Social Shaping Of Technology:

The Social Shaping of Technology Donald A. MacKenzie, Judy Wajcman, 1999 Technological change is often seen as something that follows its own logic something we may welcome or about which we may protest but which we are unable to alter fundamentally This reader challenges that assumption and its distinguished contributors demonstrate that technology is affected at a fundamental level by the social context in which it develops General arguments are introduced about the relation of technology to society and different types of technology are examined the technology of production domestic and reproductive technology and military technology The book draws on authors from Karl Marx to Cynthia Cockburn to show that production technology is shaped by social relations in the workplace It moves on to the technologies of the household and biological reproduction which are topics that male dominated social science has tended to ignore or trivialise though these are actually of crucial significance where powerful shaping factors are at work normally unnoticed The final section asks what shapes the most frightening technology of all the technology of weaponry especially nuclear weapons The editors argue that social scientists have devoted disproportionate attention to the effects of technology on society and tended to ignore the more fundamental question of what shapes technology in the first place They have drawn both on established work in the history and sociology of technology and on newer feminist perspectives to show just how important and fruitful it is to try to answer that deeper question The first edition of this reader published in 1985 had a considerable influence on thinking about the relationship between technology and society This second edition has been thoroughly revised and expanded to take into account new research and the emergence of new theoretical perspectives The Social Shaping of
