**Social Representations** Serge Moscovici, 2001 Considered the leading contemporary European social psychologist for his groundbreaking work on social influence and crowd psychology Serge Moscovici has played a definitive role in shaping the trajectory of modern social inquiry Bringing together the key texts in which he outlines and defines his benchmark theory of social representations including several essays never previously published in English his indispensable sourcebook illustrates the enormous range and scope of Moscovici's work Moscovici purports a theory of social representations remarkably distinct from the dominant themes in contemporary U S social psychology In contrast to the traditionally individualistic emphasis Moscovici's work is embedded in a broader social and cultural tradition and is passionately concerned with the social context in which meaning is constructed and lives are enacted His radical and lucid approach offers fresh and multifarious ways of seeing the world while his clear and coherent perspective provides a rich contribution to a discipline which has been notoriously fragmented Addressing contemporary social phenomena rather than being trapped within the artificial limits of laboratory experimentation Moscovici draws upon the diverse traditions of the wider social sciences making him a primary voice within the community of social theorists Sure to fascinate any researcher scholar student or practitioner of social psychology Social Representations provides a representative and long overdue collection of Moscovici's unique and important work

Transforming Social Representations S. Caroline Purkhardt, 2015-06-19 Common sense by definition is familiar to us all Science for some of us is more remote yet it is not always clear what the connections are between these two ways of seeing the world In this title originally published in 1993 the author explores several related themes in social psychology to elucidate the way we understand the social construction of knowledge and the

means by which we change social reality From the perspective of a critique of social representations theory the author argues that this necessitates a change of viewpoint from the individualistic and mechanistic assumptions of Cartesian science to the social and evolutionary perspective of a Hegelian framework This not only emphasizes the cultural and historical dimensions of social phenomena but also illuminates the social and dynamic nature of individuals As a consequence the discipline of social psychology must itself be transformed recognizing the active participation of scientists in the social construction of scientific knowledge This title will be of interest to those working in social psychology history and philosophy of science and sociology

[Madness and Social Representations](#)

Denise Jodelet,1991-01-01 A striking account of a colony for the mentally ill that forces a reconsideration of madness in society What happens when the mentally ill are not isolated from society but are instead welcomed into it and invited to take a place in the fabric of the community Are fear and rejection replaced by the understanding and sympathy often engendered by familiarity Or are the barriers between the sane and the mad only strengthened We have experienced a taste of this scenario in the U S in the last decade with the new emphasis on de institutionalization but Denise Jodelet takes us to an extraordinary community in France where the mentally ill have assumed a visible and prominent role for more than seventy years The small French town of Ainay le Chateau and its environs are the site of a family colony for men established in 1900 Here the patients lodgers live with ordinary families foster parents hold jobs and are free to move about the countryside Jodelet's chronicle of daily life in the colony is made rich and vivid by extensive ethnographic material as she unravels a complex set of relationships ultimately finding that while some of the barriers between the other and the larger society have

**Disability and Social Representations Theory** Vinaya Manchaiah, Berth Danermark, Per Germundsson, Pierre Ratinaud, 2019-05-30 Disability and Social Representations Theory provides theoretical and methodological knowledge to uncover the public perception of disabilities Over the last decade there has been a

significant shift from body to environment and the relation between the two when understanding the phenomenon of disabilities. The current trend is to view disabilities as the outcome of this interaction in short from a biopsychosocial perspective. This has called for research based on frameworks that incorporate both the body and the environment. There is a great corpus of knowledge of the functions of a body and a growing corpus of environmental factors such as perceptions among specific groups of persons towards disabilities. However there is a lack of knowledge of the perception of disabilities from a general population. This book offers an insight into how we can broaden our understanding of disability by using Social Representations Theory with specific examples from studies on hearing loss. The authors highlight that attitudes and actions are outcomes of a more fundamental disposition i.e. social representation towards a phenomenon like disability. This book is written assuming the reader has no prior knowledge of Social Representations Theory. It will be of interest to all scholars, students and professionals working in the fields of disability studies, health and social care and sociology.

*Social Representations for the Anthropocene: Latin American Perspectives* Clarilza Prado de Sousa, Serena Eréndira Serrano Oswald, 2021-04-30. The Anthropocene has become a field of studies in which the influence of human activity on the Earth System and nature is both the main threat and the potential solution. Social Representations Theory has been evolving since the 1960s. It links knowledge and practice in everyday life and is an effective way to deal with systemic crises based on common sense. This book assembles key contributions by Latin American scholars working with social representations in the social sciences that are of conceptual relevance to the study of the Anthropocene and that investigate the societal consequences of complex interrelations between common sense and topics of global relevance such as the contradictions of sustainable development, the construction of risks beyond risk perception, health negotiation and governance in the field of education, gender equality, the usefulness of longitudinal and systemic ethnography and case studies and agency, and the link between inequality, crises and risk society in the context of COVID 19, presenting theoretical and methodological innovations from Spanish, Portuguese and French research that have rarely been available in English. This is the first book to address the relevance of Social Representations Theory for the Anthropocene as a societal era. It presents the multidisciplinary scope of Social Representations. This book covers emerging research contributions in Social Representations Theory from Latin America. This book presents innovative research and commentaries by established researchers in the field. This multidisciplinary book should be in the libraries of many disciplines in the social sciences and humanities.
