Essays on Approach and Method André Béteille, 2009-03-05 This collection reflects André Béteille's long career in teaching and research in a single institutional setting as a scholar of sociology. With a new introduction, two new essays and a new appendix, the second edition emphasizes that sociology as an intellectual discipline should be concerned more directly with the present than the past. Both the new essays complement the existing chapters in the book. Writing about sociology and current affairs in Chapter 2, Béteille makes a distinction between immediate return and delayed return research. Chapter 5 focuses on the important question of difference between the study of one's own society and the study of other cultures. The new appendix includes a conversation between the author and Surendra Munshi on a variety of themes. Together, the two appendices in the book reiterate the author's conviction that the study of one's own society gains from the insights derived from the study of other societies.

**Sociology** André Béteille, 2002 The ISA Handbook of Diverse Sociological Traditions Sujata Patel, 2009-10-21 A brilliant treasury of wisdom and insight drawn from leading sociologists throughout the world. It is a striking achievement of which the International Sociological Association can be very proud to have brought so many independent-minded scholars into so productive a dialogue. Dennis Smith, Professor of Sociology, Loughborough University. Twenty-nine chapters from prominent international contributors discuss, challenge, and reconceptualise the global discipline of sociology, evaluating the diversities within and between sociological traditions of many regions and nation-states. They assess all aspects of the discipline: ideas and theories, scholars and scholarship, practices and traditions, ruptures and continuities through an international perspective. The Handbook argues that diversities in sociological traditions can be studied at three levels. First, they need to be studied from multiple spatial locations: within localities, within nation-states, within regions, and the globe. Second, they need to be discussed in terms of their sociological moorings in distinct philosophies, epistemologies, and theoretical frames, cultures of science, and languages of reflection. Third, the intellectual moorings of sociological practices are extensive. The papers discuss the diverse and comparative sites of knowledge production and its transmission.

Sociological Perspectives on Globalisation Ajaya Kumar Sahoo, 2006 The work deals with an interesting collection of essays by specialists/scholars on different aspects of sociological perspectives on globalization. These essays, thirteen in number, discuss all relevant aspects of globalization at national and international level. The book will be of immense academic value to sociologists, social anthropologists, political, cultural, and ethnic studies, and transnational studies.

*Uprooting Geographic Thoughts in India* Rana Singh, David Sopher, Oskar Spate, 2009-03-26 Under the cultural turn and transformation, the new intellectual discourses started in the 21st century to search the roots have cross-cultural comparison and to see how the old traditions be used in the contemporary worldviews. This book is the first attempt dealing with roots of Indian geographical thoughts since its beginning in 1920. It emphasises identity of India and Indianness and consciousness among dweller geographers in India, development and status of geography and its recent trends, Gaia theory and Indian

Bhatia,2012-12-06 Located in the domain of cultural politics the book with rich ethnographical data from Mizoram a lesser known and understood state brings the community state and culture to centre stage along with family and stratification of the sociological discourse in education The book argues for a re look at school education in Mizoram besides providing critical insights into the North East region as a whole It also points to the dilemmas of development in that region and suggests possible ways out of the impasse Marking a significant departure from conventional thinking on education as human capital as reflected in North East Vision 2020 the book strongly advocates the need for critical pedagogies based on learning from conflict inculcating the values of tolerance and compassion as a precursor to peace reconceptualising development not merely as economic but as indicator of national happiness and valuing lives equally besides respect for traditional institutions

thus marking a break from the much resented paternalism that underpins all state interventions in education One of the first studies of its kind regarding experience and practice of education the book makes an important contribution to the role that education can play to usher in peace and promote respect for differences Classes of Labour Jonathan Parry,2020-03-20

Classes of Labour Work and Life in a Central Indian Steel Town is a classic in the social sciences The rigour and richness of the ethnographic data of this book and its analysis is matched only by its literary style This magnum opus of 732 pages an outcome of fieldwork covering twenty one years complete with diagrams and photographs reads like an epic novel difficult to put down Professor Jonathan Parry looks at a context in which the manual workforce is divided into distinct social classes which have a clear sense of themselves as separate and interests that are sometimes opposed The relationship between them may even be one of exploitation and they are associated with different lifestyles and outlooks kinship and marriage practices and suicide patterns A central concern is with the intersection between class caste gender and regional ethnicity with how class trumps caste in most contexts and with how classes have become increasingly structured as the structuration of castes has declined The wider theoretical ambition is to specify the general conditions under which the so called working class has any realistic prospect of unity

*From 'People' to 'Citizen'* Dipankar Gupta,2017-09-18 *From People to Citizen* brings together social theory with policy practice to enlarge our understanding of the difference that democracy makes to the life of a nation Unlike nationalism democracy takes our attention away from the past to the future by focusing on the specific concerns of citizenship Historical victories or defeats blood and soil are now nowhere as relevant as the creation of a foundational base where individuals have equal and quality access to health education and even urban services The primary consideration therefore is on empowering citizens as a common category and not people of any specific community or class When citizens precede all other considerations the notion of the public too gets its fullest expression Differences between citizens are not denied in fact encouraged but only after achieving a basic unity first This book argues that the call of citizenship not only advances democracy but social science as well Please note Taylor Francis does not sell or

The Value of Comparison Peter van der Veer, 2016-05-19 In The Value of Comparison Peter van der Veer makes a compelling case for using comparative approaches in the study of society and for the need to resist the simplified civilization narratives popular in public discourse and some social theory He takes the quantitative social sciences and the broad social theories they rely on to task for their inability to question Western cultural presuppositions demonstrating that anthropology's comparative approach provides a better means to understand societies This capacity stems from anthropology's engagement with diversity its fragmentary approach to studying social life and its ability to translate difference between cultures Through essays on topics as varied as iconoclasm urban poverty Muslim immigration and social exclusion van der Veer highlights the ways that studying the particular and the unique allows for gaining a deeper knowledge of the whole without resorting to simple generalizations that elide and marginalize difference
