Society Schools And Humanity:

Civil Society, Education and Human Formation Jānis (John) Tāļivaldis Ozoliņš, 2017-04-07 Education has been widely criticised as being too narrowly focused on skills capacities and the transference of knowledge that can be used in the workplace As a result of the dominance of economic rationalism and neo liberalism it has become commodified and marketed to potential customers As a consequence students have become consumers of an educational product and education has become an industry There is deep dissatisfaction with these neo liberal developments What is missing is any conception of education as a key factor in the human formation that will lead students to develop the virtues and values that they will need to not only lead successful lives but also be responsible members of their communities working for the common good and acting to transform them into just societies This volume draws together a number of different perspectives on what is meant by human formation argues that for a much richer conception of education and addresses the lack of attention to human fulfilment It also highlights the importance of philosophy in the articulation of novel ways of conceptualising education providing alternatives to the dominant neo liberal and economic rationalist models The central question with which the book is concerned is a renewed understanding of education as the formation of persons of civil society and the role of philosophy in fostering that renewal In this volume there are a variety of voices from diverse traditions and cultures Both East and West are represented and it might be expected that this would result in a divergence of opinion about the purpose of education However in spite of the diversity there is some significant convergence in thinking about the ways in which education ought to serve the needs of both the individual and their communities What is also particularly useful and what is fresh about the essays presented here is that there is also diversity in the philosophical approaches to the problem This means that the convergence on the importance of human formation as the cornerstone of education does not rely on a privileged philosophical method

GENDER SCHOOL AND SOCIETY

Shivendra Singh, M Zaid Saifi,2023-05-11 The opportunity to pen this introduction to my debut book GENDER SCHOOL AND SOCIETY is one that fills me with excitement Consideration of gender in social issues is the topic of this book Being a boy or a girl has varied implications and experiences in different cultures eras and communities Due to centuries of discrimination she learned to view herself as a lesser human being and an insignificant tool in the hands of her male counterpart Her sense of self and confidence were slowly eroded as a result The more she tried to hide her inner emotions the more entangled her authentic self became in her predetermined social roles For almost twenty years organisations worldwide and governmental strategy statements have prioritised the reduction of gender disparity In addition to guaranteeing women s right to vote and other civil liberties the Constitution of India also allows for positive discrimination on the part of the state in favour of women Our democratic government has enacted laws development policies plans and programmes to help women succeed in a variety of fields To further ensure women s rights India has signed on to and ratified a number of international agreements and human rights instruments Thinking Constructively About Science, Technology, and Society Education Dennis W.
