Social Production Of Indifference:

The Social Production of Indifference Michael Herzfeld, 1993-10 In this fascinating book Michael Herzfeld argues that modern bureaucratically regulated societies are no more rational or less symbolic than the societies traditionally studied by anthropologists Drawing primarily on the example of modern Greece and utilizing other European materials he suggests that we cannot understand national bureaucracies divorced from local level ideas about chance personal character social relationships and responsibility He points out that both formal regulations and day to day bureaucratic practices rely heavily on the symbols and language of the moral boundaries between insiders and outsiders a ready means of expressing prejudice and of justifying neglect It therefore happens that societies with proud traditions of generous hospitality may paradoxically produce at the official level some of the most calculated indifference one can find anywhere

The Pure Theory of International Trade

Miltiades Chacholiades, There has long been a need for a systematic introduction to the modern pure theory of international trade that would take the student through a careful introduction to the tools of analysis and the main logical propositions into the application of the theory to practical problems of international economic policy Trade theory should be part and parcel of price theory distinguished only by the fact that other countries form part of the natural opportunities and natural constraints that a country confronts in its efforts to bend nature to its desire to produce utility yielding goods and services but its exposition is often confused by the attachment of its expositors to obsolete problems and backward analytical techniques This book covers in detail classical neoclassical and modern theories of international trade with special attention to problems of equilibrium growth and welfare and discusses the work of all major contributors in this field from Ricardo and Mill through Meade Heckscher and Ohlin to the growth models of Johnson Solow and Uzawa All problems are clearly stated and the easiest and most convenient solutions are sought in each case with the more technical topics in the field discussed in several chapters and appendixes that may be omitted for less advanced students without interrupting the continuity of the book The book's coverage is complete and entirely up to date It is written primarily for advanced undergraduate and graduate courses in international trade but it will also serve as an important reference tool for professional economists working in this field and will be of considerable interest to students and practitioners dealing with problems of economic development and international business relationships more generally Miltiades Chacholiades studied at the Athens School of Economics and Business Science in Athens Greece and received his doctorate from the Massachusetts Institute of Technology He has taught at New York University and the University of California in Los Angeles and is presently Professor of Economics at Georgia State University His articles have been published in a number of international professional economic journals
