Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume that will forever change how we look at

this important subject Castle brings together the writings of eminent scholars from several disciplines and varying

backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misquided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life Cornell University Announcements Cornell University, 1925 History of Domestic and Foreign Commerce of the United States: The fisheries Emory Richard Johnson, Thurman William Van Metre, Grover Gerhardt Huebner, David Scott Hanchett, 1915 University of Illinois Studies in the Social Sciences, 1929 Trust and Corporation Problems Henry Rogers Seager, Charles Adams Gulick, 1929
