## **Social Model Alcohol Recovery An Environmental Approach:**

*Research on Alcoholics Anonymous and Spirituality in Addiction Recovery* Marc Galanter, Lee Anne Kaskutas, 2008-12-05  
It was once taken for granted that peer assisted groups such as Alcoholics Anonymous had no real value in recovery from addiction. More recently, evidence-based medicine is recognizing a spiritual component in healing, especially when it comes to addiction. The newest edition of *Recent Developments in Alcoholism* reflects this change by focusing on the 12-step model of recovery as well as mindfulness meditation and other spiritually oriented activity. More than thirty contributors bring together historical background, research findings, and clinical wisdom to analyze the compatibility of professional treatment and nonprofessional support, day-to-day concepts of relapse prevention, the value of community building in recovery, and much more. Among the topics covered: 1. How and why 12-step groups work 2. The impact of the spiritual on mainstream treatment 3. The impact of AA on other nonprofessional recovery programs 4. AA outcomes for special populations 5. Facilitating involvement in 12-step programs 6. Methods for measuring religiousness and spirituality in alcohol research. Whether one is referring clients to 12-step programs or seeking to better understand the process, this is a unique resource for clinicians and social workers. Developmental psychologists too will find it useful. Volume 18 *Research on Alcoholics Anonymous and Spirituality in Addiction Recovery*, a worthy successor to the series. **Recovery Monographs Volume II** William White, 2015-11-06  
The addiction treatment field is reaching a tipping point that is revolutionizing the ways that behavioral health leaders think about people with alcohol and other drug problems and how services and systems are developed. *Recovery Management: Recovery-Oriented Systems of Care* contains six monographs by renowned recovery advocate William L. White and colleagues. These monographs provide insight and analysis of the topics important to today's addiction counselors and recovery coaches: recovery-oriented systems of care, recovery management, peer-based recovery services, and treating addiction as a chronic condition that requires ongoing management. **Social Model Alcohol Recovery** Sandra Shaw, Thomasina Borkman, 1990

*Community Demonstration Grant Projects for Alcohol and Drug Abuse Treatment of Homeless Individuals*, 1992

**Environmental Practice in the Human Services** Bernard Neugeboren, 2013-01-11  
*Environmental Practice in the Human Services* points to the need for the human services to return to their historic mission of environmental change. It moves beyond the more general conceptual emphasis on person in environment toward the development of an environmental practice technology based on an intervention model which prescribes specific micro and macro roles and functions. It may open the way to recapturing the conceptual breadth which characterized the first 40 years of social work as a professional and occupational entity. The ecological perspective in social work has fostered an interest in the impact of social environments on service consumers. *Environmental Practice in the Human Services* tries to rectify the historical imbalance in the human services that has emphasized people-changing methods, giving secondary emphasis to environmental change. It instructs students preparing for practice in the human services as well as agency practitioners in the knowledge and skills

necessary in environmental practice Cases in environmental practice are used to illustrate how these skills are utilized in actual practice situations The book s scope includes practice at the direct service administration planning and social policy levels it integrates micro and macro practice and shows how these two levels of practice are interdependent This enables human service practitioners to create and or modify social environments to enhance the functioning of clients being served in human service programs Topics covered include important skills in environmental practice including decisionmaking negotiating and leadership community practice and resource coordination social support the impact of organizational environments on practice environmental practice for the chronically disabled Author Neugeboren s approach is unique in its in depth focus on environmental practice applying concepts of social environment to specific practice roles This practice specific content which provides tools needed for environmental practice is in contrast to existing texts on the social environment which are very theoretical and not integrated with practice He includes material from the field of social ecology which has not been included in existing texts It shows how practitioners and administrators planners and policymakers can facilitate and support each other s work Reading *Environmental Practice in the Human Services* will enlighten students and practitioners with specific skills for impacting on different social environments to enhance client benefit It tells how a direct service practitioner can determine which organizational environments are suitable for particular client needs in making agency referrals It also provides administrators with information about designing planning and managing agencies with functional organizational environments which achieve effective services

*A Bridge to Recovery* Robert L. DuPont, John P. McGovern, 1994 Twelve step programs are revolutionizing and reshaping our thinking about and treatment of addiction Because these programs are based in the community instead of in an institutional or academic setting they often employ techniques and language that can be confusing and alien to health care professionals Written in a clear easy to understand style this book explores these programs and provides a guide on how to integrate them into ongoing human services Written by internationally renowned experts *A Bridge to Recovery An Introduction to 12 Step Programs* includes up to date information to bridge the gap between mutual aid programs human services and the professional community This practical book is designed to assist with the implementation of these programs into routine practice while providing a useful reference for academic and educational professionals

*Broadening the Base of Addiction Mutual Support Groups* Jeffrey Roth, William White, John Kelly, 2016-04-08 Mutual help groups have proliferated diversified and adapted to emerging substance related trends over the past 75 years and have been the focus of rigorous research for the past 30 years This book reviews the history of mutual support groups for addiction that have arisen as adjuncts or alternatives to Twelve Step Programs including secular mutual support groups like Secular Organization for Sobriety Smart Recovery and Women for Sobriety and faith based mutual support groups like Celebrate Recovery It also considers the mutual support groups attended by families and friends of addicts These mutual support groups are examined in terms of their histories theoretical

underpinnings and intended communities The structures common in mutual support groups have influenced the rise of a new recovery advocacy movement and new recovery community institutions such as recovery ministries recovery community centers sober cafes sober sports clubs and recovery focused projects in music theatre and the arts This volume explores how collectively these trends reflect the cultural and political awakening of people in recovery and growing recognition and celebration of multiple pathways of long term addiction recovery This book was originally published as a special issue of the Journal of Groups in Addiction and Recovery

*Treatment of the Chemically Dependent Homeless* Kendon J. Conrad, Cheryl I. Hultman, John S. Lyons, 1993 Develop new programs or improve existing programs with these helpful descriptions of theoretical foundations and practical implementation of innovative projects

*Treatment of the Chemically Dependent Homeless* presents fourteen projects funded by the National Institute on Alcohol Abuse and Alcoholism NIAAA in cooperation with the National Institute on Drug Abuse NIDA that were designed to develop strategies to combat the dual problems of homelessness and substance abuse and then analyze program effectiveness Contributors describe projects occurring in a variety of major cities and focus on the theory behind each program and its practical implementation Treatment professionals seeking new directions for their own programs will benefit from chapters that compare conventional services with new innovative treatments They also demonstrate how the new programs will effectively meet the needs of the target population and fill the gaps where current services fail

*Treatment of the Chemically Dependent Homeless* presents detailed discussions of each program s theoretical foundation design and implementation that will be invaluable to clinicians and researchers needing information about the complex nature of various experimental interventions The book begins by presenting an overview of the background and rules of the NIAAA Cooperative agreement The subsequent chapters follow a logical sequence by concentrating on one or two of the following aspects of program development theory of treatment local political and social milieus special populations outreach strategies relapse and retention issues residential care programs case management transition to independence Doctors nurses psychologists social workers substance abuse counselors and researchers who treat or study the chemically dependent homeless will value this groundbreaking information for studying developing and improving their own treatment programs Teachers who seek to educate their classes regarding state of the art service provision for homeless substance abusers will also find this an essential resource for innovative ideas and practical examples of program implementation

The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social. The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy. The latter may indeed be true but we cannot use what we do not know and must use what we do know. We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients. If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary. If this is true then probably most of this book has validity. With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series *The Biology of Alcoholism*. As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work.
