Marshall, Hans-Peter Müller, 2006

The Encyclopedia of Social Theory contains over 500 entries varying from concise definitions of key terms and short biographies of key theorists to comprehensive surveys of leading concepts debates themes and schools The object of the Encyclopedia has been to give thorough coverage of the central topics in theoretical sociology as well as terms and concepts in the methodology and philosophy of social science Although 106 theorists are given entries the emphasis of the work is on the elucidation of ideas rather than intellectual biography The Encyclopedia covers the leading contemporary domains of debate on social theory and the classical legacies of social thinkers from the nineteenth and early twentieth centuries giving proper balance to both the European and North American traditions and to important new developments in the global self understanding of sociology Social theory has become one of the most vigorous specialisms of sociology in recent years This is in part due to the considerable overlaps of social theory with other disciplinary areas such as cultural and media studies anthropology and political theory and to the cross disciplinary nature of theoretical approaches such as feminism and psychoanalysis and new fields such as postcolonial studies The editors have therefore worked to produce in the Encyclopedia of Social Theory a first call reference for students and researchers across the social sciences and humanities with an interest in contemporary theory and the modern history of ideas The Encyclopedia has been authored by leading international specialists in the field under the direction of a well balanced editorial team It is comprehensively cross referenced and all larger entries carry bibliographies There is a full index      **Relocation, Gender and Emotion** Sue Jervis, 2018-04-17 This

book has two main aims firstly to provide a rare detailed description of the use of a psychoanalytically informed reflexive research method to achieve an in depth understanding of social phenomena and secondly to throw some much needed light onto the complex intrapsychic and interpersonal influences that impact upon military wives who accompany members of the British Armed Forces to postings overseas These arguments are particularly relevant at a time when the military is over stretched given that unhappy wives can adversely affect the retention of servicemen This is an important contribution to the

*Deconstructing Happiness* Jordan McKenzie, 2016-03-10 This book offers an original account of the good life in late modernity through a uniquely sociological lens It considers the various ways that social and cultural factors can encourage or impede genuine efforts to live a good life by deconstructing the concepts of happiness and contentment within cultural narratives of the good life While empirical studies have dominated the discourse on happiness in recent decades the emphasis on finding causal and correlational relationships has led to a field of research that arguably lacks a reliable theoretical foundation *Deconstructing Happiness* offers a step toward developing that foundation by offering characteristically sociological perspectives on the contemporary fascination with happiness and well being In doing so it seeks to understand the good life as a socially mediated experience rather than a purely personal or individually defined way of living The outcome is a book on happiness contentment and the good life that considers the influence of democracy capitalism and progress while also focusing on the more theoretical challenges of self knowledge reason and interaction

**Re-thinking Contemporary Political Behaviour** Sadiya Akram, 2019-02-07 Proposing a novel approach to understanding the contemporary political landscape Akram draws on the work of Pierre Bourdieu and Margaret Archer on agency and argues the need for an in depth engagement with concepts of agency to improve the reach and scope of political analysis Is the way that people engage with politics changing If so how well equipped are we to document and explain the extent and range of the ways in which people are engaging in politics today This book tackles these questions through a blend of theoretical reflection and empirical research shedding new light on the relationship between arena and process definitions of politics and how the social relates to the political Hitherto unexplored features of agency such as the unconscious and the internal political conversation are shown to be critical in exploring how people mobilise today and how

they make sense of their political engagement Two in depth case studies of the internal political conversations that individuals hold as well as an analysis of the 2011 UK riots are presented Making a case for the role of self expression in politics this book will be of use for graduates and scholars interested in British politics political theory social theory political sociology the theory and practice of political engagement and political behaviour
