The New Century Quest For The High Road:

The New Century Clem Sunter, 1992 **The Age of Heretics** Art Kleiner, 2008-10-03 In this second edition of his bestselling book author Art Kleiner explores the nature of effective leadership in times of change and defines its importance to the corporation of the future He describes a heretic as a visionary who creates change in large scale companies balancing the contrary truths they can't deny against their loyalty to their organizations The Age of Heretics reveals how managers can get stuck in counterproductive ways of doing things and shows why it takes a heretical point of view to get past the deadlock and move forward **The Art of the Long View** Peter Schwartz, 2012-02-08 What increasingly affects all of us whether professional planners or individuals preparing for a better future is not the tangibles of life bottom line numbers for instance but the intangibles our hopes and fears our beliefs and dreams Only stories scenarios and our ability to visualize different kinds of futures adequately capture these intangibles In The Art of the Long View now with the addition of an all new User's Guide Peter Schwartz outlines the scenario approach giving you the tools for developing a strategic vision within your business Schwartz describes the new techniques originally developed within Royal Dutch Shell based on many of his firsthand scenario exercises with the world's leading institutions and companies including the White House EPA BellSouth PG E and the International Stock Exchange *Changing the Course of AIDS* David Dickinson, 2011-03-15 Changing the Course of AIDS is an in depth evaluation of a new and exciting way to create the kind of much needed behavioral change that could affect the course of the global health crisis of HIV AIDS This case study from the South African HIV AIDS epidemic demonstrates that regular workers serving as peer educators can be as or even more effective agents of behavioral change than experts who lecture about the facts and so called appropriate health care behavior After spending six years researching the response of large South African companies to the epidemic that is decimating their workforce as well as South African communities David Dickinson describes the promise of this grassroots intervention workers educating one another in the workplace and community and the limitations of traditional top down strategies Dickinson's book takes us right into the South African workplace to show how effective and yet enormously complex peer education really is We see what it means when workers directly tackle the kinds of sexual gender religious ethnic and broader social and political taboos that make behavior change so difficult particularly when that behavior involves sex and sexuality Dickinson's findings show that people who are not officially health care experts or even health care workers can be skilled and effective educators In this book we see why peer education has so much to offer societies grappling with the HIV AIDS epidemic and why those interested in changing behaviors to ameliorate other health problems like obesity alcoholism and substance abuse have so much to learn from the South African example **Coping with Continuous Change in the Business Environment** Antonie Botha, Derrick Kourie, Retha Snyman, 2014-01-23 Aimed at knowledge management professionals and students in the field of knowledge management information science information systems and software engineering the book provides answers to the

what is and why is questions with regard to knowledge management It investigates the concepts and elements the drivers and challenges involved in knowledge management In the second part of the book the how and with what characteristics of knowledge management are covered Although knowledge management is primarily concerned with non technical issues this book concentrates on the technical issues and challenges A new technology framework for knowledge management is proposed to position and relate the different knowledge management technologies as well as the two key applications of knowledge management namely knowledge portals and knowledge discovery including text mining Best practices for a number of knowledge management issues are discussed A new technology framework for knowledge management is proposed to position and relate the different knowledge management technologies Written by internationally acknowledged KM researchers and practitioners

African Voices, African Visions Olugbenga Adesida, Arunma Oteh, 2004 Does Africa have a future What are the visions hopes ambitions and fears of young Africans for the future of the world the continent their nation and their communities How do they envision this world and their roles within it These issues have not previously been explored collectively by Africans because of the enormous challenges and the preoccupation with the present But Africa must not allow the enormity of the problems to blind it to its past and future Africa must chart its own vision of a desirable future and therefore young Africans born just before or after independence were challenged to reflect on the future of the continent This book presents the response to that challenge In this book the voices of a new generation of Africa are heard exploring the future from personal and diverse perspectives The authors have enumerated the ills of Africa analyzed the problems and explored the opportunities Remarkably despite the daunting nature of the challenges they were all hopeful about the future They provided their visions of the future suggest numerous ideas on how to build a new Africa and implored Africans to take responsibility for the transformation of the continent Given the current emphasis on African renaissance and union the ideas

presented here could become the basis for a truly shared vision for the continent *The Essence of Scenarios* Roland Kupers, Angela Wilkinson, 2025-10-01 In 1965 when quantitative planning was much in vogue Royal Dutch Shell started experimenting with a different way of looking into the future scenario planning Shell's practice has now survived for almost half a century and has had a huge influence on how businesses governments and other organisations think about and plan for the future To produce this illuminating study the authors interviewed almost every living veteran of the Shell scenario planning operation along with top Shell executives through the years They identify several principles that both define the process at Shell and help explain how it has thrived for so long For instance Shell scenarios are stories not predictions and are designed to help break the habit ingrained in most corporate planning of assuming that the future will look much like the present **Ethics and Leadership in Business and Politics** Faan Malan, Ben Smit (professor.), 2001 This work provides a mindset for leadership to deal with the problem of unethical transgressions in South African communities and business It provides a thorough and comprehensive diagnosis of leadership and morality from an analysis of causes to the compilation of remedies
