Catalog of Pre-1900 Vocal Manuscripts in the Music Library, University of California at Berkeley John A.

Emerson, 2023-07-28 During the thirty five years from 1946 to 1981 the University of California Berkeley's Music Library amassed nearly 3 500 manuscript volumes thanks to the remarkable efforts of Professor Vincent H. Duckies. The Catalog of Pre 1900 Vocal Manuscripts focuses on the third major segment of the library's manuscript collection featuring over 700 vocal manuscripts with more than 3 300 separate compositions. These works encompass a wide range of musical styles religious and secular vocal and instrumental serious and popular and date from the eleventh to the late nineteenth century. Although the catalog does not include musical incipits it provides a valuable inventory of these manuscripts for scholars and researchers. The materials were acquired through various antiquarian dealers across Europe and the United States and while some background information may have been lost during transfers the manuscripts remain a rich resource for study. Emerson notes that the collection's value will ultimately be determined by the scholarly community whose research and exploration will continue to uncover the insights hidden within these historical documents. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact. Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology. This title was originally published in 1988.

Arias, Ensembles, & Choruses John Yaffé, David Daniels, 2011-11-17 Conductors John Yaff and David Daniels have created a one stop sourcebook for orchestras opera companies conductors and librarians who research and or prepare programs of vocal excerpts such as solos ensembles and choruses for concert performance. In this book readers will find detailed information on a vast repertoire of vocal pieces commonly extracted from operas operettas musicals and oratorios more than 1 750 excerpts from 450 parent works. Modeled on Daniels Orchestral Music Arias Ensembles Choruses includes basic historical details about each parent work as well as extract titles subtitles voice types keys durations locations in the original work with page numbers in both full scores and piano vocal scores and exact instrumentation. It also lists the publishers that make available the orchestral materials for just the excerpt being programmed independent of the full parent work. Until now conductors and orchestra librarians commonly had to first leaf through full scores searching for one elusive three minute aria after another only to then consult multiple publishers catalogues to compile crucial information on all the excerpts proposed for a concert or recording. This book constitutes a single source for finding that information. In many cases the individual entries include valuable insider information on common performance practice including start and stop points transpositions and conventional cuts. Searching for repertoire is made easy with the detailed title index and appendixes devoted to ensemble excerpts all categorized by personnel e.g. duets trios quartets quintets sextets choruses and language Czech English French German Italian Latin Russian. This book is the ideal tool for the working conductor and orchestral librarian as well as music

program directors at colleges and conservatories opera companies and symphony orchestras As of October 2015 a new printing of this book has occurred to correct errors in the index A PDF version of the new index is available to previous purchasers of the volume Please contact Rowman Littlefield's music editor for assistance
