Sociobiology Of Ethnocentrism:

The Sociobiology of Ethnocentrism: Evolutionary Dimensions of Xenophobia, Discrimination, Racism and Nationalism Vernon Reynolds, V. S. E. Falger, Ian Vine, 1987 *The Sociobiological Imagination* Mary Maxwell, 1991-09-19

This book presents reports on the uses of sociobiology and general evolutionary theory by members of diverse disciplines psychiatry law management theory anthropology economics primatology history political science ethical philosophy cognitive psychology epistemology socioecology of religion studies of conflict Marxist thought aesthetics sociology linguistics and psychology The purpose of the book is threefold to acknowledge the remarkably wide influence of a central idea to demonstrate that the research of human sociobiology takes place in disparate fields and to introduce the major principles of sociobiology There are many surprises to be found in these pages not least the psychiatrist's new look at anxiety the management theorist's explanation for the success of Japanese firms the Soviet philosopher's report on sociobiology in the U S S R the explanation given for the keeping of harems in ancient kingdoms and the economist's view as to why people care if a bargain price is really a fair price all cast in sociobiological terms Handbook of Global Social Policy Stuart Nagel, 2019-09-16

Discussing how to use public policy to improve the quality of life for those at the bottom of the social hierarchy this text makes the case for policy that expands employment and facilitates jobs finances education and economic and cultural integration rewards merit and encourages voting and political participation Political scientists from around the world measure the effect of democratization religion ethnicity race and mass media on internal conflict during the initial post Cold War period in Africa Asia Europe and Latin and North America Some topics include the role of mass communication on Egyptian family planning Russian nationalism and the Guatemalan peace process Modern Hatreds Stuart J. Kaufman, 2015-05-26

Ethnic conflict has been the driving force of wars all over the world yet it remains an enigma What is it about ethnicity that breaks countries apart and drives people to acts of savage violence against their lifelong neighbors Stuart Kaufman rejects the notion of permanent ancient hatreds as the answer Dissatisfied as well with a purely rationalist explanation he finds the roots of ethnic violence in myths and symbols the stories ethnic groups tell about who they are Ethnic wars Kaufman argues result from the politics of these myths and symbols appeals to flags and faded glories that aim to stir emotions rather than to address interests Popular hostility based on these myths impels groups to follow extremist leaders invoking such emotion laden ethnic symbols If ethnic domination becomes their goal ethnic war is the likely result Kaufman examines contemporary ethnic wars in the Caucasus and southeastern Europe Drawing on information from a variety of sources including visits to the regions and dozens of personal interviews he demonstrates that diplomacy and economic incentives are not enough to prevent or end ethnic wars The key to real conflict resolution is peacebuilding the often overlooked effort by nongovernmental organizations to change hostile attitudes at both the elite and the grassroots levels Miscommunication C. David Mortensen, Carter M. Ayres, 1997-01-31

In this extensive study on the impact of factors

that enable or disable communication between people author C David Mortensen s helps us to discover that successful communication is a collective and collaborative achievement of the highest order Miscommunication progresses from a theoretical examination of the complex conditions that cause miscommunication to occur highlighting implication distortion disruption and confusion as specific categories and then moves on to more refined definitions and practical applications of the theory Mortensen includes succinct and engaging real life examples that enhance and fortify the author s highly original contribution to our knowledge of interpersonal communication Miscommunication takes a fascinating look at the way we communicate and makes a distinct contribution to understanding miscommunication and its remedies Highly recommended for students and practitioners in communication language and discourse interpersonal communication speech and social psychology

Welfare, Ethnicity and Altruism Frank Salter, 2013-03-07 Welfare Ethnicity and Altruism applies the controversial theory of Ethnic Nepotism first formulated by Iren us Eibl Eibesfeldt and Pierre van den Berghe to the modern welfare state both are authors in this volume This theory states that ethnic groups resemble large families whose members are prone to cooperate due to kin altruism Recent empirical findings in economics and political science offer confirmatory evidence The book presents two separate studies that compare welfare expenditures around the world both indicating that the more ethnically mixed a population becomes the greater is its resistance to redistributive policies These results point to profound inconsistencies within ideologies of both left and right regarding ethnicity

Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our

ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science International History Review A thoughtful book that can challenge some of our comfortable assumptions Journal of Military History Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College

Ethnic Conflict, Tribal Politics Kenneth Christie, 2020-11-25 There is an urgent need for a book which combines the approaches of political science sociology and history and particularly comparative politics with ethnic studies There are currently many rapid and significant changes taking place in the world political map in terms of ethnic conflict How do we explain these changes How do we analyse them How can we compare them How do we make sense of the different ethnic conflicts that have taken place since the end of the Cold War in what some observers have dubbed the New World Order Few books on the market combine the diverse approaches of political science sociology and history at any level of analysis This work will remedy at least some of the deficiencies in the existing literature and be truly interdisciplinary in nature

Morality among Nations Mary Maxwell, 1990-01-01 Morality among Nations a rejoinder to Hans Morgenthau's Politics among Nations offers a pathbreaking synthesis of sociobiology and international relations theory It shows that two different moralities evolved in human pre history one the standard morality from which abstract ethical principles arise concerning such things as obligation and justice and the other group morality or the proclamation of the group's right to survive and its superiority over other groups Part One surveys the philosophical literature on the question of international morality introducing arguments offered by both classical theorists such as Machiavelli Hobbes and Grotius as well as twentieth century writers such as Reinhold Niebuhr Hedley Bull Richard Falk and Charles Beitz Part Two presents the relevant sociobiological theories focusing on Robert Trivers work on the evolution of moral emotions and Richard Alexander's and Pierre van den Berghe's work on the evolution of group behavior and ethnocentrism Part Three analyzes the traditional philosophical work on international morality in light of new sociobiological ideas

Final Solutions Richard M. Lerner, R. C. Lewontin, Benno Muller-Hill, 2010-11 The nature nurture debate continues to stir controversy in the social and behavioral sciences How much of human behavior and development can be attributed to biology and how much to the environment Can either be said to determine human development And what are the implications of each view for society In this important study a noted developmental psychologist contributes to this debate by confronting the difficult issue of doctrines of human development and the consequences for society of deriving political programs and public policy from them Beginning with the premise that scientific ideas are not neutral but can be used for either good or evil Richard Lerner considers the recent history of one such idea biological determinism which at times has had the backing of respected scientists intellectuals and political leaders During this century biological determinism has been coupled with political philosophies that hold that some people are

inherently better than others This has meant that certain groups of people Jews Blacks Native Americans women have been stigmatized because of supposedly innate even biological differences with sometimes disastrous consequences The most notorious instance was Nazi Germany where racial science given legitimacy by the scientific community became a cornerstone of the Nazi Final Solution Meanwhile theories of biological determinism continue to find adherents within the scientific community Konrad Lorenz who was awarded a Nobel Prize in 1973 was a critical figure in the development of the most recent manifestation of biological determinism sociobiology Lerner examines the work of Lorenz and current sociobiologists and the implications of their claims for modern society He fears that biological determinism may again be co-opted to serve the political agenda of today's reactionary politicians In fact Lerner notes sociobiologists have had to face the fact that organizations such as the fascist National Front party in Britain and its counterparts in France and the United States have selectively seized upon sociobiology to fuel their notions of genetically superior and inferior races

Human Evolutionary Psychology Louise Barrett, Robin Dunbar, John Lycett, 2002-02-17 Why do people resort to plastic surgery to look young Why are stepchildren at greatest risk of fatal abuse Why do we prefer gossip to algebra Why must Dogon wives live alone in a dark hut for five days a month Why are young children good at learning language but not sharing Over the past decade psychologists and behavioral ecologists have been finding answers to such seemingly unrelated questions by applying an evolutionary perspective to the study of human behavior and psychology Human Evolutionary Psychology is a comprehensive balanced and readable introduction to this burgeoning field It combines a sophisticated understanding of the basics of evolutionary theory with a solid grasp of empirical case studies Covering not only such traditional subjects as kin selection and mate choice this text also examines more complex understandings of marriage practices and inheritance rules and the way in which individual action influences the structure of societies and aspects of cultural evolution It critically assesses the value of evolutionary explanations to humans in both modern Western society and traditional preindustrial societies And it fairly presents debates within the field identifying areas of compatibility among sometimes competing approaches Combining a broad scope with the more in depth knowledge and sophisticated understanding needed to approach the primary literature this text is the ideal introduction to the exciting and rapidly expanding study of human evolutionary psychology

The State and Ethnic Politics in SouthEast Asia David Brown, 2003-09-02 Ethnic tensions in Southeast Asia represent a clear threat to the future stability of the region David Brown's clear and systematic study outlines the patterns of ethnic politics in Burma Singapore Indonesia Malaysia Thailand The study considers the influence of the State on the formation of ethnic groups and investigates why some countries are more successful in managing their ethnic politics than others

The People's Peace Process in Northern Ireland C. Irwin, 2002-11-26 Many important lessons have come out of the negotiations for the Belfast Agreement This book explains how public opinion polls were used in support of the Northern Ireland peace process Significantly it was the politicians who decided the questions so that they could map out

areas of compromise and common ground that their supporters would accept This book explains how the work was done so that others can apply the benefits of this experience to their own peace building activities **Missing the Revolution**

Jerome H. Barkow, 2006 The naturalizing perspective of Darwinian thought has become one of the major intellectual currents of our time pervading contemporary understandings of human nature and society Unfortunately many social scientists in sociology psychology and sociocultural anthropology have failed to engage with it Barkow asks his fellow social scientists to put aside their all too common preconceptions and stereotypes of the biological and to consider a powerful argument that is far different from that of those who once invoked a vocabulary of genes and Darwin as a justification for genocide He argues that the theoretical perspective that has been so successful when applied to the behavior of every other animal species can be applied just as successfully to our own and that the real debate is about how to apply it **BOOK JACKET** *Violent Land*

David T. Courtwright, 2009-06-01 This book offers an explosive look at violence in America why it is so prevalent and what and who are responsible David Courtwright takes the long view of his subject developing the historical pattern of violence and disorder in this country Where there is violent and disorderly behavior he shows there are plenty of men largely young and single What began in the mining camp and bunkhouse has simply continued in the urban world of today where many young armed intoxicated honor conscious bachelors have reverted to frontier conditions Violent Land combines social science with an engrossing narrative that spans and reinterprets the history of violence and social disorder in America Courtwright focuses on the origins consequences and eventual decline of frontier brutality Though these rough days have passed he points out that the frontier experience still looms large in our national self image and continues to influence the extent and type of violence in America as well as our collective response to it Broadly interdisciplinary looking at the interplay of biological social and historical forces behind the dark side of American life this book offers a disturbing diagnosis of violence in our society **Racism in Contemporary America**

Uncertainty Steven M. Platek, Todd K. Shackelford, 2006-08-03 Although commonly believed that males are more promiscuous than females new research has revealed that female infidelity is a common occurrence throughout the animal

kingdom Female Infidelity and Paternal Uncertainty is the first book to address how males deal with the consequences of female infidelity and the strategies they have evolved to try to avoid the possibility of raising an offspring they unknowingly did not sire Each chapter deals with a specific evolved strategy developed to aid males in either limiting opportunities for their mate to be unfaithful or to correct the by products of infidelity should it occur With sections including mate guarding intra vaginal tactics and paternity assessment this book will appeal to researchers and graduate students in behavioral biology evolutionary psychology human sexuality anthropology sociology reproductive health and medicine *Narratives of Disparity* Rida Inam ,2018 Islam and the West are often identified as two distinct civilizations with conflicting characteristics Assuming that a clash between Islam and the West is not inevitable this study demonstrates that the divide is fabricated on both sides by Narratives of Disparity NoDs which are often built on historical narratives The interplay of history and fiction in NoDs is exhibited on four novels published in Britain after 9 11 covering the most frequently used tropes the postcolonial experience counterterrorism eurocentrism traditionalism honour killings and sexual autonomy **Holistic Darwinism** Peter Corning,2010-08-15 In recent years evolutionary theorists have come to recognize that the reductionist individualist gene centered approach to evolution cannot sufficiently account for the emergence of complex biological systems over time Peter A Corning has been at the forefront of a new generation of complexity theorists who have been working to reshape the foundations of evolutionary theory Well known for his Synergism Hypothesis a theory of complexity in evolution that assigns a key causal role to various forms of functional synergy Corning puts this theory into a much broader framework in Holistic Darwinism addressing many of the issues and concepts associated with the evolution of complex systems Corning s paradigm embraces and integrates many related theoretical developments of recent years from multilevel selection theory to niche construction theory gene culture coevolution theory and theories of self organization Offering new approaches to thermodynamics information theory and economic analysis Corning suggests how all of these domains can be brought firmly within what he characterizes as a post neo Darwinian evolutionary synthesis
