Codevilla, 2010-05 In this cross cultural study Angelo M Codevilla illustrates that as people shape their governments they shape themselves Drawing broadly from the depths of history from the Roman republic to de Tocqueville's America as well as from personal and scholarly observations of the world in the twentieth century The Character of Nations reveals remarkable truths about the effects of government on a society's economic arrangements moral order sense of family life and ability to defend itself Codevilla argues that in present day America government has had a profound negative effect on societal norms It has taught people to seek prosperity through connections with political power it has fostered the atrophy of civic responsibility it has waged a Kulturkampf against family and religion and it has dug a dangerous chasm between those who serve in the military and those who send it in harm's way Informative and provocative The Character of Nations shows how the political decisions we make have higher stakes than simply who wins elections

Kolodko, 2018-04-27 This title was first published in 2003. *Emerging Market Economies: Globalization and Development* is the result of a comprehensive international research project coordinated within the TIGER Transformation Integration and Globalization Economic Research. It deals with economic, social, and political implications of globalization for the development of emerging market economies and is authored by a host of international scholars from the USA, Chile, Tanzania, UK, Italy, Hungary, Poland, Romania, China, and Japan. Kolodko et al. examine the fundamental issues of the influences of globalization on the markets for capital goods and labour, and for the growth and development in emerging markets, including post-communist countries. Why Constitutions Matter Nils Karlson, 2017-09-04 As countries in the twentieth and twenty-first centuries change from colonialist to independent rule or from a socialist to a democratic society, the need for a written constitution becomes apparent. Countries in the former Soviet Union, Africa, or nations once part of the British Empire face social, economic, and humanitarian problems as they experiment with democratic rule. Such issues as clearly defining where sovereignty lies, how much power is given to the people, and what rights are possessed by a nation's citizenry are new to these countries. While a constitution, being a man-made document, is subject to interpretation and does not always delineate in a lucid framework its parameters for future generations, it is clear that constitutions do matter. This volume, compiled under the direction of the City University of Stockholm, is an important study on the significance of constitutions and constitutional law in a democratic society. A number of scholars in law, political science, and economics have contributed to this volume. They include James Buchanan, Aleksander Peczenik, Mats Lundström, Joakim Nergelius, Sverker Hart, Niclas Berggren, Peter Kurrild Klitgaard, Wolfgang Kasper, and Erik Moberg. All add to the understanding of the intertwining roles of politics and the social sciences in a modern democratic state. They explore why a constitution is essential, the relationship between a constitution and a rational political system, the democratic principle of majority rule, why constitutional constraints are needed in a democratic state, recent constitutional reforms in the United Kingdom, the electoral system and its centrality in a democracy, evolution in constitutional change, competition within a federal structure, and the connection between politics and economics.

Why Constitutions Matter is a fascinating and timely study of constitutionalism and will be of interest to students of politics law economics and sociology
