## Input

Natural Language Processing (NLP) is a subfield of artificial intelligence that is concerned with the interactions between computers and human (natural) languages.

## Text Generation Model

## Output

It deals with the automatic manipulation of natural language, such as speech recognition, natural language understanding, and natural language generation. NLP is a relatively new field, having only emerged in the 1950s. However, it has grown rapidly in recent years, with advances in machine learning and artificial intelligence. NLP is used in a variety of applications, such as automatic summarization, question answering, machine translation, and text-to-speech synthesis.
