Stjernholm,2025-03-06 How have practices and imaginaries of sensing been religiously engaged and contested by Muslims How do contemporary Muslim practices and debates concerning religious sensing relate to historical precedents Analysing examples dealing with contemporary Sufism and Muslim religious oratory this book explores how the senses have been engaged and contested in Muslim religiosity Combining the research fields of Islamic Studies anthropology of Islam material religion and sensory studies this book covers a range of materials including writings by Muslim religious authorities ethnographic material audio recordings and videos Focusing on Western contexts this book provides an innovative approach by foregrounding the piety practices of Western Muslims Synthesising existing research with his own original analyses Simon Stjernholm provides a fresh perspective on Islamic tradition religiosity and sensing Psychology, Religion, and Spirituality James M. Nelson,2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals

with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult
