A Treatise in Phenomenological Sociology Carlos Belvedere,2022-03-03 A Treatise in Phenomenological Sociology Object Method Findings and Applications provides the first systematic approach to phenomenological sociology Carlos Belvedere claims that phenomenological sociology is a distinctive paradigm endowed with its peculiar object method and stock of knowledge He defines phenomenological sociology as a science dealing with the natural attitude of groups When it comes to its method he describes the actual centenary use of the epoch the eidetic variation and constitutional analysis in the practice of classical and contemporary social thinkers Finally he collects a wealth of precious findings in the history of phenomenological sociology which starts with the ego agens as the substratum of social life then goes on to consider higher level strata such as pragmata habitualities social personalities and institutions He argues that social behavior can take different forms subjective as well as objective because it can experience a wide range of transformations thanks to specific qualities of pragmata such as reiterableness and transferability

Time, Space, and Society A. Kellerman,2012-12-06 Time and space are two of the most basic dimensions of human life They envelop all human beings from birth to death As such they provide the context for human existence At the same time however time and space also serve as major influencing factors in mankind s actions Hence a vast literature has developed

on time and space as separate dimensions and recently on time space as joint dimensions Interestingly enough the social connotations of time and space have mostly been studied with the individual human being in mind The more societal significance of time and space whether separately or jointly have been relatively neglected It is the purpose of this volume to help fill this lacuna through discussions on some of the many junctions of time space and society at large The discussion will naturally involve concepts and findings from more than just one discipline notably geography sociology social history and political science It is thus obvious that the topic may be highlighted from several perspectives Given my own education and work the approach will lean more to the geographical perspective Geography has a special merit as an integrating framework for the study of time space and society It is a discipline that has space at the center of its *raison d'être* and as such has always striven for integration holism and comprehensiveness

Religious Interaction Ritual Scott Draper, 2019-02-12 This book is a microsociological study of religious practice based on fieldwork with Conservative Jews Bible Belt Muslims white Baptists black Baptists Buddhist meditators and Latino Catholics In each

case the author scrutinizes how a congregation's ritual strategies help or hinder their efforts to achieve a transformative spiritual encounter an intense feeling that becomes the basis of their most fundamental understandings of reality The book shows how these transformative spiritual encounters routinely depend on issues that can seem rather mundane by comparison such as where the sanctuary's entrance is located how many misprints end up in the church bulletin or how long the preacher continues to preach beyond lunchtime The spirit responds to other dynamics as well such as how congregations collectively imagine outsiders or how they talk about ideas like individualism and patriarchy Building on provocative theories from sociologists such as mile Durkheim Erving Goffman Randall Collins and Anne Warfield Rawls this book shows how interaction ritual theory opens compelling new pathways for sociological scholarship on religion Micro level specifics from fieldwork in Texas are supplemented with large scale survey analysis of a wide array of religious organizations from across the United States
