Cultural Beings Yuval Lurie,2021-12-28 Human beings are a cultural species This predicament enables them to take on many different cultural identities all of which transcend the bounds of natural behavior of other species To contemplate this predicament through philosophy is to reflect on such questions as What makes cultural forms of life possible What is encompassed in them What lies at their core What distinguishes them from natural forms of life What brings them about sustains and causes them to change Philosophical answers to these questions predate abstract ways of thinking as they

are sometimes embedded in ancient mythical and religious narratives Such is the story told in the first three chapters of the book of Genesis in the Bible revealing how human beings became the cultural beings that they are This study suggests how that ancient and most celebrated story in the literature of the West may be read as harboring insightful philosophical observations on the cultural nature of human beings It first focuses on the very concept of cultural forms of life revealing its complicated conceptual links to natural forms of life It then offers an interpretive framework for reading mythical symbolic narratives Using these ideas it provides a philosophical reading of the Biblical narrative disclosing it to harbor a metaphysically oriented conception of nature and two insightful philosophical overviews of the cultural nature of human beings Both overviews endow human beings with an ability to manipulate nature but in different ways the first by subjugating parcels of nature to human will the second by subjugating human beings themselves to a value laden conception of things and ethical forms of life Thus human beings are portrayed as natural creatures possessed of a cultural nature that enables them to transform nature and recreate themselves through their unique cultural predicament

Hobbes and the Social Contract Tradition Jean Hampton, 1986 A major study of Hobbes political philosophy drawing on developments in game and decision theory

Darwinian Natural Right Larry Arnhart, 1998-04-02 This book shows how Darwinian biology supports an Aristotelian view of ethics as rooted in human nature Defending a conception of Darwinian natural right based on the claim that the good is the desirable the author argues that there are at least twenty natural desires that are universal to all human societies because they are based in human biology The satisfaction of these natural desires constitutes a universal standard for judging social practice as either fulfilling or frustrating human nature although prudence is required in judging what is best for particular circumstances The author studies the familial bonding of parents and children and the conjugal bonding of men and women as illustrating social behavior that conforms to Darwinian natural right He also studies slavery and psychopathy as illustrating social behavior that contradicts Darwinian natural right He argues as well that the natural moral sense does not require religious belief although such belief can sometimes reinforce the dictates of nature

Social Functions in Philosophy Rebekka Hufendiek, Daniel James, Raphael van Riel, 2020-03-09 Social functions and functional explanations play a prominent role not only in our everyday reasoning but also in classical as well as contemporary social theory and empirical social research This volume explores metaphysical normative and methodological perspectives on social functions and functional explanations in the social sciences It aims to push the philosophical debate on social functions forward along new investigative lines by including up to date discussions of the metaphysics of social functions questions concerning the nature of functional explanations within the social domain and various applications of functionalist theorising As such this is one of the first collections to exclusively address a variety of philosophical questions concerning the nature and relevance of social functions

The Social Lives of Animals Ashley Ward, 2022-03-01 A rat will go out of its way to help a stranger in need Lions have adopted the calves of their prey Ants farm fungus in cooperatives Why do we continue to

believe that life in the animal kingdom is ruled by competition In *The Social Lives of Animals* biologist Ashley Ward takes us on a wild tour across the globe as he searches for a more accurate picture of how animals build societies Ward drops in on a termite mating ritual while his guides snack on the subjects visits freelance baboon goatherds and swims with a mixed family of whales and dolphins Along the way Ward shows that the social impulses we've long thought separated humans from other animals might actually be our strongest connection to them Insightful engaging and often hilarious *The Social Lives of Animals* demonstrates that you can learn more about animals by studying how they work together than by how they compete
