Bumblebee Economics Bernd Heinrich, 2004 The bumblebee spends its days gathering the resources needed by the hive

honey for energy and pollen for protein The author examines the intricate processes that make up this behavior including discussions of thermoregulation and its behavioral application and the way bumblebees choose flowers to harvest **The Little Book of bees** Karl Weiss,C.H. Vergara,2002-09-23 The more we learn about bees the more extraordinary they seem They have five eyes and beat their wings at almost 200 cycles per second And to communicate with each other bees do make sounds but also dance This book packed with over 30 figures gives a fascinating insight into the extraordinary complex and highly organised world of bees The author K Weiss explains the critical role that bees and bee keeping play for human society and offers advice for those interested in raising bees Attracting Native Pollinators The Xerces Society,2011-02-26 With the recent decline of the European honey bee it is more important than ever to encourage the activity of other native pollinators to keep your flowers beautiful and your grains and produce plentiful In Attracting Native Pollinators you ll find ideas for building nesting structures and creating a welcoming habitat for an array of diverse pollinators that includes not only bees but butterflies moths and more Take action and protect North America s food supply for the future while at the same time enjoying a happily bustling landscape **The Management of Insects in Recreation and Tourism** Raynald Harvey Lemelin,2013 An insight into the booming industry of insect leisure and tourism using case studies and examples from around the world **Status of Pollinators in North America** National Research Council,Division on Earth and Life Studies,Board on Agriculture and Natural Resources,Board on Life Sciences,Committee on the Status of Pollinators in North America,2007-04-13 Pollinators insects birds bats and other animals that carry pollen from the male to the female parts of flowers for plant reproduction are an essential part of natural and agricultural ecosystems throughout North America For example most fruit vegetable and seed crops and some crops that provide fiber drugs and fuel depend on animals for pollination This report provides evidence for the decline of some pollinator species in North America including America s most important managed pollinator the honey bee as well as some butterflies bats and hummingbirds For most managed and wild pollinator species however population trends have not been assessed because populations have not been monitored over time In addition for wild species with demonstrated declines it is often difficult to determine the causes or consequences of their decline This report outlines priorities for research and monitoring that are needed to improve information on the status of pollinators and establishes a framework for conservation and restoration of pollinator species and communities

Pesticide Risk Assessment for Pollinators David Fischer,Tom Moriarty,2014-04-29 Pollinators play a vital role in ecosystem health and are essential to ensuring food security With declines in both managed and wild pollinator populations in recent years scientists and regulators have sought answers to this problem and have explored implementing steps to protect pollinator populations now and for the future *Pesticide Risk Assessment for Pollinators* focuses on the role pesticides play in impacting bee populations and looks to develop a risk assessment process along with the data to inform that process to better assess the potential risks that can accompany the use of pesticide products *Pesticide Risk Assessment for*

Pollinators opens with two chapters that provide a biological background of both Apis and non Apis species of pollinators Chapters then present an overview of the general regulatory risk assessment process and decision making processes The book then discusses the core elements of a risk assessment including exposure estimation laboratory testing and field testing The book concludes with chapters on statistical and modeling tools and proposed additional research that may be useful in developing the ability to assess the impacts of pesticide use on pollinator populations Summarizing the current state of the science surrounding risk assessment for Apis and non Apis species Pesticide Risk Assessment for Pollinators is a timely work that will be of great use to the environmental science and agricultural research communities Assesses pesticide risk to native and managed pollinators Summarizes the state of the science in toxicity testing and risk assessment Provides valuable biological overviews of both Apis and non Apis pollinators Develops a plausible overall risk assessment framework for regulatory decision making Looks towards a globally harmonized approach for pollinator toxicity and risk assessment
