Social Impact Assessment:

New Directions in Social Impact Assessment Frank Vanclay, Ana Maria Esteves, 2011-01-01 This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis. Jon Samuel Head of Social Performance, Anglo American. The list of authors reads like a who's who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics. Martin Haeefele, Manager Environmental Impact Assessment at Mackenzie Valley Environmental Impact Review Board, Yellowknife, Northwest Territories, Canada. This book gives a very broad overview of where Social Impact Assessment is coming from, where it is now, and where it could go, from an impact assessment tool to an impact management tool. It provides a realistic insight into both the achievements and the struggles of Social Impact Assessment. A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance, such as Environmental Assessment and Sustainability Appraisal. Rob Verheem, Deputy Director, Netherlands Commission for Environmental Assessment. This important new book outlines current developments in thinking in the field of Social Impact Assessment (SIA). It advances the theory and practice of SIA and argues that a dramatic shift is required in the way socioeconomic studies and community participation is undertaken. The book emphasizes that much more than the act of predicting impacts in a regulatory context, SIA needs to be the process of managing the social aspects of development, and that there needs to be a holistic and integrated approach to impact assessment. It stresses that greater attention needs to be given to ensuring that the goals of development are attained and enhanced. This significant addition to the literature will be an invaluable reference for academics, consultants, and practitioners.

A Conceptual Approach to Social Impact Assessment Rabel J. Burdge, 1994

A Community Guide to Social Impact Assessment Rabel J. Burdge, 2004-01-01 The Guide is a tool for practitioners at all levels: social scientists, agency employees, community leaders, volunteers, to complete social impact assessments (SIAs) efficiently and effectively. The Guide is a how-to manual that provides the users with a step-by-step process easily followed by persons with minimal social science training. The Guide is organized into three sections. Chapters 1-6 provide the background, a short history, the conceptual model, the SIA scoping process, and an explanation as to how to obtain data to measure SIA variables. Chapters 7-11 correspond to the five categories of SIA variables: population change, community and institutional arrangements, communities in transition, individual and family impacts, and community infrastructure needs. Chapters 12-13 provide worksheets for summarizing SIA variables and how resulting data may be used in the SIA mitigation/enhancement process.
