Socialism David Goldstein,1903 **Structure, Agency and Theory** Ib Gram-Jensen,2021-04-20 Structure Agency and Theory challenges common readings of Marx and Engels historical materialism and argues the necessity of abandoning their conception of the dialectic of forces and relations of production as the motive power of historical development and transformations because of its doubtful validity and deterministic implications Instead another fundamental conception in historical materialism the interaction between social circumstances and agency as the motive power of history is accentuated with an emphasis on agents experiences as a causal factor arguing its potential in terms of historical explanation and attempting to spell out some of its strategic implications for revolutionary socialism *Gramsci, Political Economy, and International Relations Theory* A. Ayers,2008-11-10 This book seeks to provide the most comprehensive and sustained engagement and critique of neo Gramscian analyses available in the literature In examining neo Gramscian analyses in IR IPE the book engages with two fundamental concerns in international relations i The question of historicity and ii The analysis of radical transformation *The Outlook* ,1911 *Being and Worth* Andrew Collier,2005-08-03 Being and Worth argues that beings both in the natural and human worlds have worth in themselves by extending recent depth realist philosophy to the question of values **London Municipal Notes** ,1909 The Conceptual Change of Conscience Ville Erkkilä,2019-03-05 How did the drastic experiences of the turbulent twentieth century affect the works of a legal historian What kind of an impact did they have on the ideas of justice and rule of law prominent in legal historiography Ville Erkkilä analyses the way in which the concepts of Rechtsgewissen and Rechtsbewusstsein evolved over time in the works of the prestigious legal historian Franz Wieacker With the help of previously unavailable sources such as private correspondence the author reveals how Franz Wieacker s personal experiences intertwined in his legal historiography with the tradition of legal science as well as the social and political destinies of twentieth century Germany **Public Theology and Civil Society: Constructive Formation** Paul S. Chung,2022-03-28 In Public Theology and Civil Society author Paul S Chung charts the political history of modern democracy and social contract to define the role of Christian public theology in the post

colonial era Capturing the thought of Rousseau Kant and Rawls in reference to the dialectical theory of Hegel and Marx Chung forges a new model of public theology for today s society Engaging in an expansive conversation with the thought of major figures in philosophy political economy and theology Paul Chung articulates a compelling argument for a public theology that takes seriously our postcolonial context Chung s prophetic perspective critiques the hierarchical structures and social stratification that threaten civil society upholding the values of justice democracy and peace among the religions This book constructs a public theology that engages diverse public spheres toward the creation of a more equitable and diverse society Craig L Nesson Professor of Contextual Theology and Ethics Wartburg Theological Seminary Dubuque Iowa How does political and emancipatory public theology look and function in post colonial reality Dr Chung makes a resounding case for Christian public theology as explicitly ethical theology Dr Chung s excavation of some of the root causes and frameworks of oppression invites deep and theologically informed engagement in the affairs of the world Kirsi Stjerna Los Angeles Southwest California Synod Professor of Lutheran History and Theology Pacific Lutheran Theological Seminary of California Lutheran University A Catechism of Individualism Henry Wilson (M.A.),1902 **Science, Technology, and National Socialism** Monika Renneberg,Mark Walker,2003-09-25 This 1993 book provides a survey of the development of scientific disciplines and technical projects under National Socialism in Germany Each contribution addresses a different aspect which is important for judging the interaction between science technology and National Socialism In particular the personal conduct of individual scientists and engineers as well as the functionality of certain theories and projects are examined All essays share a common theme continuity and discontinuity All authors cover a period from the Weimar Republic to the post war period This unanimity of approach provides answers to major questions about the nature of Hitler s regime and about possible lines of continuity in science and technology which may transcend political upheaval The book is also the most comprehensive to date on this subject and includes essays on engineering geography biology psychology physics mathematics and science policy Nation-States Neil Davidson,2016-05-30 In his latest collection of essays Neil Davidson brings his formidable analytical powers to bear on the concept of the capitalist nation state Through probing inquiry Davidson draws out how nationalist ideology and consciousness is used to bind the subordinate classes to the nation while simultaneously using the state as a means of conducting geopolitical competition for capital Explaining Global Poverty Branwen Gruffydd Jones,2007-01-24 Gruffydd Jones approach brings a book of real relevance for inequality in the modern world and gives an important platform from which to move forwards in the fight against poverty **The Larger Aspects of Socialism** William English Walling,1913 **The Argumentative Turn in Policy Analysis and Planning** Frank Fischer,John Forester,1993 Drawing upon the work of such theorists as Foucault Habermas Toulmin and Wittgenstein this book brings recent work on language and argumentation to bear on the practical concerns of policy analysis and planning The European and US contributors to the book examine the interplay of language action and power in terms of both applied

policy and theoretical debates Emphasizing the political nature of the work of planners and policy makers the book stresses the role of persuasive arguments in practical decision contexts Recognizing the rhetorical communicative character of planning and policy deliberations the writers demonstrate that policy arguments are necessarily selective both shaping and being shaped by power relations
