*The Social Studies Wars* Ronald W. Evans, 2004-01-01 Ronald Evans describes and interprets the continuing battles over the purposes content methods and theoretical foundations of the social studies curriculum This facinating volume addresses the failure of social studies to reach its potential for dynamic teaching because of a lack of consensus in the field links the ever changing rhetoric and policy decisions to their influence on classroom practice and helps to clarify the meaning direction and purposes of social studies instruction in schools *The Hope for American School Reform* Ronald W. Evans, 2010-12-15 As the issue of school reform grows ever more intense it is imperative that we learn what we can from previous efforts The new social studies was a 1960s attempt to transform the teaching of history and the social sciences in schools With origins in the Cold War the movement sought to develop critical thinkers through inquiry and discovery Though it led to a veritable treasure trove of innovative materials the revolution envisioned by its proponents never materialized Engagingly written and drawing on previously untapped archival sources *The Hope for American School Reform* offers an insightful perspective on current trends *The Social Studies Curriculum* E. Wayne Ross, 2014-11-01 The Social Studies Curriculum Fourth Edition updates the definitive overview of the issues teachers face when creating learning experiences for students in social studies The book connects the diverse elements of the social studies curriculum civic global social issues offering a unique and critical perspective that separates it from other texts Completely updated this book includes twelve new chapters on the history of the social studies democratic social studies citizenship education anarchist inspired transformative social studies patriotism ecological democracy Native studies inquiry teaching Islamophobia capitalism and class struggle gender sex sexuality and youth experiences in school and critical media literacy All the chapters from the previous edition have been thoroughly revised and updated including those on teaching social studies in the age of curriculum standardization and high stakes testing critical multicultural social studies prejudice and racism assessment and teaching democracy Readers are encouraged to reconsider their assumptions and understanding about the origins purposes nature and possibilities of the social studies curriculum **History on Trial** Gary B. Riley, 2006-05-01 ocial Reconstruction as a philosophy stream of thought or official program ois often synonymous with Depression era Progressivism But Social Reconstruction unlike progressivism enjoyed political

stardom The spirit of progressivism at least in terms of education found a home in those enthusiasts who supported a child centered perspective of education Others such as the essentialists viewed their progressive role as one that advanced the view of essential or basic education as the most sound approach to curriculum and teaching Still others more radical in their outlook believed that progress should be framed with questions about social justice and equity Proponents of social reconstruction included Harold Rugg and George Counts although the movement was rich with supporters To date social reconstruction is only a by word in most texts that deal with the Progressive Era or progressive education perhaps because Rugg and Counts the two most visible proponents sought and received the political limelight no matter how glaring In any event the depths of social reconstruction have yet to be plumbed Hence the first book in this series will offer a comprehensive treatment of Social Reconstruction which include chapters that examine its proponents political nature and social justice programs born of and within the tumultuous context of progressive politics

Interdisciplinary Education in the Age of Assessment David M.

Moss, Terry A. Osborn, Douglas Kaufman, 2010-08-27 *Interdisciplinary Education in the Age of Assessment* addresses a prevalent need in educational scholarship today. Many current standards-driven curricula follow strict subject-specific guidelines, leaving educators little room for interdisciplinary innovation. This book gears itself toward developing assessment models specific to interdisciplinary education, positioning itself as a seminal volume in the field and a valuable resource to educators across the disciplines. Each chapter covers a major subject area: literacy, science, math, social studies, bilingual education, foreign language, educational policy, and discusses methods of assessing integrated interdisciplinary curriculum and instruction.

**Whose America?** Jonathan Zimmerman, 2022-08-26. In this expanded edition of his 2002 book, Zimmerman surveys how battles over public education have become conflicts at the heart of American national identity. *Critical Race Theory: The 1619 Project*. Mask mandates. As the headlines remind us, American public education is still wracked by culture wars. But these conflicts have shifted sharply over the past two decades, marking larger changes in the ways that Americans imagine themselves. In his 2002 book *Whose America?*, Zimmerman predicted that religious differences would continue to dominate the culture wars. Twenty years after that seminal work, Zimmerman has reconsidered arguments over what American history is, what it means, and how it is taught, have exploded with special force in recent years. In this substantially expanded new edition, Zimmerman meditates on the history of the culture wars in the classroom and on what our inability to find common ground might mean for our future.

War, Nation, Memory Keith A. Crawford, Stuart J. Foster, 2007-12-01. The Second World War stands as the most devastating and destructive global conflict in human history. More than 60 nations representing 1.7 billion people, or three quarters of the world's population, were consumed by its horror. Not surprisingly, therefore, World War II stands as a landmark episode in history education throughout the world, and its prominent place in school history textbooks is almost guaranteed. As this book demonstrates, however, the stories that nations choose to tell their young about World War II do not represent a universally accepted truth about events during the war. Rather, wartime narratives contained in school textbooks typically are selected to instill in the young a sense of national pride, common identity, and shared collective memory. To understand this process, *War, Nation, Memory* describes and evaluates school history textbooks from many nations deeply affected by World War II, including China, France, Germany, Japan, USA, and the United Kingdom. It critically examines the very different and complex perspectives offered in many nations and analyses the ways in which textbooks commonly serve as instruments of socialisation and, in some cases, propaganda. Above all, *War, Nation*

Memory demonstrates that far from containing neutral knowledge history textbooks prove fascinating cultural artefacts consciously shaped and legitimated by powerful ideological cultural and sociopolitical forces dominant in the present A *Study of the Secondary School History Curriculum in Chile from Colonial Times to the Present* Carmen Gloria Zúñiga, Tom O'Donoghue, Simon Clarke, 2015-02-03 The focus of this book is on the secondary school history curriculum in Chile from colonial times to the present By way of background attention is paid to the development of the history curriculum in the three countries which have most influenced educational developments in Chile namely England the United States of America and Spain The academic literature on the history curriculum throughout the English speaking and Latin speaking world especially on the purposes attached to history as a school subject and the variety of pedagogical approaches prescribed is also considered The results of a project that addressed the following interrelated research questions are then outlined What is the historical background to the current secondary school history curriculum in Chile What are the current developments of the secondary school history curriculum in Chile What are the issues of concern for secondary school history teachers in Chile At various times the teaching of the subject ranged from being in the great tradition approach emphasizing teacher centred activities and repetition of content knowledge to being in the new history tradition emphasizing the promotion of active learning student centred activities and the encouragement of the historical method of enquiry The analysis also details current issues of concern for teachers regarding the implementation of the current curriculum framework for secondary school history The book concludes with a consideration of implications for practice in areas pertaining to curriculum development teaching and learning management and administration teacher preparation and professional development practices in Chile **The Portuguese Colonial War and the African Liberation Struggles** Miguel Cardina, 2023-09-14
