Midlarsky,2000 Essays reflecting the most recent theoretically and empirically oriented research on international warfare *Terror on the High Seas* Yonah Alexander,Tyler Richardson,2009-09-03 A provocative new look at an important security topic examines terrorist threats and attacks on shipping and ports and provides strategies for safety Terror on the High Seas From Piracy to Strategic Challenge is a provocative look at maritime security and the steps that must be taken if terrorist threats are to be nullified From the Achille Lauro hijacking to the bombing of the USS Cole to attacks on shipping channels terrorists have employed a variety of tactics both successful and unsuccessful These have included the smuggling of arms and plots to bomb shipyards as well as attacks on Merchant Marine ships maritime offices fuel storage facilities and Navy personnel ships and facilities on shore and in port This book constitutes the first research effort after the unprecedented attacks of September 11 2001 to provide government industry and the academic and policy communities with a major resource on potential threats to the maritime environment Assuming that past tactics as well as a variety of other unconventional attacks will be utilized by both domestic and international groups well into the 21st century the book sagely outlines the response needed from government and industry to meet the coming challenges *A Systems-Based Approach to Policymaking* Kenyon B. de Greene,2012-12-06 This book is based on a number of systems concepts of which the following are emphasized here oThe interacting systems of society and

the environment are dynamic and evolutionary. Evolution of these systems carries them through stages of differential stability and instability, continuity and discontinuity. Associated with evolution and instability is structural change that is essentially irreversible. The present is a stage of world transformation that may not have been equaled for decades or even centuries. Policies and decisions must match the times in the present case the stage of world transformation. The time 11 59 59 PM approximately on December 31 2000 has an important symbolic meaning. It marks the end of a minute the end of an hour the end of a day the end of a year the end of a decade the end of a century and the end of a millennium. The time and date provide a convenient yardstick against which we can evaluate the evolution of our thinking and the adequacy of our assumptions, mental models, paradigms, and policies. Will the beginning turn out to be appropriately different from the end? We hope that this book is helpful in such evaluation. This is a new paradigm book which both presents and advances the new way of thinking about the systems of science, technology, society, economics, politics, and the environment, and actively calls for the replacement of the worn-out cognitive sociotechnical paradigm.

Securing the Insecure States in Britain and Europe Musa Khan Jalalzai, 2017-11-10

Failed States and the Origins of Violence Tiffany Howard, 2016-04-15

What makes a terrorist? Is an individual inherently predisposed to be attracted to political violence, or does exposure to a certain environment desensitize them in such a way that violence represents a viable mode for addressing political grievances? Identifying state failure as the impetus for political violence, this book addresses these questions and focuses on why existing extremist groups find failed states so attractive. Utilizing global barometer data, Tiffany Howard examines the underpinnings of individual support for political violence and argues that an insidious pattern of deprivation within failed states drives ordinary citizens to engage in and support extreme acts of political violence. A rigorous examination of four regions plagued by a combination of failed states and political violence: Sub-Saharan Africa, The Middle East and North Africa, Southeast and South Asia, and Latin America, this text draws parallels to arrive at a single conclusion that failed states are a natural breeding ground for terrorism and political violence.

Intelligence in Vex Musa Khan Jalalzai, 2018-11-29

Most discussions on electronic media and intellectual forums about the effects of globalization on national security focus on violent threats. Notwithstanding the plethora of books, journals, and research papers on national and international security, there is an iota of research work on the issue of interconnectedness. The interconnectedness of violent threats and their mounting effect pose grave dangers to the aptitude of a state to professionally secure its territorial integrity. Technological evolution and aggrandized interlinkage of our world in general, and specifically information technology, has affected people and society in different ways. Daily life of every man and woman has become influenced by these challenges. The twenty-first century appeared with a different class of National Security threats. After the first decade, world leaders, research scholars, journalists, politicians, and security experts grasped that the world has become the most dangerous place. The avoidance of war was the primary objective of superpowers, but with the end of the Cold War, emergence of Takfiri Jihadism, extremism, and terrorism prompted

many unmatched challenges Home grown extremism and radicalization continues to expose a significant threat to the National Security of the EU and Britain The risks from state based threats have both grown and diversified The unmethodical and impulsive use of a military grade nerve agent on British soil is the worse unlawful act of bioterrorists *Terrorism*
