The Nature Of Mammals:

The Nature of Mammals Wayland Drew,1974 *The Natural History of Canadian Mammals* Donna Naughton,2014-11-11 The selections in this section include whales dolphins and porpoises The Natural History of Canadian Mammals is a beautifully illustrated up to date guide to all 215 known species of mammals in Canada It features brand new full colour images of each species as well as stunning photographs from Canadian Geographic magazine s national photography competitions depicting the animals in their natural environments Along with being a visual treat this book is jam packed with information accessible to readers at all levels Detailed descriptions are provided of each mammal s appearance habitat and behavior while colour maps show their full distribution across Canada North America and globally The book also includes practical guides on tracking and identification for readers who would like to learn how to spot mammals in the wild Among its most special features is a series of colour plates with vignettes of the Canadian representatives of each group sized relative to one another for easy comparison and linked to the full species accounts later in the book The Nature of Mammals John Murray Speirs,Walter Massey Tovell,1974 **The Ecology and Biology of Mammal-like Reptiles** Nicholas Hotton,1986 **Marine Mammals** Nick Gales,Mark Hindell,Roger Kirkwood,2003 Brings together contributions from 68 leading scientists from 12 countries to provide an up to date review on the way we manage our interactions with whales dolphins seals and dugongs **The nature park guide for Abuko Nature Reserve (Gambia)** ,2025-09-26

Annual Report of the Marine Mammal Commission United States. Marine Mammal Commission,1973 The Natural History of Inbreeding and Outbreeding Nancy Wilmsen Thornhill,1993-08-15 Inbreeding the mating of close kin and outbreeding the mating of distant relatives or unrelated organisms have long been important subjects to evolutionary biologists Inbreeding reduces genetic diversity in a population increasing the likelihood that genetic defects will become widespread and deprive a population of the diversity it may need to cope with its environment Most plants and animals have evolved behavioral and morphological mechanisms to avoid inbreeding However today many endangered species exist only in small very isolated populations where inbreeding is unavoidable so it has become a concern for conservationists In this volume twenty six experts in evolution behavior and genetics examine the causes and consequences of inbreeding The authors ask whether inbreeding is as problematic as biologists have thought under what ecological conditions inbreeding occurs and whether organisms that inbreed have mechanisms to dampen the anticipated problems of reduced genetic variation The studies including theoretical and empirical work on wild and captive populations demonstrate that many plants and animals inbreed to a greater extent than biologists have thought with variable effects on individual fitness Graduate students and researchers in evolutionary biology animal behavior ecology and conservation biology will welcome this wide ranging collection **The Natural History Review** ,1864 **The Nature of the Cairngorms** Philip Shaw,Des B.A. Thompson,2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and

contains its largest National Park In this book 35 authors drawing on published and unpublished sources present an up to date review of the area s natural features including plants animals habitats geology and landforms The review falls into three parts The first and largest part describes the area s rich diversity of nature with each chapter summarising recent research findings trends and conservation issues for a different landform habitat or species group The second part considers deer management recreation and projected climate change impacts Part three focuses on rare and threatened species and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important
