Social exchange theory postulates that people form a relationship through cost-benefit analysis.

## COMPONENTS

According to social exchange theory, every relationship has the following components:

Gergen,2012-12-06 INTRODUCTION In developing scientific theory there is perhaps nothing more propi tious than a compelling metaphor If the metaphor is rich in imagery complexly differentiated emotionally evocative and vitally wedded to the cultural lore the theory to which it gives rise may enjoy a long and vigorous life If the metaphor is sufficiently powerful the theory may even be sustained in independence of systematic empirical support Role theory is likely to remain prosperous so long as there is a thriving theater decision theory experienced a dramatic rejuvenation with the development of the electronic computer and in spite of its archaic construction Jungian theory will prevail so long as ancient myths and symbols continue to haunt us d Smith 1978 From this standpoint the development of social exchange theory is hardly surprising Ex perience with the marketplace is extensive in society its images are both complex and richly evocative its challenges are often exciting and its lessons sometimes painful It is thus both intellectually and emo tionally invigorating to consider the social arena in all its diversity as an extended market in which each individual seeks to maximize profits The economic metaphor is hardly new to the social sciences The recent intellectual roots of contemporary exchange theory can be traced to the works of Claude Levi Strauss Marcel Mauss Karl Marx and B      **Social Exchange in Developing Relationships**

Robert L. Burgess,Ted L. Huston,2013-09-11 Social Exchange in Developing Relationships is a collection of papers that deals with the systematic study of the development of relationships The papers discuss several theoretical perspectives such as evolutionary theory personality theory cognitive developmental theory equity theory role theory and attribution theory One paper discusses romantic relationships the evolution of first acquaintance to close or intimate commitment Another paper presents the hypothesis that the factors causing a relationship to begin will also probably steer intermediate cognitive processes eventually influencing the nature of the relationship Commitment requires specific concepts such as input levels contributed to the relationship duration of these inputs and their consistency of occurrence The equity theory suggests that equity principles determine the selection of one s mate and how they the partners will get along in the future One paper analyzes the dynamic theories of social relationships and the resulting research strategies that the conceptualization of a
