Kress, 1988 Social Semiotics is a major new textbook in communication and cultural studies It offers a comprehensive and original approach to the study of the ways in which meaning is constituted in social life Hodge and Kress begin from the assumption that signs and messages the subject matter of semiotics must always be situated within the context of social relations and processes They then show what is involved in analysing different kinds of messages from literary texts TV programmes and billboards to social interactions in the family and the school While presenting a judicious assessment of different perspectives Hodge and Kress also develop their own distinctive and highly fruitful approach demonstrating how semiotics can be integrated with the social analysis of power and ideology space and time and gender and class Social Semiotics is richly illustrated with examples and written in a clear style which does not presuppose prior knowledge of the field It will become a key textbook for courses in communications media and cultural studies and will be of general interest to students of sociology literature and linguistics The Social Semiotics of Mass Communication Klaus Bruhn Jensen, 1995-07-11 This text offers a framework for understanding the key role of the mass media in the social production of meaning It draws on classic positions on the relations between communications and society and on recent work in both social sciences and humanities

Language as Social Semiotic Michael Alexander Kirkwood Halliday, 1978 **The Social Semiotics of Populism** Sebastián Moreno Barreneche, 2023-01-26 The concept of populism is currently used by scholars the media and political actors to refer to multiple and disparate manifestations and phenomena from across both the left and the right ends of the political spectrum As a result it defies neat definition as scholarship on the topic has shown over the last 50 years In this book Sebastián Moreno Barreneche approaches populism from a semiotic perspective and argues that it constitutes a specific social discourse grounded on a distinctive narrative structure that is brought to life by political actors that are labelled

populist Conceiving of populism as a mode of semiotic production that is based on a conception of the social space as divided into two groups the People and the Other this book uses semiotic theory to make sense of this political phenomenon Exploring how the categories of the People and the Other are discursively constructed by populist political actors through the use of semiotic resources the ways in which meaning emerges through the oppositions between imagined collective actors is explained Drawing on examples from Europe North America and South America The Social Semiotics of Populism presents a systematic semiotic approach to this multifaceted political concept and bridges semiotic theory and populism studies in an original manner *Social Semiotics* Thomas Hestbaek Andersen, Morten Boeriis, Eva Maagerø, Elise Seip Tonnessen, 2015-03-27

and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication

Kommunikation kring klimat förändringar är ett aktuellt och relevant mne och många bedömare anser att kommunikation kring orsaker effekter och möjliga alternativ är en viktig del i arbetet med att minska klimatutmaningarna Klimatvisualisering är en process för att skildra klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppsminskningar och klimatanpassning Det råder dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv

Denna avhandling adresserar denna kunskapslucka. Det övergripande syftet är att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman tolkar innebörden av klimatförändringar som de representeras i tv-exempel på klimatvisualisering. Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv. Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv-exempel på klimatvisualisering, en film som visas i en domteater framtagen för svenska gymnasieelever med målsättningen att uppmuntra till reflektion kring klimatförändringarnas orsaker, effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja husgärd i Norden att anpassa sig till klimatförändringarnas lokala effekter. Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan för klimatförändringarna att framstå som mer personligt relevanta och intressanta för målgruppen. Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras förförståelse om klimatförändringar som ett globalt och avlägset problem som ska lösas av andra aktörer som nationella regeringar eller genom internationella politiska förhandlingar. Även om klimatvisualisering kan förstärka känslan av närhet till klimatförändringar kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned de lokala klimatriskernas betydelse. Dessutom trots att både fallen av klimatvisualisering avseende att skapa en känsla av att kunna påverka blev svaret för klimatutgårderna för en kritisk förhandling för deltagarnas sida de förklade svaret för att hantera klimatutmaningarna till andra aktörer. Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte någon patentlösning för klimatkommunikation. Detta understryker även vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handlingen när man studerar och utvecklar verktyg för klimatvisualisering.

and looks at How multimodality can be used to promote social justice and democracy in diverse classrooms The forms of representation through which students make meaning in classrooms How those forms contribute to the building of democratic cultures The cultural resources available to students and how they are used for learning Difference as a productive energy for learning Dealing with issues such as democracy politics of difference diversity multicultural and multilingual classrooms this book is as pertinent to readers across the globe as it is to those in South Africa and will be invaluable and fascinating reading for anyone working or interested in this field
