dramatic world order transformations across the 1970s and 1980s this book examines the competing planetary perspectives of the Brandt Commission and the multinationals arguing that the missed opportunities of these decades created a path for contemporary political and economic crises At the Global South s request for a New International Economic Order the Brandt Commission chaired by Willy Brandt was appointed in 1977 The commission with a goal to formulate arguments on how to close the gap between the North and South developed a planetary perspective grounded in economic redistribution ecological considerations and disarmament The multinationals at that time a new kind of business corporation repressed Brandt s vision by seeking freedom from political monitoring This book discusses the ways that global corporations created facts that changed the world and the preconditions of politics It moves beyond existing research that considers the competition merely a theoretical clash between Keynesianism and neoliberalism Featuring a thorough analysis of the decades trends and a new interview with Shridath Ramphal the Commission s unofficial vice chair this is a timely volume for students and researchers of international relations political science and contemporary history

The Legacy of John Kenneth Galbraith STEVEN PRESSMAN,2013-10-18 When John Kenneth Galbraith passed away on April 29 2006 the economics profession lost one of its true giants And this is not just because Galbraith was an imposing figure at 6 feet 9 inches tall Throughout his life Galbraith advised Presidents made important professional contributions to the discipline of economics and also tried to explain economic ideas to the general public This volume pays tribute to Galbraith s life and career by explaining some of his major contributions to the canon of economic ideas The papers describe the series of unique contributions that Galbraith made in many different areas He was a founder of the Post Keynesian view of money and a proponent of the Post Keynesian view that price controls were necessary to deal with the problem of inflation in a modern economy where large firms already control prices and prices are not determined by the market He promulgated the view that firms manipulate individual preferences and tastes through advertising and other means of persuasion and he drew out the economic implications of this view He was a student of financial frauds and euphoria and a forerunner of the Post Keynesian Minskian view of finance and how financial markets really work This book was published as a special issue of the Review of Political Economy
