**Society, a Macroscopic View** Maurice N. Richter, 1980      *Core Sociological Dichotomies* Chris Jenks, 1998-08-24 In this sociology text the contributors provide an introduction to the subject without over simplifying or writing down to their audience The book aims to furnish undergraduates with the knowledge that will help them to understand and practice sociology and also to develop a self perpetuating sociological imagination to enable them to think through new issues and new problems It consists of a series of specially commissioned chapters around binary or dichotomous themes Although many sociologists are critical of dichotomous models of sociological theory and research the device crops up again and again in the history and practice of the subject Jenks and his colleagues use the dichotomies to situate students in current

**Technology and Social Complexity** Maurice N. Richter, 1983-06-30 *Technology and Social Complexity* explores the continuities between today's incredibly powerful new technology and the simpler technologies of the past It shows that the diverse phenomena encompassed by the term technology can be analyzed coherently within the framework of the same concept This book provides a broad historical and comparative perspective within which the complex relationships between technology and society can be more clearly understood Topics discussed include the concept of technology social evolution and other forms of social change characteristics of technology in societies of different types and the sources directions and implications of technological progress      *Zionism* Nathan Rotenstreich, 2012-02-01 In *Zionism* the late Nathan Rotenstreich traces the dialectical connections between Zionism's past and present based on his contention that the Jewish nation comprises both the State of Israel and the Diaspora He also addresses relations between both Israel and the Diaspora on the one hand and Israel and the Arab world on the other Written a short time before Rotenstreich's death *Zionism* can be regarded as his spiritual and ideological legacy      **Technology, Values, and Society** Mitra Das, Shirley Kolack, 2008

Technology is not value free nor does it exist in a vacuum It needs a social basis technology is affected by society and influences it *Technology Values and Society* illustrates this using an examination of cross cultural case studies representing simple intermediate and complex societies Certain forms of technology exist when conducive values and structures sustain them However this relationship is not one way Technological changes do precipitate social and value changes It is impossible to sustain egalitarian values in a society involving technology based on hierarchical relationships Understanding this connection is vital if we are to keep some control over the way in which technology affects us This revised edition brings the topic to life for both faculty and students      **Society as an Interaction Space** Hanna Lehtimäki, Petri Uusikylä, Anssi

Smedlund, 2020-02-29 As digitalization and social media are increasingly blurring the boundaries between traditional societal political and economic institutions this book provides a cross disciplinary examination of value co creation From various standpoints it examines how institutions contribute to service ecosystems and how digitalization is transforming value co creation in these ecosystems Further the book shares new perspectives on relational dynamics among government

companies and citizens These insights fill the gaps between service science and political science by integrating institutional logics into the concept of value co creation The book subsequently examines society as an interaction space Topics discussed include the new logic and transformation mechanisms of economic activities citizen participation governance and policy making in the face of technological innovations market based reforms and the risk of disconnect between citizens and policy making Here the focus is on value co creation in complex adaptive systems where institutions individuals and businesses negotiate value and interests in networked relations In closing the book presents a range of empirical case studies on value co creation which provide examples of active networked citizenship innovative governance and policy making democratic leadership and trust building dialogue among institutions The studies address the context of Nordic countries recognized as world leading democracies Pursuing a systems approach the book articulates a social reality composed of interacting and interconnected elements that cannot be captured with only micro or macro levels of analysis Service ecosystems are considered as configurations of people and technologies embedded in institutionalized rules cultural meanings and practices offering valuable insights into the service centered view of markets and society Given the breadth and depth of its coverage the book offers a valuable resource for all students and scholars interested in understanding and envisioning the future democratic landscape

**New Directions in Theory and Methodology in Socialsciences** Baidya Nath Varma,1993

**The Epochal Nature of Process in Whitehead's Metaphysics** F. Bradford Wallack,1980-01-01 While my book attempts to reflect the full range of scholarly debate I have also attempted to make it useful to anyone interested in Whitehead To this end I have introduced the Whiteheadian terms one by one explaining each in the light of my interpretation and I have used examples wherever possible I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions and that he did not intend it to be relegated to purely abstract or esoteric application F Bradford Wallack The twentieth century has seen the greatest innovations in philosophical cosmology since Newton and Descartes and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways In a book that will be controversial in the philosophical community F Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace Specifically she proposes a thorough revision of accepted interpretations of Whitehead s concept of the actual entity Wallack then elucidates Whitehead s ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality Whitehead s philosophy then emerges as more intelligible and cohesive than is generally believed

**The Micro-macro Link** Jeffrey C. Alexander,1987-01-01 The work of fifteen nationally and internationally known theorists in sociology this volume demonstrates an exciting new trend in sociological thinking Each essay proposes a link between the two distinguishable traditions of sociological theory the microscopic which stresses the

self and the interaction among persons and the macroscopic which concentrates on the institutional cultural and societal levels Each mode of analysis has had its champions and the proponents of each have often taken positions of polemic opposition to one another
