to the USSR to spend six years in Pavlov s laboratory at a time of extreme economic hardship and political turmoil in that country and in the face of having to master a difficult language In his presentation Dr The Handbook of Stress and Health Cary Cooper, James Campbell Quick, 2017-04-17 A comprehensive work that brings together and explores state of the art research on the link between stress and health outcomes Offers the most authoritative resource available discussing a range of stress theories as well as theories on preventative stress management and how to enhance well being Timely given that stress is linked to seven of the ten leading causes of death in developed nations yet paradoxically successful adaptation

to stress can enable individuals to flourish Contributors are an international panel of authoritative researchers and practitioners in the various specialty subjects addressed within the work Epidemiology of Aging Adrian M.
