Test Of Time An Essay On Philosophical Aesthetics

Test Of Time An Essay On Philosophical Aesthetics:

The Test of Time Anthony Savile, 1985 **The Imaginary Museum of Musical Works : An Essay in the Philosophy of Music** Lydia Goehr, 1992-03-26 What is the difference between a performance of Beethoven's Fifth Symphony and the symphony itself What does it mean for musicians to be faithful to the works they perform To answer such questions Lydia Goehr combines philosophical and historical methods of enquiry Finding Anglo American philosophy inadequate for the task she shows that a historical perspective is indispensable to a full understanding of musical ontology Goehr examines the concepts and assumptions behind the practice of classical music in the nineteenth century and demonstrates how different they were from those of previous centuries She rejects the finding that the concept of a musical work emerged in the sixteenth century placing its emergence instead around 1800 She describes how the concept of a work then came to define the norms expectations and behaviour that we now associate with classical music Out of the historical thesis Goehr draws philosophical conclusions about the normative functions of concepts and ideals She also addresses current debates among conductors early music performers and avant gardists Introduction I The Analytic Approach Status and identity Analytical positions I Analytical positions II Critique and transition II The Historical Approach Normativity and Practice The central claim Musical meaning I Musical meaning II Musical production I Musical production II Werktreue Confirmation and challenge **Art and Time** Derek Allan, 2014-09-18 A well known feature of great works of art is their power to live on long after the moment of their creation to remain vital and alive long after the culture in which they were born has passed into history This power to transcend time is common to works as various as the plays of Shakespeare the Victory of Samothrace and many works from early cultures such as Egypt and Buddhist India which we often encounter today in major art museums What is the nature of this power and how does it operate The Renaissance decided that works of art are timeless immortal immune from historical change and this idea has exerted a profound influence on Western thought But do we still believe it Does it match our experience of art today which includes so many works from the past that spent long periods in oblivion and have clearly not been immune from historical change This book examines the seemingly miraculous power of art to transcend time an issue widely neglected in contemporary aesthetics Tracing the history of the question from the Renaissance onwards and discussing thinkers as various as David Hume Hegel Marx Walter Benjamin Sartre and Theodor Adorno the book argues that art transcends time through a process of metamorphosis a thesis first developed by the French art theorist Andr Malraux The implications of this idea pose major challenges for traditional thinking about the nature of art Nature and Landscape Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic

understanding and appreciation Allen Carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment

A Companion to Aesthetics Stephen Davies, Kathleen Marie Higgins, Robert Hopkins, Robert Stecker, David E. Cooper, 2009-04-27 A COMPANION TO AESTHETICS This second edition of A Companion to Aesthetics examines questions that were among the earliest discussed by ancient philosophers such as the nature of beauty and the relation between morality and art while also addressing a host of new issues prompted by recent developments in the arts and in philosophy including coverage of non Western art traditions and of everyday and environmental aesthetics The volume also canvases debates regarding the nature of representation the relation between art and truth and the criteria for interpretation which are among the most hotly discussed topics in contemporary philosophy In this extensively revised and updated edition 168 alphabetically arranged articles provide comprehensive treatment of the main topics and writers in aesthetics Major additions include historical overviews from the prehistoric to the present and a section on the individual arts A Companion to Aesthetics will serve students of philosophy literary criticism and cultural studies as well as the educated general reader both as a work of reference and with its many substantial essays as a guide to the best thinking about the arts from the ancient Greeks to the dawn of the twenty first century

Rethinking Virtual Places Erik Champion, 2021-11-30 How would the humanities change if we grappled with the ways in which digital and virtual places are designed experienced and critiqued In Rethinking Virtual Places Erik Malcolm Champion draws from the fields of computational sciences and other place related disciplines to argue for a more central role for virtual space in the humanities For instance recent developments in neuroscience could improve our understanding of how people experience store and recollect place related encounters Similarly game mechanics using virtual place design might make digital environments more engaging and learning content more powerful and salient In addition Champion provides a brief introduction to new and emerging software and devices and explains how they help hinder or replace our traditional means of designing and exploring places Perfect for humanities scholars fascinated by the potential of virtual space Rethinking Virtual Places challenges both traditional and recent evaluation methods to address the complicated problem of understanding how people evaluate and engage with the notion of place

[The Rock Canon](#) CarysWyn Jones, 2017-07-05 Canons are central to our understanding of our culture and yet in the last thirty years there has been much conflict and uncertainty created by the idea of the canon In essence the canon comprises the works and artists that are widely accepted to be the greatest in their field Yet such an apparently simple construct embodies a complicated

web of values and mechanisms Canons are also inherently elitist however Carys Wyn Jones here explores the emerging reflections of values terms and mechanisms from the canons of Western literature and classical music in the reception of rock music Jones examines the concept of the canon as theorized by scholars in the fields of literary criticism and musicology before moving on to search for these canonical facets in the reception of rock music as represented by ten albums Bob Dylan's Highway 61 Revisited The Beach Boys Pet Sounds The Beatles Revolver The Velvet Underground's The Velvet Underground Nico Van Morrison's Astral Weeks Marvin Gaye's What's Going On The Rolling Stones Exile on Main St Patti Smith's Horses The Sex Pistols Never Mind the Bollocks Here's the Sex Pistols and Nirvana's Nevermind Jones concludes that in the reception of rock music we are not only trying to organize the past but also mediate the present and any canon of rock music must now negotiate a far more pluralized culture and possibly accept a greater degree of change than has been evident in the canons of literature and classical music in the last two centuries **The Philosophy of Literature** Peter

Lamarque,2008-08-11 By exploring central issues in the philosophy of literature illustrated by a wide range of novels poems and plays Philosophy of Literature gets to the heart of why literature matters to us and sheds new light on the nature and interpretation of literary works Provides a comprehensive study along with original insights into the philosophy of literature Develops a unique point of view from one of the field's leading exponents Offers examples of key issues using excerpts from well known novels poems and plays from different historical periods Images of Excellence Christopher Janaway,1995

Plato was the first great figure in Western philosophy to assess the value of the arts he famously argued in the Republic that traditionally accepted forms of poetry drama and music are unsound claiming they are conducive to warped ethical standards detrimental to the psyche and purveyors of illusions about important matters in human life This view has been widely rejected but Christopher Janaway here argues that Plato's hostile case is a more coherent and profound challenge to the arts than has sometimes been supposed Denying that Plato advocates good art in any modern sense Dr Janaway seeks both to understand Plato's critique in the context of his own philosophy and to locate him in today's philosophy of art showing how issues in aesthetics arise from responses to his charges Plato's questions about beauty emotion representation ethical knowledge artistic autonomy and censorship are of contemporary relevance as formerly secure assumptions about the value of art and the aesthetic come under scrutiny Images of Excellence gives a new and original view of a famous issue in the history of philosophy it is written not only for readers working in ancient philosophy but for all who are interested in aesthetics art theory and literary theory Kant's Critique of the Power of Judgment Paul Guyer,2003 Includes twelve of the most important modern critical discussions of the Critique of the Power of Judgment written by the leading Kant scholars and aestheticians of the twentieth century Visit our website for sample chapters
