# SOCIAL COGNITIVE THEORY

Social-cognitive theory (SCT) is a theory of learning that examines how cognitive processes and environmental factors influence behavior.

# OVERVIEW

Social Cognitive Theory (SCT), developed by Albert Bandura, is a learning theory that emphasizes the role of observational learning, cognitive processes, and social experiences in determining behavior. Central to this theory is the concept of reciprocal determinism, the mutual interaction between an individual's behaviors, personal factors, and environmental influences.

# EXAMPLES

- Bobo Doll Experiment: Bandura demonstrated that children can learn aggressive behaviors by observing and imitating an adult model acting aggressively towards a Bobo doll.
- Teacher Expectations: If a teacher expects a student to perform well, this can positively affect the student's performance, illustrating the interplay of personal, environmental, and behavioral factors in learning.

published in this field now Fiske and Macrae have provided a timely and seminal benchmark a state of the art overview that will benefit advanced students and academics not just within social psychology but beyond these borders too Following an introductory look at the uniqueness of social cognition the Handbook goes on to explore basic and underlying processes of social cognition from implicit social cognition and consciousness and meta cognition to judgment and decision making Also the wide ranging applications of social cognition research in the real world from the burgeoning and relatively recent fields of social cognitive development and social cognitive aging to the social cognition of relationships are investigated Finally there is a critical and exciting exploration of the future directions in this field The SAGE Handbook of Social Cognition will be an indispensable volume for any advanced student or academic wanting or needing to understand the landscape of social cognition research in the 21st century The Social Psychology of Aging Scott F. Madey, 2018-12-07 This special issue highlights how social psychology can further the understanding of important social health interpersonal and intergenerational issues facing people as they age This issue has three goals to generate more interest in aging as an area of study for social psychologists by showcasing researchers who are currently integrating basic social psychological research with issues in aging and lifespan development to challenge readers to think about how their research programs can interconnect with issues in aging and to demonstrate how social psychological processes have direct application to many of the issues facing people as they age Handbook of Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recuring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and

communication and in this updated edition will continue to play a key role in the study of communication and aging The Oxford Handbook of Social Neuroscience Jean Decety, John T. Cacioppo, 2015-04-15 The complexities of the brain and nervous system make neuroscience an inherently interdisciplinary pursuit one that comprises disparate basic clinical and applied disciplines Behavioral neuroscientists approach the brain and nervous system as instruments of sensation and response cognitive neuroscientists view the same systems as a solitary computer with a focus on representations and processes The Oxford Handbook of Social Neuroscience marks the emergence of a third broad perspective in this field Social neuroscience emphasizes the functions that emerge through the coaction and interaction of conspecifics the neural mechanisms that underlie these functions and the commonality and differences across social species and superorganismal structures With an emphasis on the neural hormonal cellular and genetic mechanisms underlying social behavior social neuroscience places emphasis on the associations and influences between social and biological levels of organization This complex interdisciplinary perspective demands theoretical methodological statistical and inferential rigor to effectively integrate basic clinical and applied perspectives on the nervous system and brain Reflecting the diverse perspectives that make up this field The Oxford Handbook of Social Neuroscience brings together perspectives from across the sciences in one authoritative volume Psychology of Aging Martin Orrell, Aimee Spector, 2009 This volume offers a collection of classic original and often widely cited papers including some older papers which may be hard to find through conventional searches They address a broad range of key issues such as cognitive changes related to aging social and emotional changes lifestyle factors dependency on carers and related mental health problems in old age The Oxford Handbook of Reciprocal Adult Development and Learning Carol Hoare, 2011-09-06 This second edition of The Oxford Handbook of Reciprocal Adult Development and Learning explores how advances in one dimension so often lead to positive changes in the other This is new terrain in psychology and learning Implications for research practice and policy emanate from review of empirical literature and theoretical perspectives Aging and Diversity Chandra M. Mehrotra, Lisa S. Wagner, Chandra Mehrotra, 2013-03-07 This new edition has been completely rewritten and includes chapters that address key topics in diversity and aging research methods psychological aging health beliefs behaviors and services health disparities informal and formal care for older persons work and retirement religious affiliation and spirituality and death dying and bereavement Taking a broad view of diversity Mehrotra and Wagner discuss elements of diversity such as gender race or ethnicity religious affiliation social class rural urban community location and sexual orientation Including these elements allows them to convey some of the rich complexities of our diverse culture complexities that provide both challenges to meet the needs of diverse population and opportunities to learn how to live in a pluralistic society Throughout the book Mehrotra and Wagner present up to date knowledge and scholarship in a way that engages readers in active learning Rather than simply transmitting information the authors place ongoing emphasis on developing readers knowledge and skills fostering higher

order thinking and encouraging exploration of personal values and attitudes Distinctive features of the book include Opening vignettes for each chapter that present a sampling of how the issues to be discussed apply to diverse elders Active learning experiences that invite readers to interview diverse elders conduct internet searches and give an analysis of a case study Quizzes at the end of the chapters help readers ascertain the extent to which they have learned the material the key for each quiz includes details about correct and incorrect responses so that additional learning can occur Aging and Diversity Online boxes interspersed throughout the book provide internet resources that readers may use to find new research and publications Suggested readings and audiovisual resources given at the end of each chapter serve as a guide to additional information on topics covered in the chapter This approach of presenting the material will help the readers understand and apply key concepts and principles in ways that will not only improve the lives of older people they serve but will also enhance their own aging experience
