Socioeconomic Aspects Of Human Behavioral Ecology:

Socioeconomic Aspects of Human Behavioral Ecology M. Alvard, 2004-12-30 Demonstrates the behavioral ecology's maturation as a subfield of anthropology. These papers also show how behavioral ecology conceptually integrates the core of biological anthropology with the other subdisciplines by providing a common framework for investigating and understanding basic economic questions. Human Behavioral Ecology Jeremy Koster, Brooke Scelza, Mary K. Shenk, 2024-03-14

Human behavioral ecology (HBE) applies the principles of evolutionary theory and optimisation to the study of human behavioural and cultural diversity. Among other things, HBE attempts to explain variation in behaviour as adaptive solutions to the competing life history demands of growth, development, reproduction, parental care, and mate acquisition. This book is a comprehensive introduction to the theoretical orientation and specific findings of HBE. It consolidates the insights of evolution and human behaviour into a single volume that reflects the current state and future of the field. It brings together leading scholars from across the evolutionary social sciences to provide a comprehensive and thought-provoking review of the state of the topic. Throughout, the authors explain the latest developments in theory and highlight critical debates in the literature while also engaging readers with ethnographic insights and field-based studies that remain at the core of human behavioral ecology.

The Handbook of Evolutionary Psychology David M. Buss, 2005-07-15 The foundations of practice and the most recent discoveries in the intriguing new field of evolutionary psychology. Why is the mind designed the way it is? How does input from the environment interact with the mind to produce behavior? By taking aim at such questions, the science of evolutionary psychology has emerged as a vibrant new discipline producing groundbreaking insights. In *The Handbook of Evolutionary Psychology*, leading contributors discuss the foundations of the field as well as recent discoveries currently shaping this burgeoning area of psychology. Guided by an editorial board made up of such luminaries as Leda Cosmides, John Tooby, Don Symons, Steve Pinker, Martin Daly, Margo Wilson, and Helena Cronin, the text's chapters delve into a comprehensive range of topics covering the full range of the discipline: Foundations of evolutionary psychology, Survival, Mating, Parenting, and kinship, Group living, Interfaces with traditional disciplines of evolutionary psychology, and Interfaces across disciplines. In addition to an in-depth survey of the theory and practice of evolutionary psychology, the text also features an enlightening discussion of this discipline in the context of the law, medicine, and culture. An Afterword by Richard Dawkins provides some final thoughts from the renowned writer and exponent of evolutionary theory. Designed to set the standard for handbooks in the field, *The Handbook of Evolutionary Psychology* is an indispensable reference tool for every evolutionary psychologist and student.

Dimensions of Ritual Economy Patricia Ann McAnany, 2008-05-05 Increasingly, economists have acknowledged that a major limitation to economic theory has been its failure to incorporate human values and beliefs as motivational factors. economic anthropology and suggests that a new focus on sharing will have significant repercussions for anthropological theory Breaking new ground in this key topic this volume provides students with a coherent and accessible overview of the economy of sharing from an anthropological perspective The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution ShareAlike CC BY SA 4.0 license Open Access funding of this book was made possible through the Leo Spitzer Prize of the University of Cologne This generous funding is gratefully acknowledged
