Social Trust And The Management Of Risk:

Social Trust and the Management of Risk George Cvetkovich, 2013-12-16 Social trust is a crucial issue to many aspects of modern society Policy makers continually aspire to winning it and corporations frequently run the risk of losing it The trust deficit raises vital questions and problems to which until recently there have been few answers or solutions Experts from both sides of the Atlantic explore the importance for trust of various influences from individual perceptions to organizational systems and consider the conditions involved in building or undermining trust Several authors examine practical hazard management issues including medical vaccination programmes and popular participation in pollution control and waste management as strategies for enhancing social trust This book provides insightful analysis for researchers and students of environmental and social sciences and is essential reading for those engaged in risk management in both the public and private sectors

Social Trust and the Management of Threatened and Endangered Species George Cvetkovich, 2002 Social trust the willingness to rely on those with formal responsibility to develop policies and make decisions facilitates effective management of environmental issues including wildlife management National polls suggest that the public trusts government agencies to solve environmental problems yet such trust is low or non-existent in areas of controversy such as the protection of threatened and endangered species This study explored the role of social trust in understanding views of threatened and endangered species management in the National Forests of southern California The 127 participants surveyed lived in or near a National Forest or were recreational and or other users of the National Forest The results suggest that trust in Forest Service management of wildlife relates to perceived similarity between individual values regarding species protection and Forest Service values Participants who believe the Forest Service shares their values have a high trust those who believe the Forest Service does not share their values have a low trust The most trusting tend to believe that species protection should be the primary principle guiding forest management and that the Forest Service consistently operates according to these principles Those low in trust believe forest management should be based on the fulfillment of human needs they perceive that the Forest Service operates inconsistently according to their values The study suggests that social trust is a significant predictor of approval of species management practices

General Technical Report NRS-P, 2006 **Proceedings of the 2006 Northeastern Recreation Research Symposium**, 2007 Risk Conundrums Roger E. Kasperson, 2017-07-14 A risk conundrum can be viewed as a risk that poses major issues in assessment and whose management is not easily engaged. Such perplexing problems can either paralyze or badly delay risk analysis and directions for progression. Rather than simply focusing on the progress in risk analysis that has already been made, it is crucial to consider what has been learnt about these seemingly unmanageable problems and how best to move forward. *Risk Conundrums* seeks to answer this question by bringing together a range of key thinkers in the field to explore key issues such as risk communication, uncertainty, social trust, indicators and metrics, and risk management drawing upon case study examples including natural disasters, terrorism and energy transitions. The initial chapters address risk conundrums, their properties and the challenges they pose. The book then turns to a greater emphasis on systemic and regional risk conundrums. Finally, it considers how risk management can be changed to address these unsolvable conundrums. Alternative pathways are defined and scrutinized and predictions for future developments set out. This book will be of great interest to students and scholars of risk governance, environmental policy and sustainable development.
