The National Temper Lawrence W. Levine, Robert Middlekauff, 1972-04-01 The National Temper Lawrence W. Levine, Robert Middlekauff, 1971 **The Civil Sphere** Jeffrey C. Alexander, 2008-09-08 What binds societies together and how can these social orders be structured in a fair way Jeffrey C Alexander's masterful work *The Civil Sphere* addresses this central paradox of modern life Feelings for others the solidarity that is ignored or underplayed by theories of power or self interest are at the heart of this novel inquiry into the meeting place between normative theories of what we think we should do and empirical studies of who we actually are Solidarity Alexander demonstrates creates inclusive and exclusive social structures and shows how they can be repaired It is not perfect it is not absolute and the horrors which occur in its lapses have been seen all too frequently in the forms of discrimination genocide and war Despite its worldly flaws and contradictions however solidarity and the project of civil society remain our best hope the antidote to every divisive institution every unfair distribution every abusive and dominating hierarchy This grand sweeping statement and rigorous empirical investigation is a major contribution to our thinking about the real but ideal world in which we all reside **The Politics of Trade in Latin American Development** Steven E. Sanderson, 1992 In this innovative synthesis and reconstruction of the role of trade in Latin American development the author asks what have been the political terms of trade in Latin America and why have they differed so much from the multilateral and national trade politics of the advanced capitalist countries especially the United States He shows in great detail how a new conceptual approach to this question can help us to understand why and with what limits Latin America now seems ready to accept the mantle of free trade This book is a unique attempt to link some of the most provocative hypotheses from the literatures of international trade development regional economic history and resource management to national politics in Latin America It takes a fresh look at old academic questions critiques the received knowledge on trade and offers some new data documents and indexes To the standard literature on Latin American trade the author adds insights and information from other literatures resource conservation poverty alleviation and national development strategies to name a few The current trend toward looking at constraints and possibilities in the trade system is reshaped to ask familiar questions in a concrete empirical way What changes in development design come from external shock and under what conditions Does the pressure of the international system actually force Latin American countries to alter their rates and kinds of natural resource exploitation Can a political course of export promotion address the debt crisis effectively Are the multilateral trade negotiations a useful format for Latin American trade and development problems And finally can we say anything with authority about Latin America as a region
